

## Joe-Pye weed: *Eutrochium maculatum*

### Habitat information

- Joe-Pye weed is a native perennial that thrives in moist soils. It can grow to a height of 7 feet. Joe-Pye weed has a large cluster of dusty-pink flowers that are an important source of nectar for honey bees. You will often see this plant covered in pollinators! Supposedly, the plant's name comes from the story of a native American named Joe-Pye who used the plant to treat fevers.
