

Dalton Hendricks is a Biological Science Technician in the Aquatic Invasive Species Program since 2017. He completed his undergraduate work at University of Wisconsin-Green Bay and has 4 years of fisheries experience. Dalton has been with the U.S. Fish and Wildlife Service for 3 years working in Green Bay from 2015-2016 monitoring Lake Michigan for new Aquatic Invasive Species. He also worked for the Marquette Biological Station on Sea Lamprey Control (USFWS) from 2016-2017, treating streams and rivers around Lake Michigan and Lake Superior with TFM for sea lamprey.
