(7) *Facilities that meet the LSC definition of a health care occupancy.*

(i) After consideration of State survey agency recommendations, CMS may waive, for appropriate periods, specific provisions of the Life Safety Code if the following requirements are met:

(A) The waiver would not adversely affect the health and safety of the clients.

(B) Rigid application of specific provisions would result in an unreasonable hardship for the facility.

(ii) Notwithstanding any provisions of the 2000 edition of the Life Safety Code to the contrary, a facility may install alcohol-based hand rub dispensers if—

(A) Use of alcohol-based hand rub dispensers does not conflict with any State or local codes that prohibit or otherwise restrict the placement of alcohol-based hand rub dispensers in health care facilities;

(B) The dispensers are installed in a manner that minimizes leaks and spills that could lead to falls;

(C) The dispensers are installed in a manner that adequately protects against access by vulnerable populations; and

(D) The dispensers are installed in accordance with chapter 18.3.2.7 or chapter 19.3.2.7 of the 2000 edition of the Life Safety Code, as amended by NFPA Temporary Interim Amendment 00–1(101), issued by the Standards Council of the National Fire Protection Association on April 15, 2004. 50 CFR Part 17

RIN 1018–AI20

Endangered and Threatened Wildlife and Plants; Final Designation of Critical Habitat for Topeka Shiner

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; correction.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce corrections to the final rule designating critical habitat for the Topeka shiner (*Notropis topeka*), published in the **Federal Register** on July 27, 2004. In the final rule, the map legends incorrectly referred to stream segments as “proposed” critical habitat rather than “designated” critical habitat, and six transcription errors were included in legal descriptions of critical habitat from Unit 1 (Iowa) and Unit 4 (Minnesota). This document corrects these errors.

DATES: Effective August 26, 2004.

FOR FURTHER INFORMATION CONTACT:

Vernon Tabor, Kansas Ecological Services Field Office, 315 Houston Street, Suite E, Manhattan, Kansas 66502 (telephone 785–539–3474; facsimile 785–539–8567). The complete file for this correction document and the rule are available for public inspection, by appointment, during normal business hours at the above address. Copies of the rule, draft economic analysis, and draft environmental assessment are available by writing to the above address or by connecting to the Service

Internet Web site at <http://mountain-prairie.fws.gov/topekashiner/ch>.

SUPPLEMENTARY INFORMATION: On July 27, 2004, we published a final rule designating critical habitat for the Topeka shiner (*Notropis topeka*), a species of fish native to small streams in the Central Plains Region (69 FR 44736). The map legends on the five maps included in the final rule incorrectly referred to “proposed critical habitat” rather than “designated critical habitat” and “not proposed as critical habitat” rather than “not designated as critical habitat.” In addition, the final rule included six transcription errors in legal descriptions of critical habitat from Unit 1 (North Raccoon River Watershed, Iowa) and Unit 4 (Big Sioux River/Rock Rivers Watershed, Minnesota). Finally, Map 4 had one typographical error in the title. We are providing corrected maps and corrected legal coordinates for the description of designated critical habitat for Topeka shiner.

In the final rule, we designated as critical habitat a total of 83 stream segments, representing 1,356 kilometers (836 miles) of stream in the States of

Iowa, Minnesota, and Nebraska. We excluded from designation all previously proposed critical habitat in the States of Kansas, Missouri, and South Dakota under authority of sections 3(5)(A) and 4(b)(2) of the Endangered Species Act (Act), and excluded critical habitat from designation on the Fort Riley Military Installation in Kansas under authority of section 4(a)(3) of the Act. The number of stream segments and length of stream channel designated as critical habitat do not change with this correction document, nor do the exclusions provided by the final rule.
