The CTUIR LSRCP O&M Statement of Work is a set of tasks specifically related to production coordination activities under the LSRCP program that are associated with management of fisheries within CTUIR ceded and usual and accustomed areas. The project partially funds a production coordinator position along with the corresponding administrative support and travel required to participate in the various coordination and planning forums directly related to LSRCP hatchery programs of which CTUIR is a co-manager. Following is a bulleted summary of significant activities performed by the production coordinator position during the period that extended from October 1, 2013 through September 30, 2014. No problems were encountered which impaired the ability to meet the agreement objectives.

- Participated in LSRCP Annual Operations Plan meetings for Lookingglass Hatchery (Northeast Oregon) and Lyons Ferry Hatchery Complex (Southeast Washington).
- Participated in the development of planning and management documents relative to LSRCP hatchery programs.
- Coordinated LSRCP hatchery activities related to CTUIR co-managed programs as necessary with co-managers.
- Coordinated CTUIR BPA projects with associated LSRCP programs.
- Provided review and comment on proposed LSRCP facility improvements and/or changes including Imnaha weir and adult handling facility, Lyons Ferry circular project and lake/release structure modifications.
- Provided review and comment on proposed M&E projects associated with LSRCP hatchery programs.
- Participated in other forums and activities related to LSRCP hatchery programs including attendance at both Snake River Fall Chinook coordination meetings (chaired March meeting), the LSRCP Hatchery Managers Annual Meeting, and the Northwest Fish Culture Conference in Boise, Idaho.
- Participated in NEOR/SEWA/SRCHF recovery planning processes. Including providing review and comment on draft recovery plans and permits. Also served on the Snake River fall Chinook technical team. Although not sure why since this committee is comprised solely (except me) of research scientist types.
• Participated as a member of the Production Advisory Committee (PAC) within U.S. v. Oregon.

• Participated in the Accords process as related to LSRCP programs.

• Provided review and comment on Columbia basin-wide documents related to the LSRCP program including the Columbia Basin Hatchery FEIS, the relative sections of the new Northwest Power and Conservation Council draft program language and the ISRP SRCHF review.

• Provided comments for the year end program and staff evaluation and served on the interview board for the LSRCP M&E Coordinator position.
