Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Carol Karsner 8635 S 87th Ave Apt 202 Justice, IL 60458 karsnerbird@yahoo.com 7086577623

Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops it Land Protection Plan for the Kankakee Refuge. Sincerely, Mark Maroney 822 Thomas Ave Forest Park, IL 60130 markmaroney@earthlink.net 7087714241

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Robert Holdsworth 10601 Dorchester St Westchester, IL 60154 naturalbob67@gmail.com 7084471006

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible

to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible

to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Jeffrey Sanders 1577 Winnetka Rd Glenview, IL 60025 yellowstart5@yahoo.com 8476576431

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. Every aspect of this plan looks great from the initial overall scale and areas outlined. As a bird-watcher I have visited this area many times, traveling from up to an hour and a half to two hours away. In particular the area around Pembroke Township provides an amazing yet also delicate mix of bird species using both the natural areas and habitats created by the local community. Red-headed Woodpeckers nest and utilize many of the telephone poles as well as oaks for one example.

The area around Pembroke Township I believe as well as Momence have been designated by Audubon as Important Bird Areas for the state of Illinois - a project I helped collect data for. Pembroke was selected for its high number of Red-headed Woodpeckers and shrubland birds and other areas for shorebirds like American Golden-Plovers.

I work with the Bird Conservation Network which helps protect and promote conservation in the greater Chicagoland area. Scientists involved in our group including individuals from the Field Museum in Chicago, The Nature Conservancy, The Wetlands Initiative, and also Audubon - Chicago Region (now aka Audubon Great Lakes) would I'm sure be glad to help contribute data and information as desired as well as provide input on restoration focuses.

Again this is an excellent plan and well focused on some of the best areas for preserving in the region.

To whom it may concern;

As a family farm owner along the Kankakee river west of Momence, I appreciate the beauty and value the river provides but I am opposed to the current development plans due to the devastating impact upon the community economically and socially. In fact, it seems as if these plans are trying to fix a major wound by using a tiny bandage. As most of the environmental changes started/occurred in Indiana, it seems as if that's where the remediation should begin - starting with returning the river to it's meandering path from the current configuration as a relatively straight ditch. Granted, the lower water level caused by removing the limestone in the river by Momence may need to be dealt with as part of the overall solution but that probably isn't needed in the beginning of this extensive process.

Please address the major root issues in Indiana instead of going for the quicker and less productive fix that is currently being proposed in Illinois around Momence.

Respectfully,
Tim Dennis
