SOUTHWEST NEVADA WORKGROUP

of the

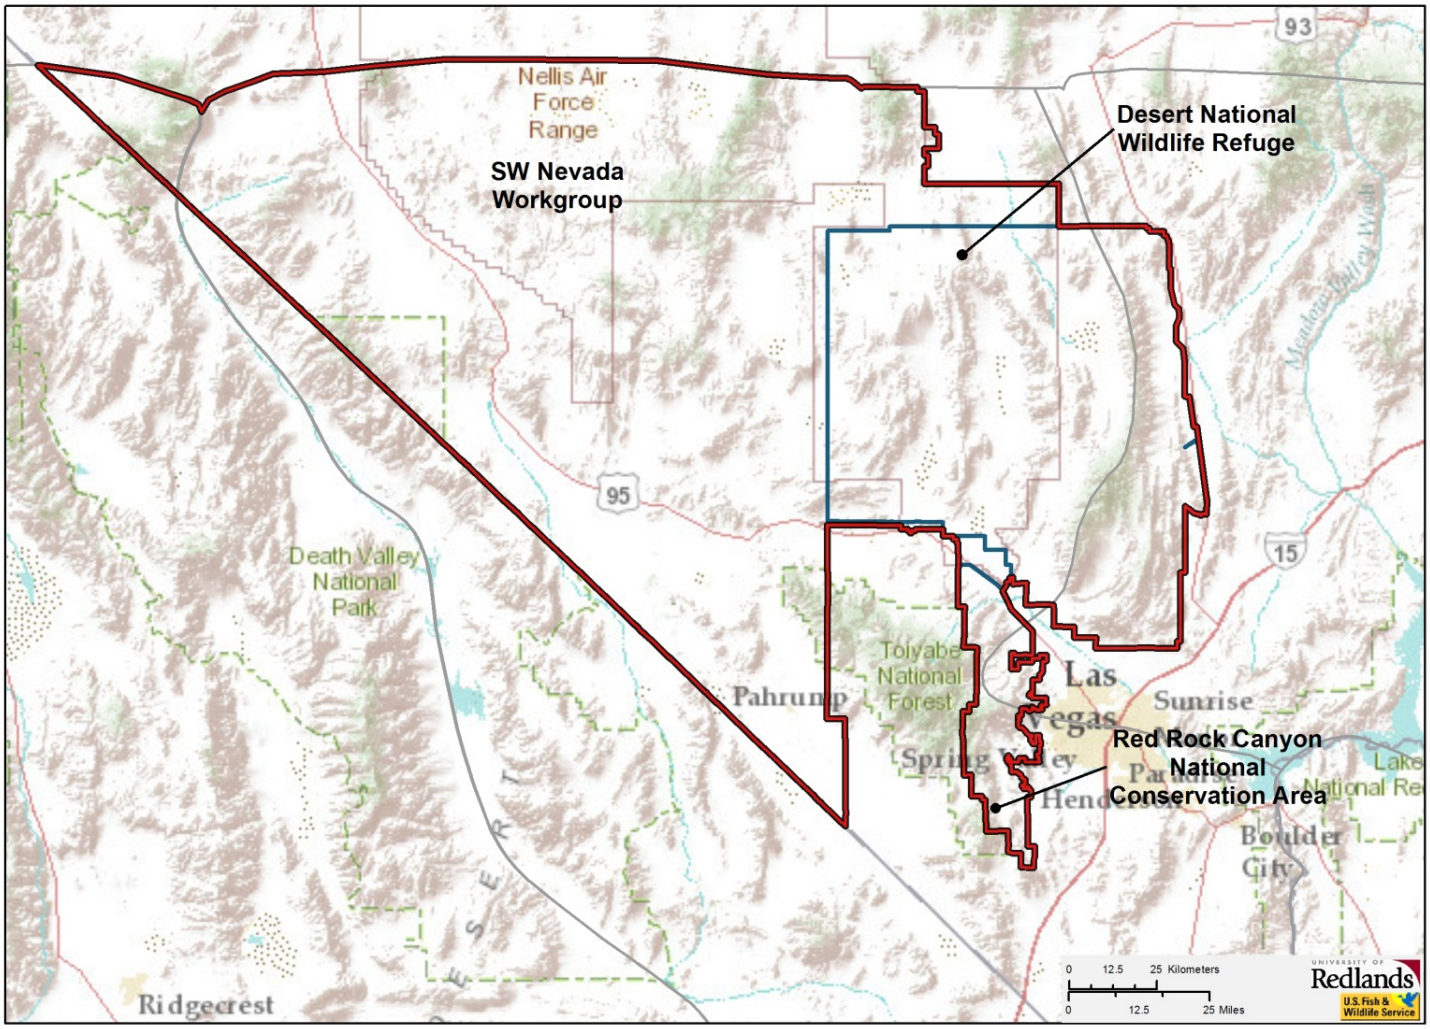
NORTH-EAST MOJAVE

RECOVERY IMPLEMENTATION TEAM

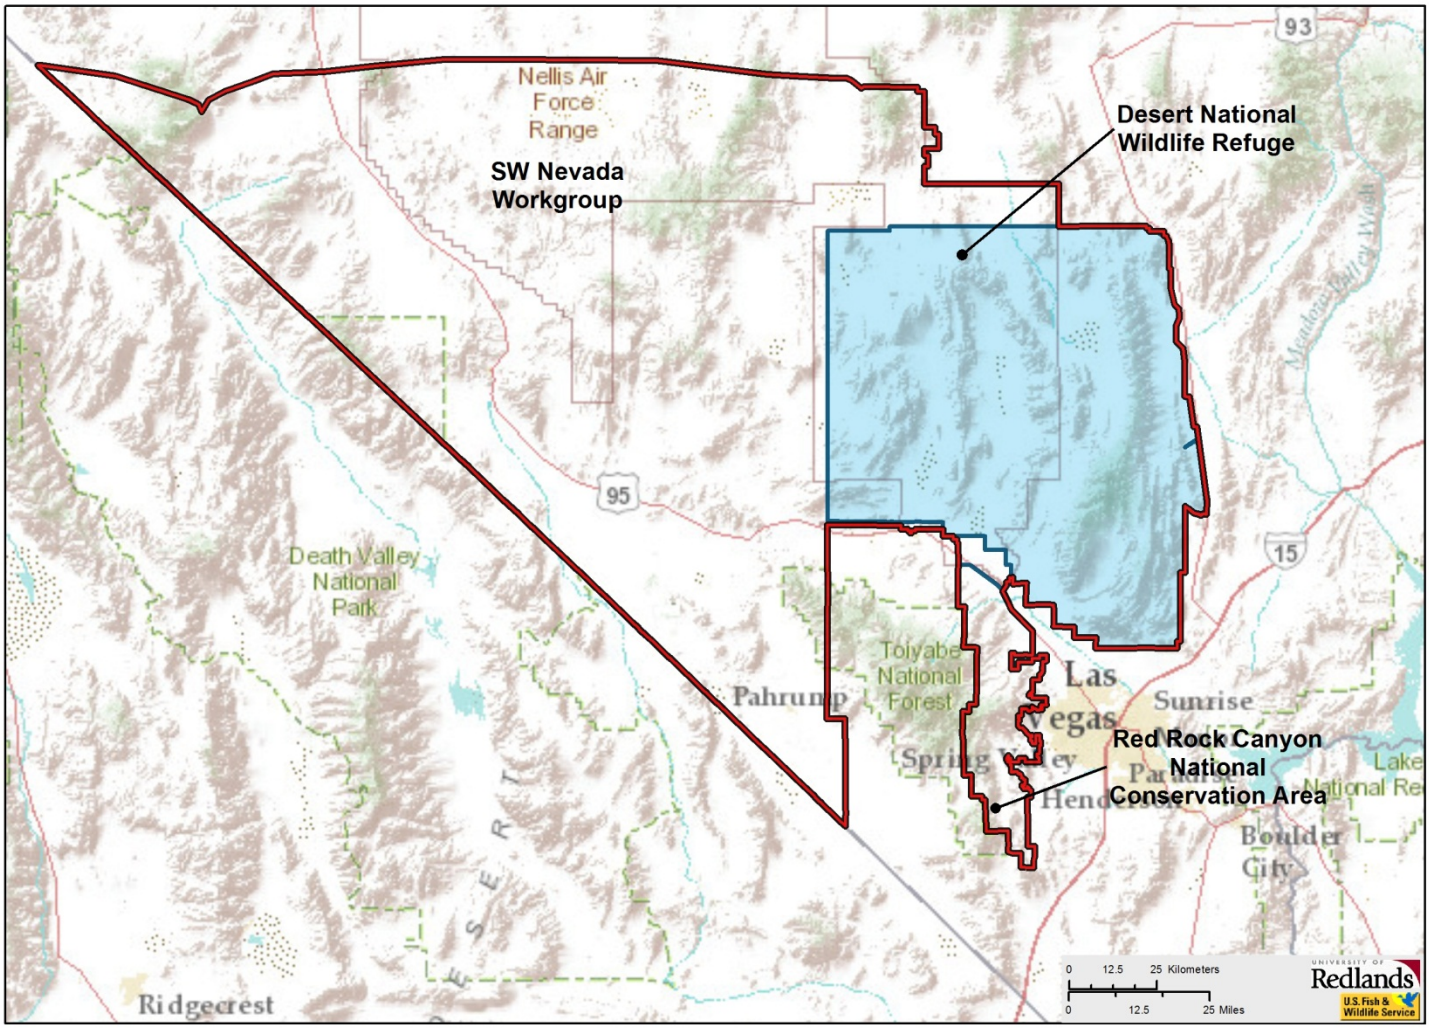
Recovery Action Plan: Online Appendix

Background & Supporting Information from the Spatial Decision Support System:

