Presentation Topics

- Who are the members of the Natural Resource Trustee Council and what is a Natural Resource Damage Assessment (NRDA)?
- How does NRDA relate to Superfund cleanup?
- What funding do the Trustees have for restoration (settlements)?
- How do you propose project ideas?
- When and how will Trustees select projects?
Who Are the Members of the Natural Resource Trustee Council?

The Natural Resource Trustee Council consists of agencies acting under federal and state law to seek environmental restoration:

- Michigan Department of Natural Resources (MDNR)
- Michigan Department of Environment, Great Lakes, and Energy (EGLE)
- Michigan Department of Attorney General (MDAG)
- U.S. Fish and Wildlife Service (USFWS)
- National Oceanic and Atmospheric Administration (NOAA)
Natural resources means land, fish, wildlife, other biota, air, water, groundwater, drinking water supplies and other such resources...
What is NRDA?

A process that the Trustees use to:
• assess injuries to natural resources that have been caused by releases of hazardous substances
• plan and conduct restoration actions that compensate for injuries

The purpose is to make the public whole

Law requires the responsible party to provide for restoration, through funding and/or projects

Release ➔ Impacts to Natural Resources ➔ Assessment ➔ Claim ➔ Restoration
NRDA Damages ("debits")

Start of Release

Past Losses

Interim Losses

Residual Future Losses
NRDA Benefits ("credits")
Kalamazoo River NRDA

This Trustee Council has been working on the Kalamazoo River NRDA since 2000

- Assessment plan and reports
- Input on cleanup projects
- Restoration plans
  - Portage Creek (2013)
  - Site-wide (2016)
- Project selection criteria
- Negotiations and settlements
- Restoration projects

How Does NRDA Relate to Superfund Cleanup?

- Release of hazardous substances is the trigger for both cleanup and NRDA restoration

**Cleanup**
- Led by EPA and the State
- Based on risk to humans and the environment
- Removals and remediation

**NRDA Restoration**
- Led by Trustee Council
- Addresses injuries over time
- Restoration to baseline and to compensate

NRDA restoration is coordinated with cleanup
NRDA Settlements

- Bankruptcy settlement with Plainwell Inc. and Plainwell Holding Co. in 2005: $890,000
- Bankruptcy settlement with Lyondell in 2009: $2M for Portage Creek and $1.38 M for entire site
- Proposed settlement with NCR Corporation in 2019: $27M
- Other settlements possible with other parties
## NCR Settlement Summary

Guiding Document for Restoration for Proposed NCR Settlement for NRDA

2016 Restoration Plan and Programmatic Environmental Impact Statement (RP/PEIS)

- Guides the Trustees in selection of potential restoration projects
- Notified the public that potential projects may be proposed in future Restoration Plan/Environmental Assessments (RP/EAs)
- Helps with coordination with proposed remedial actions

www.fws.gov/midwest/es/ec/nrda/KalamazooRiver
Restoration Planning Boundary

The Kalamazoo River Watershed
Project types that **will** be considered:

Projects in the Kalamazoo River watershed that benefit fish and wildlife will be considered. These may include (but are not limited to):

- Instream habitat restoration through adding natural structure and reducing channelization
- Stream bank restoration and increasing floodplain habitat areas
- Removing barriers to fish passage in streams from undersized culverts and dams
- Enhancing native plant species and controlling invasive species
- Preserving, enhancing, or restoring riparian and wetland habitats
- Restoring habitat that also benefits recreational uses like fishing, wildlife viewing, or others
Project types that will be considered:
Project types that **will** be considered:
Project types that **will not** be considered

• Projects located outside of the Kalamazoo River watershed

• Projects within the Kalamazoo River watershed that do not benefit injured resources

• Projects that do not restore natural ecosystem processes

• Projects that are solely focused on recreational uses and do not include ecological benefits

• Projects that are otherwise required by statute, regulation, court-order, or other regulatory requirements
General Project Screening Criteria

• Project complies with applicable and relevant federal, state, local, and tribal laws and regulations

• Project addresses resources injured by hazardous substances or services lost because of injuries in the watershed

• Project is technically feasible

Screening Criteria are Pass / Fail
Summary of Project Evaluation Criteria

- Project focuses on-site, in-kind benefits to priority trust resources
- Project benefits are measurable and likely from cost-effective, reliable methods
- Project is consistent with natural resource policies and regional planning
- Project considers completed or anticipated response actions
- Project provides large range of benefits to natural resources and diverse public over the long term

Based on types of injuries here, priority will be given to projects that:
- Improve aquatic and riparian habitat and habitat connectivity
- Benefit fish, birds, and fish-eating mammals
How to Effectively Propose a Restoration Project Idea
Getting to the Restoration Idea Portal

Suggest a Project - Kalamazoo River Hazardous Waste Site

Share Your Ideas

Do you have an idea for a specific restoration project in the Kalamazoo River watershed? The Natural Resource Trustees for the Kalamazoo River Superfund Site are interested in hearing from you. You can use the online portal below to provide the Trustees information about one or more projects you wish to have considered.

