

## **Guidance for Break-out Groups — Wednesday, 17 December**

***For the benefit of Cerulean Warbler... thinking on a broad front across the range and across the life history of the species...***

***What are the top priorities for research and conservation action?***

Break-out groups to work on:

- Breeding season research
- Breeding season surveys and monitoring
- Breeding season conservation actions
- Non-breeding season surveys and research
- Non-breeding season conservation actions

### **Working group roles:**

#### *Facilitator*

- keep the group focused on task
- summarize progress on flip charts
- watch timeline to ensure final product

#### *Recorder*

- maintain electronic record of discussion points & decisions
- record strategies and priorities
- record/project final product for group

#### *Reporter*

- present group's work in plenary

### **Working group tasks:**

- Discuss and focus ideas that emerged from yesterday's forum (addressing threats, knowledge gaps, and potential resources)
- Develop a clear set of strategies for the next five years in as much detail as possible (including planning for funding and implementation)
- Prioritize strategies
- Prepare documents to present to plenary