March 2013

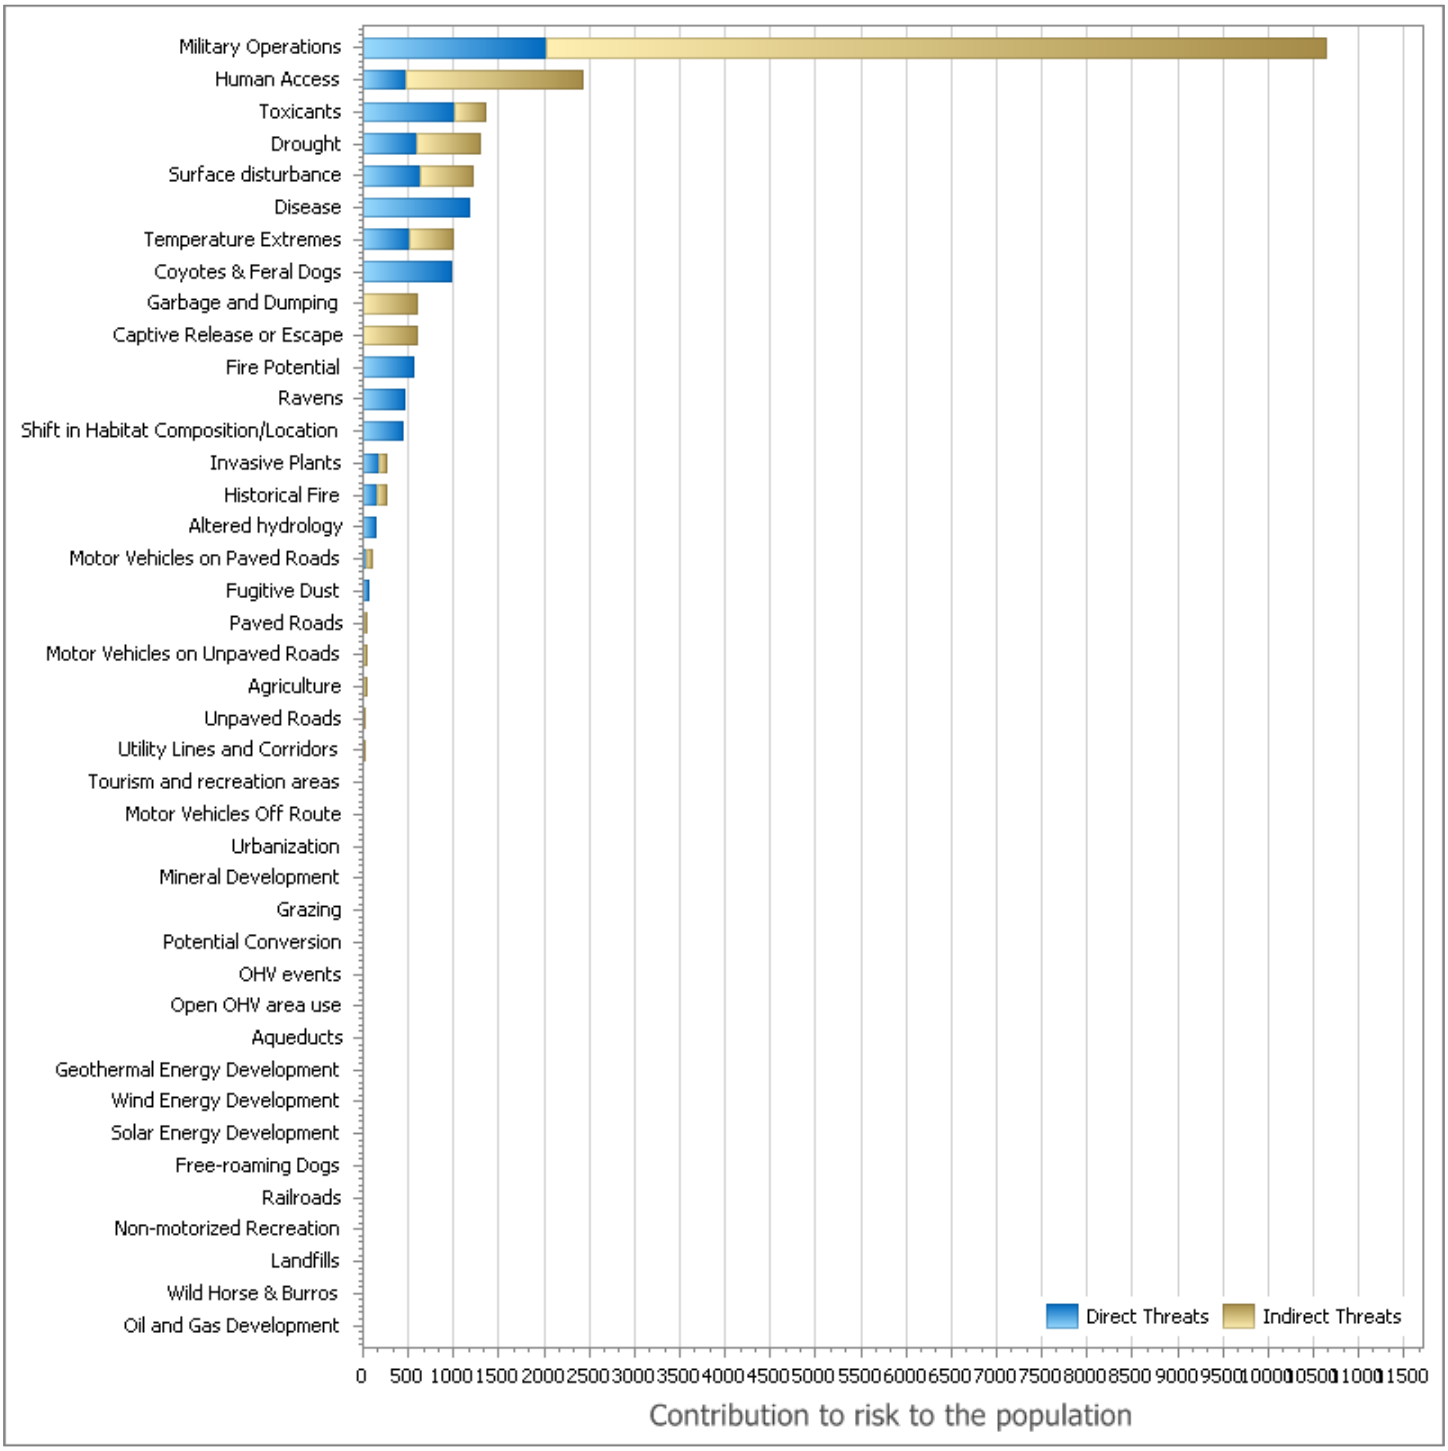


Desert National Wildlife Refuge



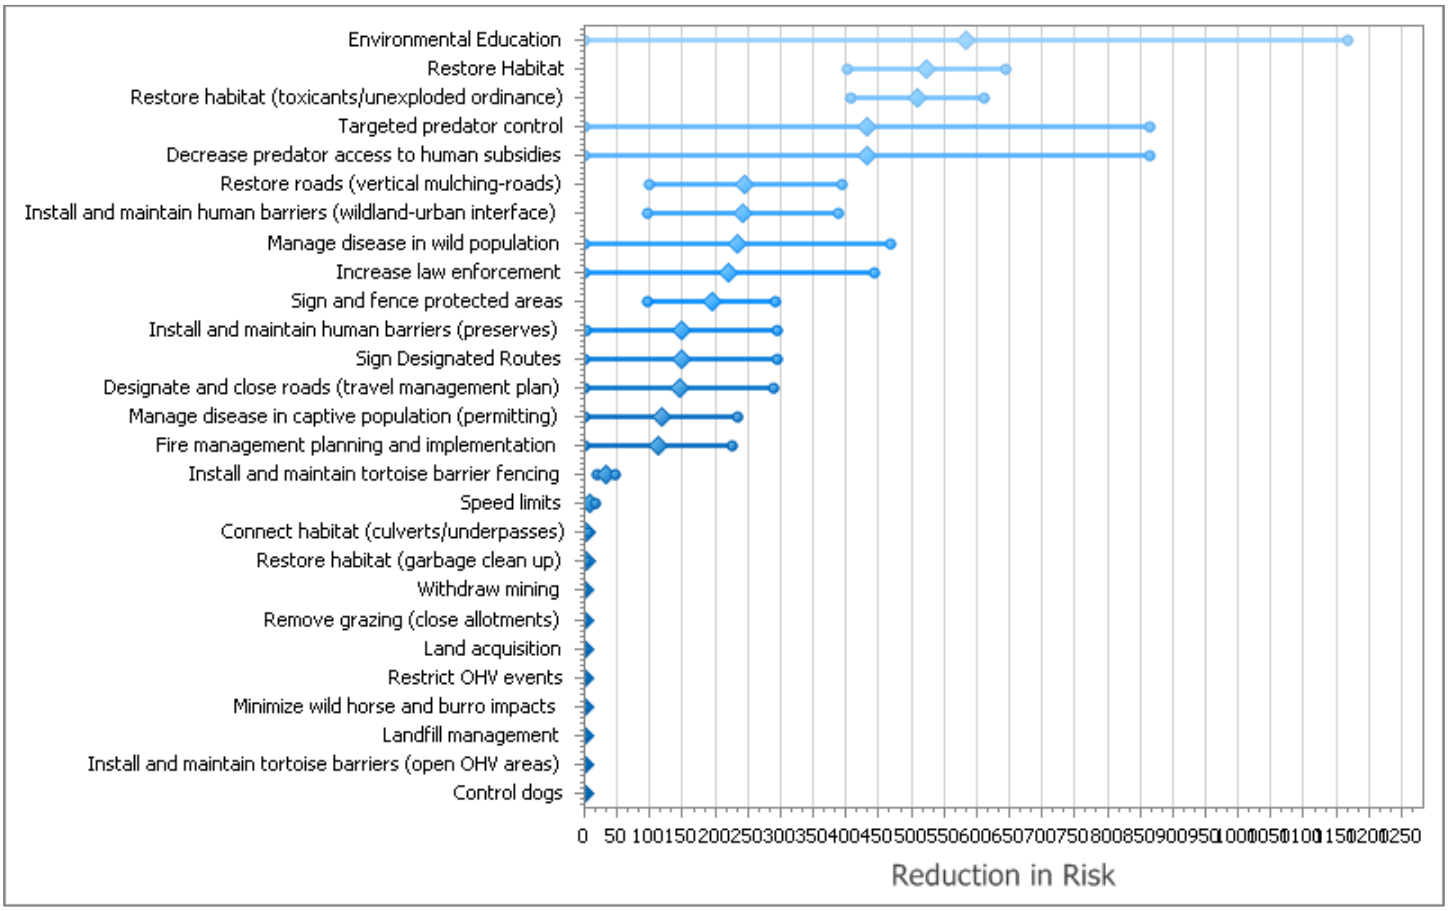
Threat Ranking for the Desert National Wildlife Refuge

The direct and indirect effects of each potential threat to an increase in risk to the Mojave desert tortoise in Desert National Wildlife Refuge. Threats are ranked based on their overall contribution to risk. These outputs come directly from the spatial decision support system.

