

(Modified from Fenelon and Watson, 1993)

Figure 11. Hydrographs showing surface-water levels in and ground-water levels near the Grand Calumet River and Indiana Harbor Canal, northwestern Indiana and water levels in Lake Michigan, May 17 to June 15, 1986 data. (Solid line on hydrograph is surface-water stage, dotted line is near-stream well, dashed line is well mid distance from stream, and chain-dashed well is well farthest from stream. The locations of the four sites are shown in Figure 9.)
