E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 4-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Matthew Boyer, (b) (6)

3. Disqualification factor. A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court; and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:
- Scientific name (genus, species, and, if applicable, subspecies) and common name.
Panthera Leo, P. Leo, Lion
 - Sex (if known). Female
5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

- Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Zimbabwe, Save Valley Conservancy, Nearest City (Chiredzi)

- Date wildlife is to be hunted:

September 18th 2019 to October 10th 2019

- Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

HHK Safaris, PO Box CH 273 Chisipite, Harare Zimbabwe, Professional Hunter (York Mare)

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following information:

- Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife was removed from the wild:

- Date wildlife was hunted:

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the foreign export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Hunt will take place in September 2019 (no permit yet)

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name: HHK Safaris
Address: 4 Wayhill Lane West
City: Umwinsidale, Harare
State/Province: Zimbabwe
Country, Postal Code:

9. For species listed under the U.S. Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service (Service) must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful for our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Lions in the Save Conservancy show low genetic diversity due to inbreeding. With that being stated lions 6 years old and older are the only animals that are being harvested. That is reason for the harvest of a female who is older and will not reproduce any offspring

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, local community, or government?

Trophy Fees go towards local government anti-poaching organizations, and help landowners who have livestock keep lions that are kicked out of the pride in check. Otherwise they are poisoned and killed once they become a problem.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or landowner that provide a conservation benefit to the species being hunted/species hunted?

HHK Safaris is trying to conserve the Save Valley for future generations of Lions, to help harvest old and infertile lions to get genetics back to a healthy level. Landowners need help from the conservation of hunters to control these lions who have been kicked out of the pride to stop killing their cattle.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

If applying for the import of an elephant trophy, I understand that my client may import no more than two elephant trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement:

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import an elephant trophy, I understand that I may import no more than two elephant trophies in one calendar year.

Applicant's signature: _____ (b) (6) _____ Date: 5-1-19

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign governments to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipments must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Why killing lions like Cecil may actually be good for conservation

The death of a celebrity often makes the headlines, but it is less common that the death of wild animal has the same effect. However, it appears that the entire world has mourned the loss of Cecil the lion, killed on a private game reserve bordering a national park in Zimbabwe. But is the recent barrage of attacks on trophy hunting, and the US dentist who killed Cecil, justified?

Let's be clear: Cecil was killed illegally, which we don't condone. The landowner who allowed the hunt on his reserve without the necessary permit should face the justice system. But this one bad apple should not tarnish an entire industry.

Legally hunting lions in Zimbabwe is highly regulated: it requires various permits and licenses from the client, professional hunter and hunting reserve owner. National quotas aim to ensure sustainable off-take of the species and, in western Zimbabwe, lions are only killed once they have reached a certain age to make sure they've had the chance to pass their genes on. As a result, lion populations in Zimbabwe are either stable or increasing.

So if hunts are conducted following these rules, can trophy hunting really help conserve lions? Some argue that even if this were the case, the practice still shouldn't be allowed because it involves killing a charismatic and threatened animal for fun. Opponents suggest that non-lethal alternatives such as

photographic tourism should be the main way in which conservation is funded. But there are a number of problems with this argument.

Tourism isn't the answer

Hunters are willing to go to remote and unstable areas into which most photographic tourists are unwilling to venture. Far more photographic tourists than hunters would have to travel to Africa to make up the same level of revenue, so the carbon footprint from all that air travel would surely have a significant environmental impact. It should also be noted that the potential for nature tourism is not equally distributed, with the industry often focused only around a few locations. This leaves other regions without access to tourism revenue. Oh, and let's not forget that wildlife reserves can also kill lions.

If the goal is to preserve populations and species (as opposed to the welfare of individual animals), countries with healthy wildlife populations should be able to use their natural resources to cover the costs of management. This is particularly the case in countries such as Zimbabwe, one of the poorest places in the world.

How hunting helps

Zimbabwe has a tradition of using trophy hunting to promote wildlife conservation. Through the CAMPFIRE programme, which ran from 1989 to 2001, more than US\$20m was given to participating communities, 89% of which came from sports hunting. In more recent times, populations of elephants and other large herbivores have been shown to benefit from trophy hunting.

Zimbabwean trophy hunting generates roughly US\$16m of revenue annually. While it has been rightly pointed out that only 3% of this goes towards local communities, the ethical implications of removing this money without a clear alternative need to be examined.

The economic impact of trophy hunting in comparison to tourism as a whole may not be huge, but what is the alternative if it is made illegal? Zambia banned trophy hunting of big cats in 2013, only to reverse it earlier this year because the government needed the money to fund conservation.

Conservation costs money – so does the damage done by lions killing livestock. It is not clear whether photographic tourism alone could cover these financial burdens.

Lions can cause dramatic financial burdens to local communities. Nikl Rust

Improving the situation

If trophy hunting is to continue, how can we make it more sustainable? One study suggested we need to enforce age restrictions on trophy animals throughout the entire country, improve monitoring, change quotas over time depending on environmental conditions and ensure that lion hunts are at least 21 days long.

Another study found that trophy hunting can be beneficial to lion conservation when the income is shared with locals who live with this species (and have to deal with the negative consequences of their presence).

While it is sad that we sometimes have to resort to killing animals for conservation, let's not allow emotions to overtake our arguments. Conservation is a complex, difficult industry and needs all the financial help it can get: we are after all living through the sixth mass extinction. How much money will that take to fix?

Recovering population of Zimbabwean African lions show low genetic diversity

by Public Library of Science

Lion (*Panthera leo*). Credit: Regina Hart, Flickr

The lion population of Zimbabwe's Savé Valley Conservancy shows low genetic diversity despite improved numbers, according to a study published February 7, 2018 in the open-access journal *PLOS ONE* by Laura Tensen from the University of Johannesburg, South Africa, and colleagues based in the Savé Valley Conservancy.