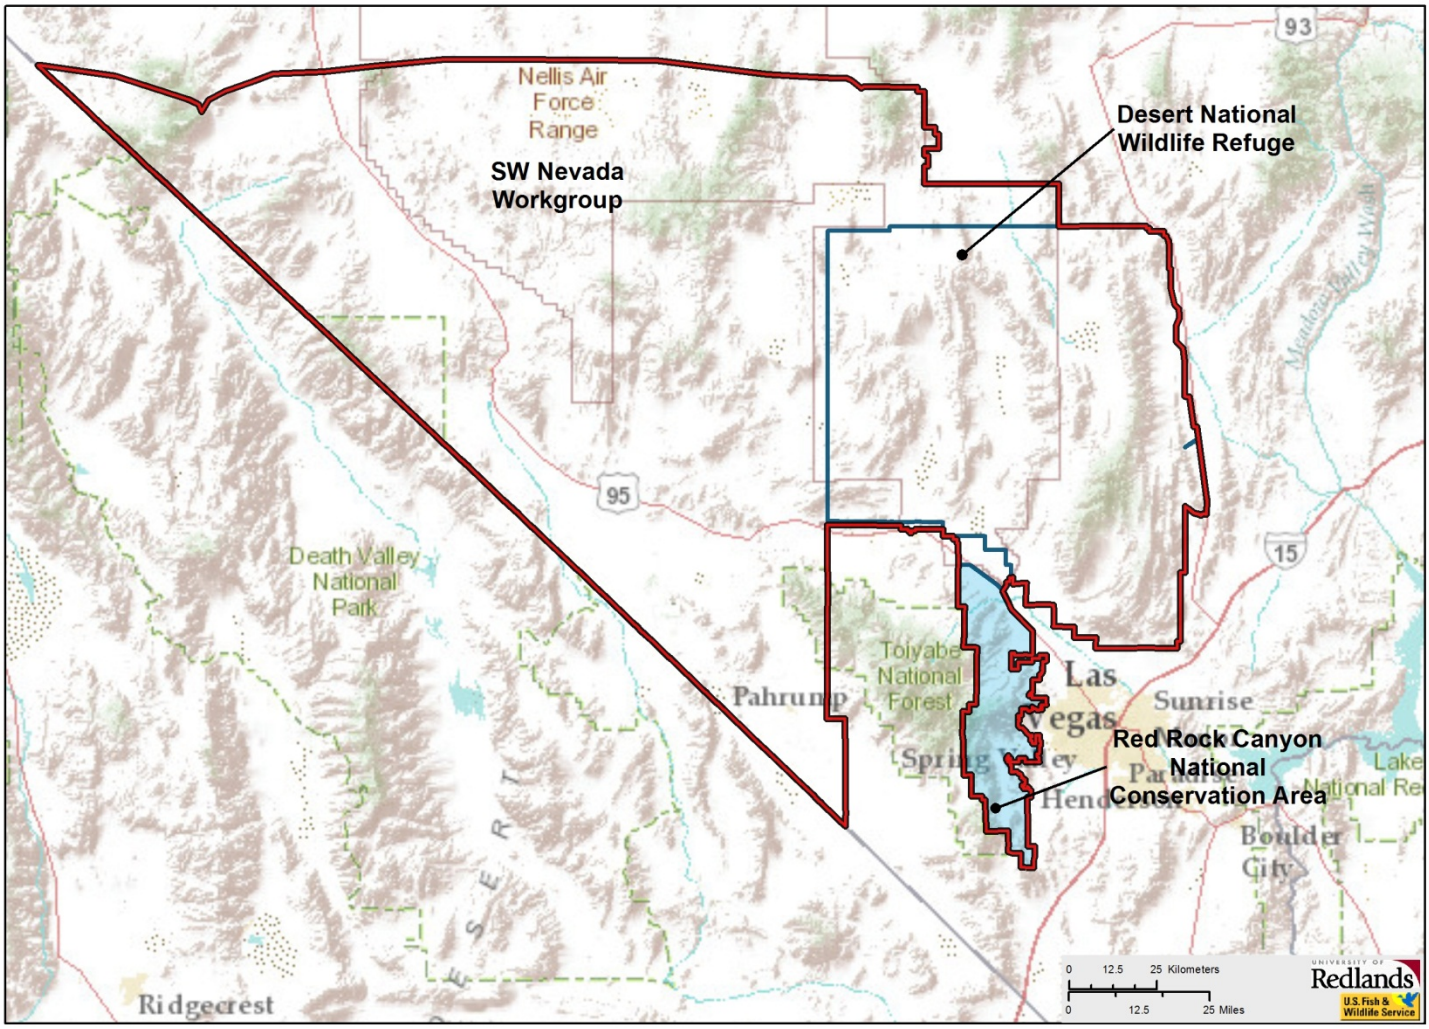


Recovery Action Ranking for the Desert National Wildlife Refuge

Recovery action types are ranked based on their overall contribution to decreasing risk to the tortoise in Desert National Wildlife Refuge. Center symbols of each bar indicate the average estimated effectiveness, and endpoints indicate potential high and low estimated effectiveness for each action type. These outputs come directly from the spatial decision support system.



