Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Emma Reeser 555 N. Sheridan Rd. Lake Forest, IL 60045 reeseret@mx.lakeforest.edu 8473456527

Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Gerard Bauer 739 Lill St Barrington, IL 60010 gmbauer@sbcglobal.net 8473823147

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Margaret Winker Cook 1173 Asbury Ave Winnetka, IL 60093 margaretwinker@gmail.com 2242069302

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible

to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible

to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Paul Wnek 4101 N Pontiac Ave Chicago, IL 60634 pwnek@sbcglobal.net 7735891216

Kankakee County Farm Bureau Opposes USFWS Refuge

Chad Miller <user@votervoice.net>

Subject: Kankakee County Farm Bureau Opposes USFWS Refuge

Dear U.S. FWS Holler, Thank you for the invitation to share our concerns relating to the US Fish & Wildlife Service refuge proposed in Kankakee County. Our community's concerns are many. We have concerns with the process of how the refuge has been officially established without an updated Environmental Assessment (EA) study. The EA is over 17 years old and there have been many changes over that period of time which warrant a new EA. There have been changes in population, changes in residential areas, changes in agriculture practices and land use, changes in land values, changes to our environment, and changes in the terminology and technology used in such an evaluation which all warrant an updated Environmental Assessment. We have concerns that there is not a Land Protection Plan (LPP) available for public review which was supposed to be issued in Fall of 2015. The LPP is supposed to give detail on how the lands in the focus area are to be managed. In other words, the LPP would give details on what the US Fish & Wildlife Service plans to do with each landowner's property. According to information from the US Fish & Wildlife Service there hasn't been a lead planner working on the LPP. In the meantime, the refuge has already officially established in May of 2016 and held a dedication ceremony on October 15, 2016. We are concerned that there has been no mechanism for public input at that time. The 1990s proposal included large areas in Indiana. The focus areas this time do not include any areas in Indiana. Why is that? We have concerns for where the funding will come from for the refuge. We are uncomfortable that the federal government desires to manage our community's natural resources. Our local community, better than anyone else, appreciates and has been great stewards of our precious natural resources. Furthermore, with limited public funds, aren't there greater public needs? Farmland that is taken out of production will cause a significant loss to our local economy. The size of the focus area in Kankakee County is 18,000 acres which is equal to 4.15% of our County's total land. In one year, agriculture in Kankakee County produces over \$1.504 billion in economic output (USDA Ag Census data). Of the 18,000 acres for the refuge in Kankakee County, 2.9% of that is farm land. 2.9% of \$1.504 billion is over \$43.6 million. That means Kankakee County will lose over \$43.6 million in economic output from agriculture annually. That also translates into a loss of 124 jobs annually. There is no way any economic development or tourism related to a refuge could make up that annual loss to our local economy. And, without an LPP, we have no idea what areas of the refuge would be publicly accessible. The refuge will impact drainage in the Kankakee River watershed which will affect residential areas and farmland within the refuge focus areas and the impact could extend for miles outside of the focus areas. The Kankakee River watershed is very large and cutting off drainage to the Kankakee River

will have a big impact on flooding and established drainage. It is unrealistic to assume that water tables can be manipulated to flood land without negatively impacting adjacent residential and farm land. Farmland is a finite and diminishing resource. It is irreplaceable and deserves equal standing and protection. There is a concern for the loss of recreational access to the Kankakee River. There is a large amount of sand and sediment coming from Indiana depositing in the Illinois side of the Kankakee River. With a refuge established, there would be no way to gain access the river to remove the sand and sediment that is building up which is causing environmental damage and further flooding and water management issues as well as decreasing recreational activities. Land held by US Fish & Wildlife Service is taken off the property tax rolls which would have a dramatic impact on our community. There are Refuge Revenue Sharing payments to compensate for the loss of property tax revenue. These refuge revenue sharing payments would be $\frac{3}{4}$ of 1% of the assessed value of the property. This would be pennies on the dollar compared to the usual property taxes, and those refuge revenue sharing payments are not guaranteed. The focus area east of the City of Momence would cause great losses. The focus area in Pembroke Township would consume 38% of that township making a tremendous impact on their property tax revenue as well. This loss in property tax revenue to our local schools and governments could make these communities unsustainable. An additional concern is that any infrastructure or transportation improvements near an established refuge would be almost impossible to carry out. The US Department of Transportation Act of 1966 (49 USCS, 303, Section 4f) provides that approval of public works projects near a water fowl refuge be given only if there is no feasible alternative - that also includes all possible planning to minimize impact to the refuge. The planning efforts alone are exhaustive and often exceed a local government's limited financial resources. Frequently, there are court challenges posed by groups attempting to stop such public works and these proceedings are lengthy and difficult to litigate. As a result, local governments often avoid moving projects forward foregoing transportation needs and the accompanying collateral benefits of job creation. U.S. Representative Robin Kelly understands these concerns with the refuge and issued a letter on October 28, 2016 stating her decision to not support the refuge. In observation of the above concerns, on November 9, 2016, the Kankakee County Board voted 20 to 0 to reaffirm their opposition to the refuge. A unanimous vote by the Kankakee County Board speaks loudly that our community and our local stakeholders do not want this refuge. Again, thank you for the opportunity to submit these concerns for your consideration. Please let us know if you have any questions on this information or if there is anything further you would like from us. Sincerely, Keith Mussman, President Kankakee County Farm Bureau Sincerely, Chad Miller 1605 W Court St Kankakee, IL 60901 kankfb@sbcglobal.net
