

Joe Sheahan is the Fish Passage lead for the Lake Michigan basin and coordinates the Great Lakes Basin Fish Habitat Partnership. Joe had a 27 year career with the Oregon Department of Fish & Wildlife and coordinated their Western Oregon Stream Restoration Program for over 10 years. Joe also spent two years with the US Army Corps of Engineers Regulatory Division as a senior project manager and served as the subject matter expert on jurisdictional boundaries for wetland and streams. Joe has been in his current position since 2015 working with state, local and non-government organizations to provide aquatic organism passage and improve aquatic habitat.