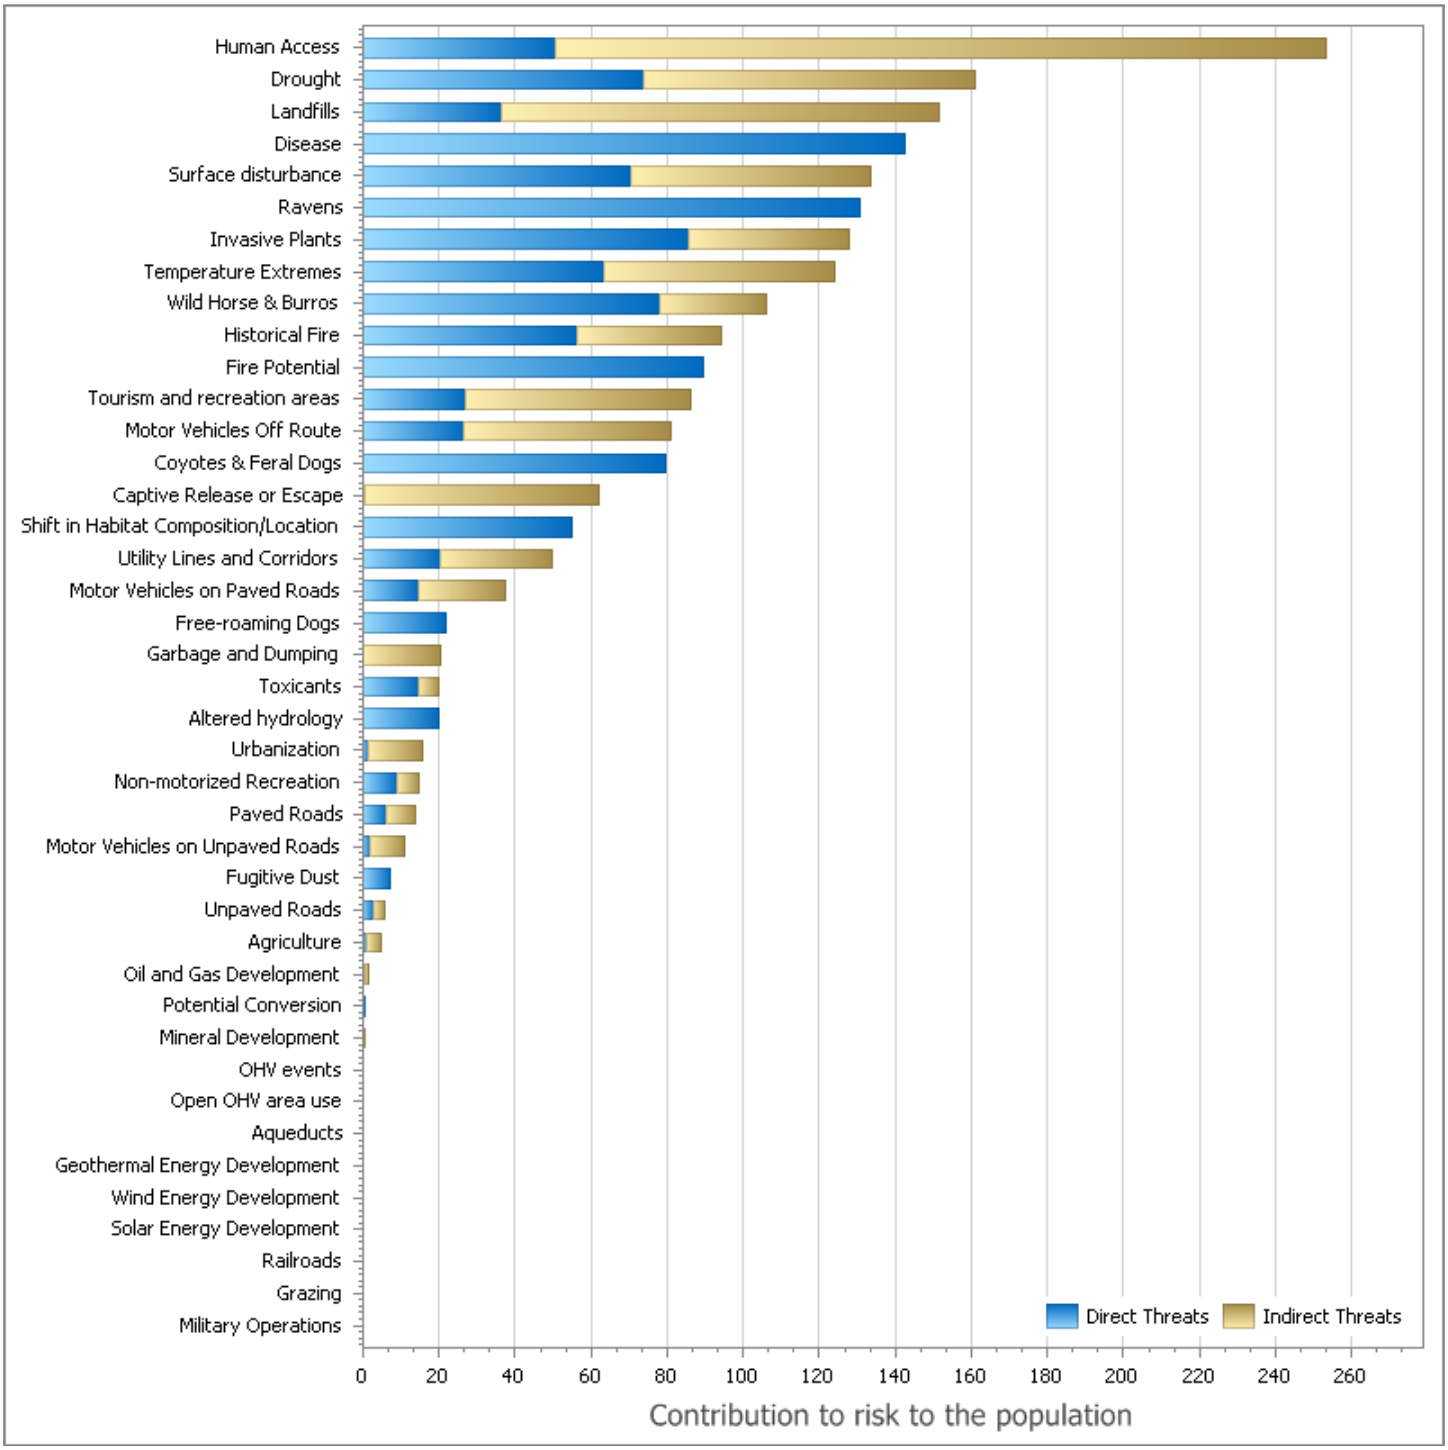
Red Rock Canyon National Conservation Area (NCA)