The African lion (*Panthera leo*) population in the Savé Valley Conservancy of the Lowveld region of Zimbabwe fell to less than ten known individuals, until the 2005 introduction of ten new lions helped it recover to around 200 in 2016. But since this population originated from just a few individuals, there are concerns about potential low genetic diversity due to inbreeding. The authors of the

present study genotyped a sample of 42 Savé Valley lions, using mitochondrial and nuclear markers to compare the genetic diversity of this population to that of other African lion populations.

The researchers found that the Savé Valley lion population appears to be the least genetically diverse of those in Zimbabwe's Lowveld region, with evidence of inbreeding. The population also appeared genetically distinct from others, likely because factors such as human development may have prevented the populations mixing.

Lion populations with low genetic diversity are known to be at risk for reduced fertility and increased death rates compared to more diverse populations. Given their findings, the authors suggest the introduction of new unrelated lions into the Savé Valley population may become necessary to enhance its genetic diversity and ensure its long-term future.

CONSERVATION KNOWS NO BORDERS

Today

These images show the selfless manner in which Warthog Safaris, under supervision of PHASA, keep the Conservation effort alive in Africa.

6 Captive-bred lions were transported by road and air from the Free State in South Africa to the Lubango area in Angola.

By rehoming these magnificent creatures to spacious wilderness areas where they may roam as free, the lion population in Angola is given a much needed increase.

The effort by Warthog Safaris and PHASA was the third in a very successful tale of sustaining

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for a trophy that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and

 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;

 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

BVC IS RENOWNED FOR ITS STRICT HUNTING POLICIES AND ENFORCES ETHICAL HUNTING PRACTICES BY ALL PHS. BVC USES A CORE OF REGULAR PHS WHOARE SELECTED ON REPUTATION AND ETHICAL BEHAVIOUR.

BVC WAS THE FIRST OPERATION TO INTRODUCE AGE MINIMUMS FOR BUFFALO, LION AND LEOPARD AND WAS INSTRUMENTAL IN PUSHING FOR ZIM. PARKS TO ADOPT AN AGE POINTS SYSTEM TO CONTROL LION AND LEOPARO QUOTAS.

AS PART OF OUR POLICY BVC DOES NOT ALLOW ANY SHOOTING FROM A VEHICLE (OTHER THAN SMALL CATS AT NIGHT) – NO HUNTING WITHIN 1 KM OF ANY CAMP – NO HUNTING OR BAITING FOR CATS WITHIN 500 M OF A WATER POINT – NO HUNTING OUT OF LARGE HERDS – NO HUNTING OF BUFFALO OUT OF HERDS (RESTRICTED TO SMALL GROUPS OF DAGA BOYS) – NO SOFT TOP BUFFALO – NO LION PRIDE MALES.....NUMEROUS OTHER RULES WHICH A PH HAS TO ABIDE BY IF HE IS TO REMAIN ONE OF OUR REGULAR / CORE PHS.

ALL OF THE ABOVE IS WELL KNOWN TO ALL ZIM. PHS AND ALL CLIENTS THAT HAVE HUNTED ON BVC.

WE HAVE 7 YEARS OF DATA FROM RESEARCH CONDUCTED ON BVC FOR LION, LEOPARD AND HERBIVORES AND THIS DATA IS OFTEN USED AT WILDLIFE WORKSHOPS AND QUOTA SETTING MEETINGS.

WITHOUT DOUBT, THERE IS NOT ANOTHER ZIMBABWEAN HUNTING OPERATION THAT DOES AS MUCH FOR THE COMMUNITIES AS BVC AND AGAIN THIS IS COMMON KNOWLEDGE AND CAN EASILY BE VARIFIED.

14. I declare that the foregoing is true and correct.

To: (b) (6)

Dear Mr. Caffey,

Ref: 42512D, requesting to import an animal trophy from Zambia.

Your referenced application has been reviewed and found to be incomplete. Therefore, please reply to the following:

1. Please respond to question 4.a. of the application and provide the scientific name of the specimen you are requesting to import and please understand that this information is required for a complete application to have been submitted.
2. Please clarify why you scratched out application questions 6.a. through 6.c. of the application regarding trophies that have already been taken. Instead, a response was provided to question 5 regarding animals that are currently living in the wild. However, your responses are not clear because you listed a hunt date that occurred approximately a year ago, in July of 2018.
 - If the hunt occurred in 2018, you must reply to application questions 6.a. through 6.c. (page 3).
 - If the hunt has not occurred yet, please clarify why a hunt date of July 2018 was provided. Also, provide correct and updated information in response to application questions 5.a through 5. b. (there are 2 application questions labelled 5.b.).
3. Respond to application question 7 and provide a copy of your Zambia licenses and permits authorizing the legal hunt of the animal trophy.
4. Your application responses for questions 9.a. through 9.c. of the application all state "Please see attached Operator Enhancement Information." However, no information was attached or enclosed with your referenced application. Therefore, please respond to ESA enhancement application questions 9.a. through 9.c. Also, please be aware that each application must stand on its own merits and must contain a sufficient amount of information to meet the ESA enhancement criteria.
5. Provide your application processing fee in the amount of \$100 and please understand that no additional work will be done on your application review until the required processing fee is received.

In accordance with 50 CFR 13.11(e), if the requested information is not received by this office by July 27, 2019 (45 calendar days of the date of this email), your application will be abandoned and administratively closed. Once a file is closed, you will need to submit a new application, and all required fees, for the Service to consider your proposed activity.

Respectfully,