You can view the Trustees’ project evaluation criteria in the 2016 Restoration Plan and Programmatic Environmental Impact Statement (section 2.3). This page will be updated if there are any different criteria considered in the future. Other submission guidelines are listed below.

Restoration activities are complementary to cleanup, and will focus on restoring or enhancing ecological services in aquatic, riparian, and upland habitats. The Trustees’ goals are to restore and maintain the Kalamazoo River’s ecosystem similar to its structure and function before degradation by dams and pollution.

Your submission will be entered into our database and reviewed. Suggested projects will be evaluated by the Trustees for consideration in project-specific restoration plans that will be subject to public review and comment.

After you’ve successfully submitted your information, you’ll receive a confirmation number. Please keep that number for your records.

Attachments cannot be provided through the portal. If you would like to submit supplemental documents, please email them to kalamazooriver.nrda@noaa.gov. Be sure to reference your project’s name and confirmation number in your email.

Project Description

Provide adequate detail

B. Project Description

Project Title:
Swan Creek Dam Removal

Project Description:
Design and remove dam at 116th Street in Valley Township, to restore fish passage and natural river functionality. Located within Allegan State Game Area. Note: Need to work with Allegan County Road Commission to ensure integrity of road, which is a bridge that was constructed over the dam. Bridge may need to be replaced.

Note:
Only asking for a brief description of what the project consists of. Habitat types improved and other expected benefits will be entered on later screens.
Project Size and Location
You can “draw” on a map: point, line or polygon

Map Tips: Marker
1. Click on the map to place a marker
2. Once the marker has been placed, it can be dragged to another position
3. To place additional markers, select the tool again and repeat
Project Activities, Habitats, and Benefits

D. Project Activity(s)
Select All That Apply:
- Restoration
- Protection
- Debris Removal
- Land Acquisition
- Maintenance/Management
- Education

E. Project Habitat(s)
Select All That Apply:
- Upland
- Riverine
- Marine/Estuarine Wetlands
- Freshwater Wetlands
- Beach/Dune
- Subtidal (Nearshore/Offshore)

F. Resource Benefit(s)
Select All That Apply:
- Marine Mammals
- Birds
- Reptiles/Amphibians
- Fish
- Shellfish
- Terrestrial Wildlife
- Corals
- Vegetation
- Water Column
- Sediment/Benthos
- Shoreline
- Human Use (Recreational, Cultural)

Will the project directly benefit State- or Federally-listed species? If so, please list them.

Indiana and Northern Long Eared bats, Copperbelly Water snakes and Eastern Massasauga rattlesnakes.
Also, is it included in regional or statewide plans?

Kalamazoo River Watershed Assessment, 2005.
Funding and Partners

Identify possible partnerships

### H. Project Costs
- Estimated Cost: $1,500,000
- Funding Available: $0

### I. Project Partners
**Partner Organization:**
- Kalamazoo Valley Trout Unlimited

**Partner Contact:**
- Paul Tulgetske

**Partner Involvement:**
- possible small funder/habitat improvement labor

Review and Submit
Make sure your info is complete and accurate

A. General Information
- Organization: Michigan Department of Natural Resources
- Contact Name (First Last)*: Mills, Mark
- Title: Field Operations Manager
- Address: 621 N. 10th St.
- City: Plainwell
- State: Michigan
- Zip: 49080
- Phone Number: 269-204-7046
- Email*: millsrm@michigan.gov
- Organization Website: www.michigan.gov/dnr

B. Location Information
- Location (e.g. John Smith National Wildlife Refuge):
- State(s): MI
- County/Parish: Allegan County
- Watershed/Basin:
- Latitude (Decimal degrees):
- Longitude (Decimal degrees):
- Project Size (Acres):
View Accepted Projects

Inclusion on this list indicates project ideas have met posting guidelines and will be evaluated.
Do You Have a Project Idea?

➢ Talk to Trustee representatives about your ideas, get their feedback

➢ Submit or update previous submissions at any time in the portal

➢ To be considered – must be in the portal, but we can help you enter an idea if necessary
Tips for Submitting Project Ideas

- **DO** make sure your idea is consistent with evaluation criteria
- **DO** note your confirmation record so you can find your submission in the future
- **DO NOT** feel that you have to have a full-blown proposal
- **DO NOT** feel like you have to know how a project will be implemented or who will implement it
Project Selection

Trustees will:

• Provide public notice of initiation of next round of restoration planning

• Draft a focused restoration plan
  • Use project ideas
  • Evaluate with criteria
  • Propose projects to implement
  • Provide for 30 day public review & comment

• Finalize restoration plan
  • Select projects
Project Implementation

Trustees will fund projects using normal agency methods (e.g. contracts, grants)

Projects will need to include:

• Performance criteria
• Adaptive management plan
• Monitoring plan
• Reporting to Trustees
• Plan for long-term care of project