Threat Ranking for Red Rock Canyon NCA

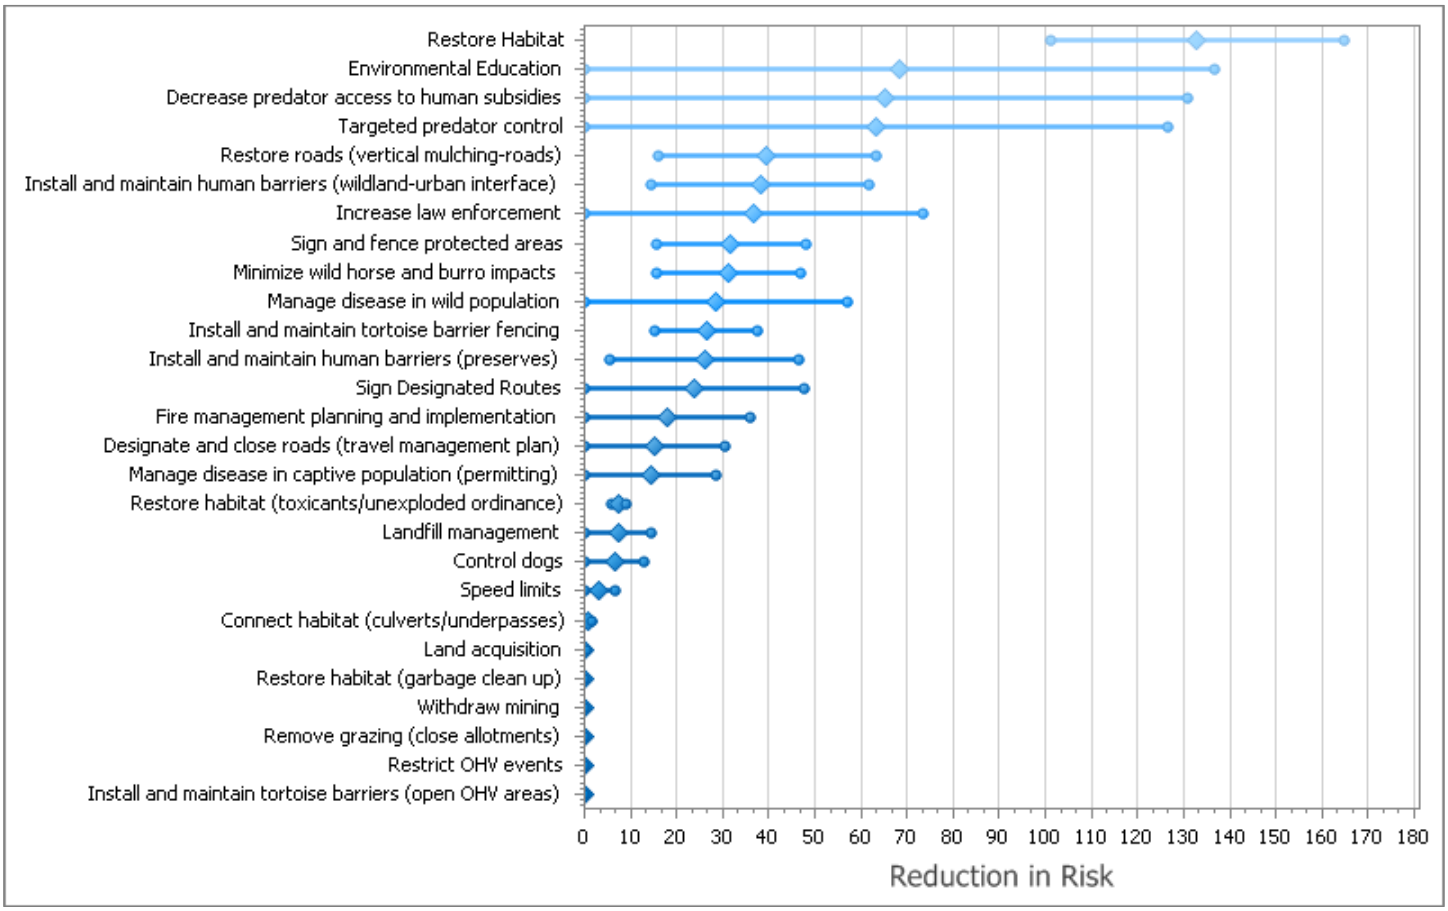
The direct and indirect effects of each potential threat to an increase in risk to the Red Rock Canyon NCA. Threats are ranked based on their overall contribution to risk. These outputs come directly from the spatial decision support system

.

