Subject: WINDGRABBER for bird and bat and squirrel protection!

Hi!

I'm a native born Wisconsinite who has invented a totally screened in rooftop wind turbine in a 1 to 50 kWe size range that needs development money to build a prototype unit to prove that it can be installed and operated cost effectively on homes and small office buildings in windy areas.

A few computer renditions of what a WINDGRABBER would look like on your home or outbuilding are attached herein.

Yours very truly,

Brett C. Krippene, PE (CO & WI)
