

Matthew Petasek has been a part of the Aquatic Invasive Species program since 2014. His primary role within the program includes coordination and planning of eDNA sampling efforts as well as utilizing his GIS skills to provide detailed maps for annual reports. He is also the acting Chemical Hygiene Officer in charge of chemical and lab safety within the office. He has earned two undergraduate degrees: the first in Natural Resource Management from Fox Valley Technical College in Wisconsin, and the second in Fish and Wildlife Management from American Military University in West Virginia.