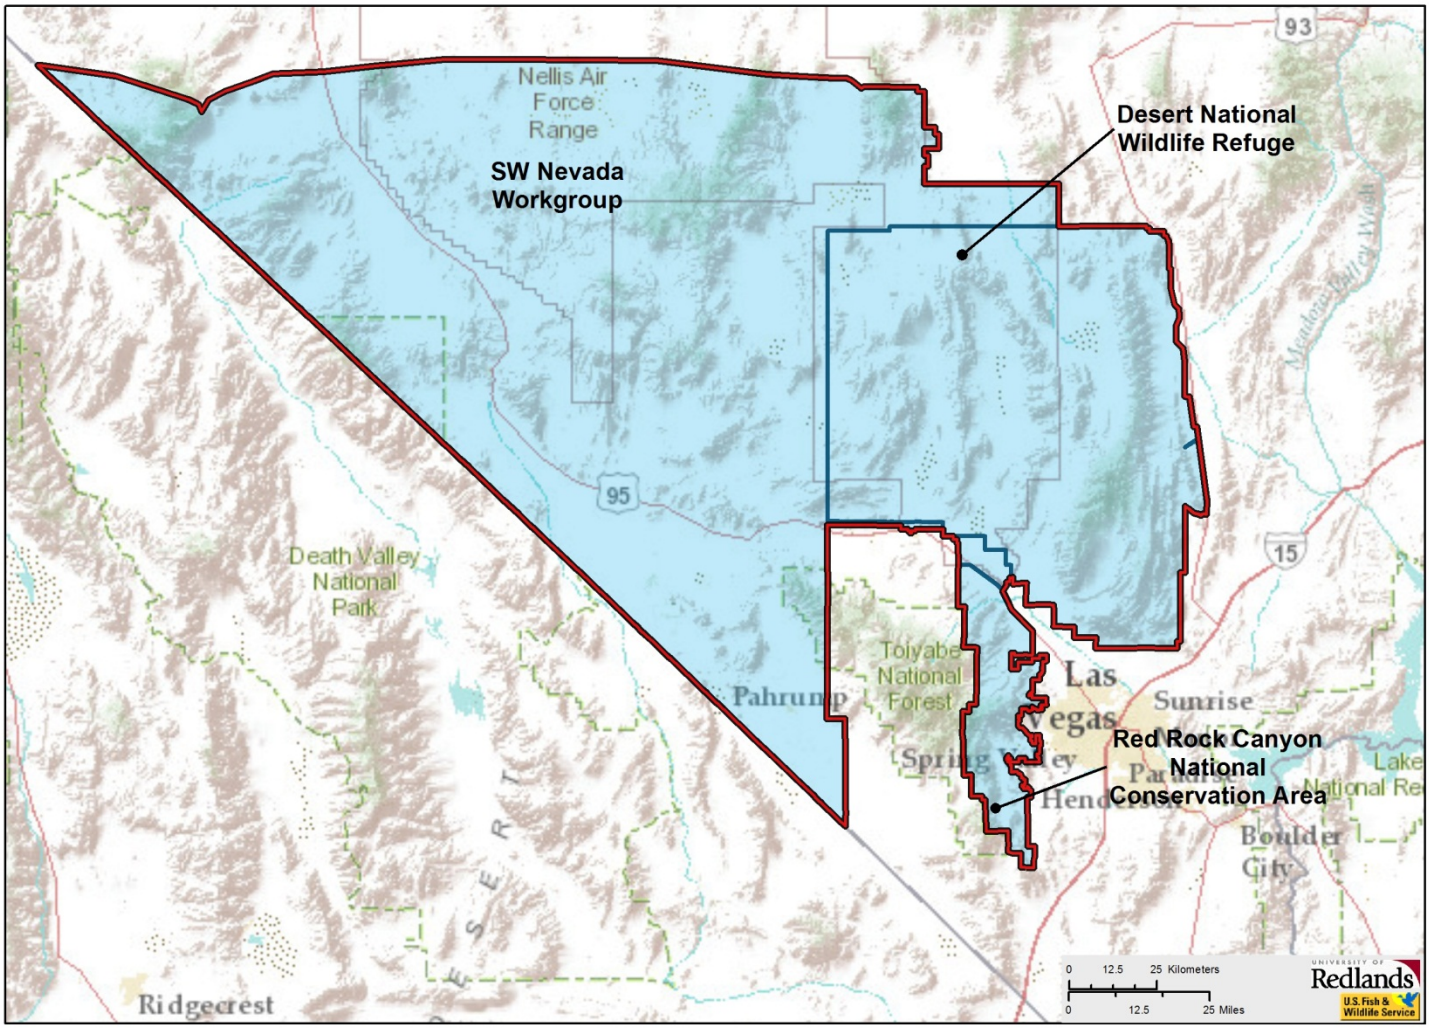


Recovery Action Ranking for Red Rock Canyon NCA

Recovery action types are ranked based on their overall contribution to decreasing risk to the tortoise in Red Rock Canyon NCA. Center symbols of each bar indicate the average estimated effectiveness, and endpoints indicate potential high and low estimated effectiveness for each action type. These outputs come directly from the spatial decision support system.

