Bony Tail	6824	64.9	~60	105.12
Razorback Sucker	7400	14.4	~100	512.28

Outside				
Species	Number	Fish/Kg	Length (MM)	Weight (Kg)
Bony Tail fry	~10,000	unk	~60	~100
Bony Tail	0	0	0	0
Razorback Sucker	5752	unk	>300	unk

## September activities:

Stocking Razorbacks to the green River

Razorbacks swimming up stream closes our stocking season.

New wet well pump arrived

This new pump will help ensure our water supply is up to our demands.

Our old alarm systems tellular unit analog cell phone died and as it turns out our Sentinel was to old to communicate with modern equipment.

## New Sentinel installed

## October activities:

October saw YOY and age 1 RZ graded and sorted into 8 foot tanks and feeding regiment started. Hatchery projects restarted ie installing new Pump VFD in mechanical room. The pond liner/kettel modification project is wrapping up as well as final resealing of expansion joints in the kettles/prepping for winter.

## **Future activities**

Inside Birm filters still on hold awaiting new backflush valve bodies.

In November our new wet well pump will be installed. Luke Runyon from KUNC in fort Collins CO to tour the hatchery with the Upper Colorado River Recovery program (Tildon Jones) for a story on Bony tail.
