## **U.S. Fish & Wildlife Service Extends Public Comment Period**

**Southern Nevada...** The U. S. Fish & Wildlife Service is extending the public scoping period to receive comments on an Environmental Impact Statement (EIS) the Service will be preparing to evaluate a Multiple Species Habitat Conservation Plan for Coyote Springs Investments LLC (CSI) in Lincoln County, Nevada until December 4, 2006.

According to Bob Williams, Field Supervisor for the Service's Nevada Fish and Wildlife Office, an erroneous email address was included in the original request for comments published in the *Federal Register* on September 12, 2006. "We want to ensure that anyone wishing to make comments has the opportunity to do so," said Williams, "and are extending the comment period an additional 30 days."

The Service is preparing the EIS to evaluate the Multiple Species Habitat Conservation Plan that will identify measures to minimize and mitigate incidental take of Threatened or Endangered species protected by the Endangered Species Act that could occur as a result of CSI's planned development. The proposed project area will include approximately 13,800 acres of land leased from the Bureau of Land Management in Lincoln and Clark Counties and approximately 22,140 acres of developable private land in Lincoln County.

The Service is asking the public to identify important issues and alternatives related to the proposed actions. Alternatives that may be considered in the EIS include: variations in the scope of the proposed activities; variations in the location, amount, and types of conservation measure; variations in activity duration; or, a combination of these elements. In addition, the EIS will identify potentially significant direct, indirect, and cumulative impacts on biological resources, land use, air quality, water quality, water resources, socioeconomic conditions, and other environmental issues that could occur with the implementation of the proposed action and alternatives.

Written should be submitted to Robert D. Williams, Field Supervisor, U. S. Fish & Wildlife Service, 1340 Financial Blvd., Suite 234, Reno, Nevada, 89502. More information on the proposed action can be found at the following web site [www.fws.gov/nevada](http://www.fws.gov/nevada), or by calling (775-861-6300).

-More-

The U.S. Fish and Wildlife Service is the principal Federal agency responsible for conserving, protecting and enhancing fish, wildlife and plants and their habitats for the continuing benefit of the American people. The Service manages the 95-million-acre National Wildlife Refuge System, which encompasses 545 national wildlife refuges, thousands of small wetlands and other special management areas. It also operates 69 national fish hatcheries, 64 fishery resources offices and 81 ecological services field stations. The agency enforces federal wildlife laws, administers the Endangered Species Act, manages migratory bird populations, restores nationally significant fisheries, conserves and restores wildlife habitat such as wetlands, and helps foreign and Native American tribal governments with their conservation efforts. It also oversees the Federal Assistance program, which distributes hundreds of millions of dollars in excise taxes on fishing and hunting equipment to state fish and wildlife agencies.