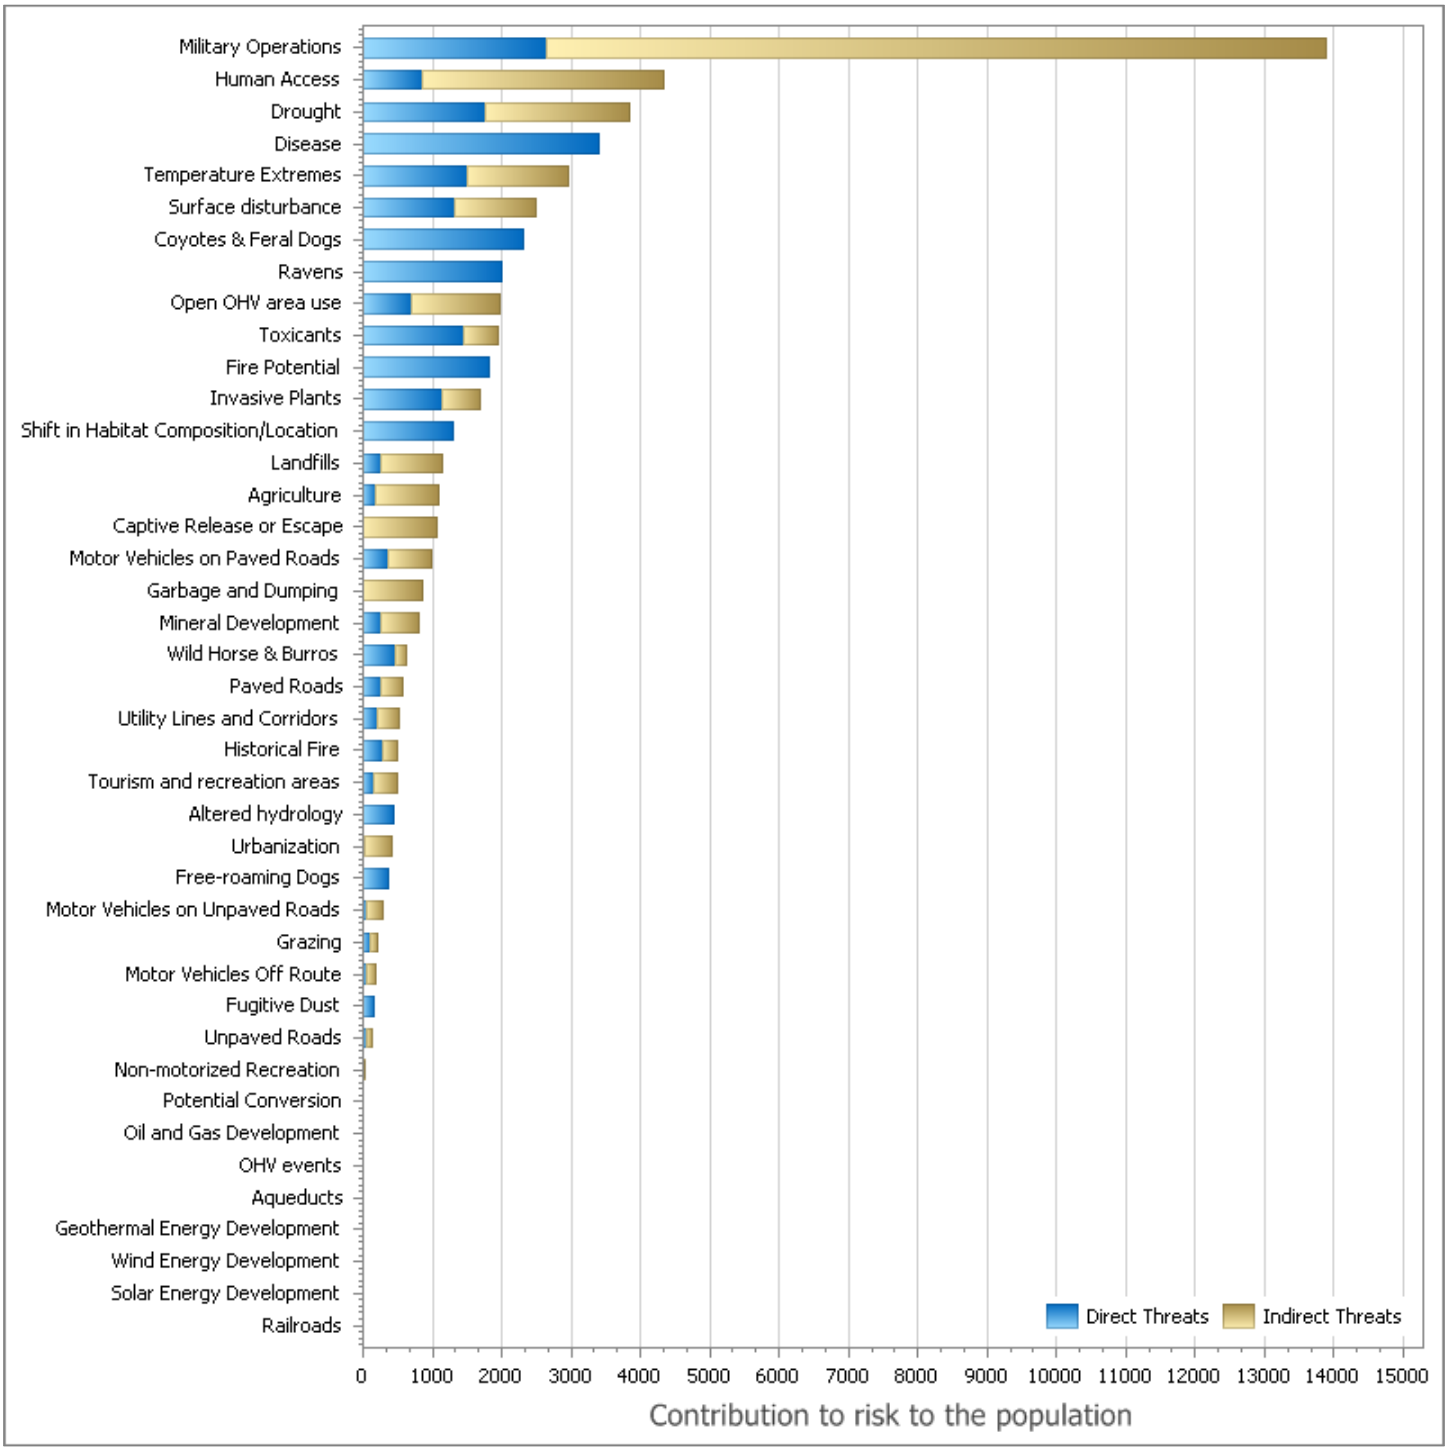


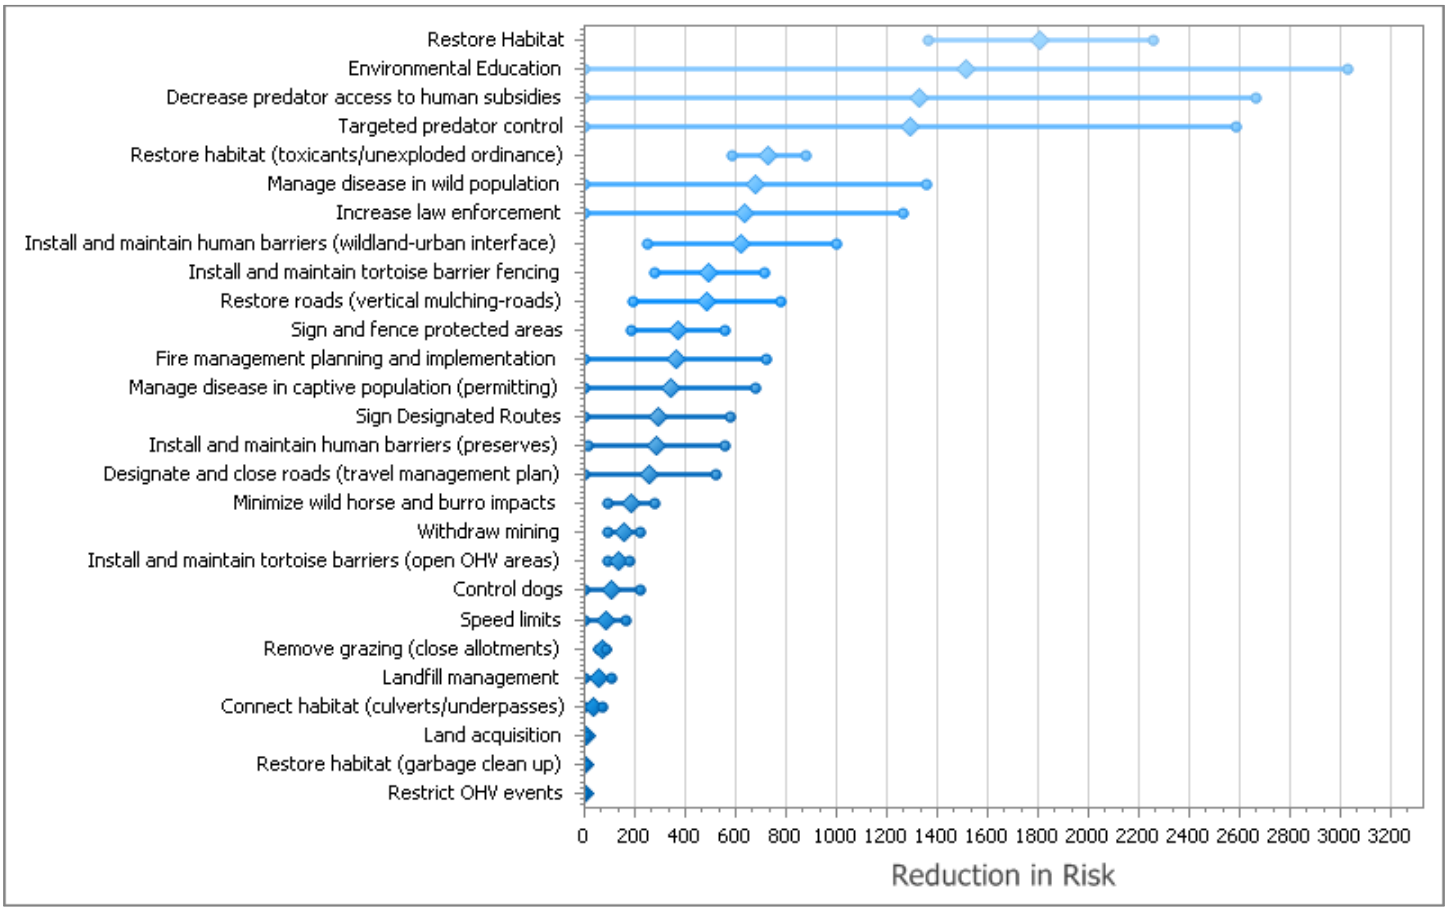
Southwest Nevada Workgroup Area



Threat Ranking for the Southwest Nevada Workgroup Area

The direct and indirect effects of each potential threat to an increase in risk to the Mojave desert tortoise in Southwest Nevada workgroup area. Threats are ranked based on their overall contribution to risk. These outputs come directly from the spatial decision support system.



Recovery Action Ranking for the Southwest Nevada Workgroup Area


Recovery action types are ranked based on their overall contribution to decreasing risk to the tortoise in Southwest Nevada workgroup area. Center symbols of each bar indicate the average estimated effectiveness, and endpoints indicate potential high and low estimated effectiveness for each action type. These outputs come directly from the spatial decision support system.
