Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Janice Ehrenhaft 17525 N Breckenridge Ln Mount Vernon, IL 62864 cabincreeks@hotmail.com 1111111111

Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Webb Wells 122 Hawley St Grayslake, IL 60030 centaureauquariumproducts@email.com 8472231175

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Olivia Cacchione 6954 N Greenview Ave Apt 208 Chicago, IL 60626 olivia.cacchione@gmail.com 2066048277

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible

to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible

to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Maggie Testore 314 S Humphrey Ave Oak Park, IL 60302 m.testore@comcast.net 7084345141

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. Planning

Subject: Comments on Draft Plan for the Kankakee National Wildlife Refuge

As landowners along the Kankakee River near Wilmington, we have personally seen the impacts of erosion on the river. Only in recent years have we noticed sand that has been carried from points upstream being deposited on our section of riverbank. That is why we feel the formation of the Kankakee Wildlife Refuge and Conservation Area is a necessary move to preserve and restore natural areas in the Kankakee River basin.

We believe that the map provided on the USF&WS website appears to delineate many of important natural areas with the potential for expanding on them to minimize fragmentation and to establish corridors for wildlife. Protecting the oak savanna communities within the planning area is another important component of the overall plan in that it will maintain the complex ecosystem that supports endemic plants and animals.

Thank you for the opportunity to comment.
