Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Judy Teibloom-Mishkin 9222 Ridgeway Ave Evanston, IL 60203 judytm@comcast.net 8476510071

Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Linda Elsner 3802 Anne St McHenry, IL 60050 ljelsner@yahoo.com 8153442536

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Terrence Ward 14530 Kildare Ave Midlothian, IL 60445 janvisual@aol.com 7083961638

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible

to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars. The map's emphasis on connecting existing conservation lands with the Refuge is logical. Connecting these conservation areas will provide more habitat for migratory birds and other animals. I support conserving rare black oak savannas and other habitats on the map that support threatened and endangered species. We must preserve these habitats and species for future generations. While private owners can certainly preserve habitat and steward land, I value publicly-owned land that is accessible

to all. I encourage the Service to highlight on the map that land will only be bought from willing sellers, and that the public will have access to Refuge land. Also, as funds allow, I feel the Service should build and staff a Kankakee National Wildlife Refuge and Conservation Area Welcome Center so visitors can access restrooms and water. I encourage the Service to continue meeting with the local community that will be impacted by the Refuge. I believe that the Service and local communities can work together towards the goal of protecting both the environment and the community's interests. I encourage the Service to work with the community so that any eco-tourists are aware of locally-owned businesses that would welcome more customers. Thank you for this opportunity to provide input as the USFWS develops its Land Protection Plan for the Kankakee Refuge. Sincerely, Julie Winsberg 1901 Grant St Rear Coachhouse Evanston, IL 60201 juliebw@gmail.com 8474750000

Dear Jeanne Holler, Dear U.S. Fish and Wildlife Service, Thank you for the opportunity to comment on the Conservation Opportunities Map for the Kankakee National Wildlife Refuge and Conservation Area. I support the establishment and expansion of the Kankakee National Wildlife Refuge and Conservation Area through the purchase of land from willing sellers because publicly-owned natural areas allow all people to enjoy nature and engage in outdoor recreation. I agree with the Conservation Map's emphasis on conserving wetlands and forested bottomlands. Wetlands provide vital services to our planet by filtering water and reducing flooding. If the Service can convert marginal farmland into a rich wetland through buying land from willing sellers, I believe that is a good use of tax dollars.
