Canada lynx	Priority Projects		
Canada lynx	Provide DNA analysis of genetic material in support of the USDA, Superior National Forest's Canada lynx survey and monitoring program and lynx DNA database. The primary objective of this project is to continue to monitor Canada lynx presence, distribution and persistence across the Superior NF and the State of Minnesota. This project not only monitors lynx as a species, but also monitors individuals when possible. These data are also used by Superior NF biologists during project level analyses.
