SUPPLEMENTARY INFORMATION:

Background

On October 28, 2013, we published a proposed rule to list the bi-State DPS as a threatened species under the Endangered Species Act of 1973, as amended (Act) (78 FR 64358). We concurrently published a proposed rule to designate critical habitat (78 FR 64328). We received requests to extend the public comment periods on the proposed rules beyond the December 27, 2013, due date. In order to ensure that the public has an adequate opportunity to review and comment on our proposed rules, we are extending the comment periods for an additional 45 days.

Information Requested

We intend that any final action resulting from these proposed rules will be based on the best scientific and commercial data available and be as accurate and as effective as possible. Therefore, we request comments or information from other concerned Federal and State agencies, the scientific community, or any other interested party concerning the proposed listing and proposed critical habitat rules. Please see the Information Requested section of both the proposed listing and proposed critical habitat rules for a list of the comments that we particularly seek.

For more background on our proposed listing (with special rule) and proposed critical habitat rules, see the October 28, 2013, Federal Register. Both proposed rules are available at the Federal eRulemaking Portal at http://www.regulations.gov (see ADDRESSES section above).

If you previously submitted comments or information on the proposed rules, please do not resubmit them. We have incorporated them into the public record, and we will fully consider them in our final rulemakings. Our final determination concerning these proposed rulemakings will take into consideration all written comments and any additional information we receive.

Please note that submissions merely stating support for or opposition to the actions under consideration without providing supporting information, although noted, will not be considered in making a determination, as section 4(b)(1)(A) of the Act directs that determinations as to whether any species is an endangered or threatened species, and a determination of critical habitat, must be made “solely on the basis of the best scientific and commercial data available.”

You may submit your comments and materials concerning the proposed listing and proposed critical habitat rules by one of the methods listed in ADDRESSES. We request that you send comments only by the methods described in ADDRESSES. If you submit information via http://www.regulations.gov, your entire submission—including any personal identifying information—will be posted on the Web site. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on http://www.regulations.gov. Please include sufficient information with your comments to allow us to verify any scientific or commercial information you include.

Comments and materials we receive, as well as supporting documentation we used in preparing the proposed listing and proposed critical habitat rules, will be available for public inspection on http://www.regulations.gov, or by appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Nevada Fish and Wildlife Office and Ventura Fish and Wildlife Office (see FOR FURTHER INFORMATION CONTACT).

SUPPLEMENTARY INFORMATION: Fisheries in the U.S. Exclusive Economic Zone (EEZ, or Federal waters) around the U.S. Pacific Islands are managed under archipelagic fishery ecosystem plans (FEP) for American Samoa, Hawaii, the Pacific Remote Islands, and the Mariana Archipelago (covering Guam and the Commonwealth of the Northern Marianas Islands (CNMI)). A fifth FEP covers pelagic fisheries. The Western Pacific Fishery Management Council (Council) developed the FEPs, and NMFS implemented them under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Each FEP contains a process for the Council and NMFS to specify annual catch limits (ACLs) and accountability measures (AMs); that process is codified at 50 CFR 665.4 (76 FR 37285, June 27, 2011). The regulations require NMFS to specify, every fishing year, an ACL for each stock and stock complex of management unit species (MUS) included in an FEP, as recommended by the Council and considering the best available scientific, commercial, and other information about the fishery. If a fishery exceeds an ACL, the regulations require the Council to take action, which may include reducing the ACL for the subsequent fishing year by the amount of the overage, or other appropriate action.  
Annual Catch Limits  
NMFS proposes to specify ACLs for bottomfish, crustacean, precious coral, and coral reef ecosystem fishery MUS in American Samoa, Guam, the CNMI, and Hawaii. NMFS based the proposed specifications on recommendations from the Council at its 157th meeting held on June 25–28, 2013. The Council recommended 101 ACLs: 22 in American Samoa, 27 in Guam, 22 in the CNMI, and 30 in Hawaii. This rule proposes the ACLs for the 2014 fishing year (January 1 through December 31, 2014, except for precious coral fisheries, which is July 1, 2013, through June 30, 2014). The proposed ACLs are identical to those that NMFS specified for these fisheries in 2013. NMFS is not proposing ACLs for MUS that are currently subject to Federal fishing moratoria or prohibitions. These MUS include all species of gold coral (78 FR 32181, May 29, 2013), the three Hawaii seamount groundfish, that is, pelagic armorhead, alfonsin, and raftfish (75 FR 69015, November 10, 2010), and deep water precious corals at the Westpac Bed Refugia (75 FR 2198, January 14, 2010). The current prohibitions on fishing for these MUS serve as the functional equivalent of an ACL of zero. Additionally, NMFS is not proposing ACLs for bottomfish, crustacean, precious coral, or coral reef ecosystem MUS identified in the Pacific Remote Islands Area (PRIA) FEP. On June 3, 2013, NMFS published a final rule implementing fishing requirements for the Pacific Remote Islands Marine National Monument (Monument), which include a prohibition on all fishing in the EEZ within 12 nm of emergent land, unless authorized by the U.S. Fish and Wildlife Service (78 FR 32996, June 3, 2013). NMFS is not proposing ACLs for PRIA FEP bottomfish, crustacean, precious coral, or coral reef ecosystem fisheries because there is no suitable habitat for these fisheries beyond the 12-nm no-fishing zone, except at Kingman Reef, where fishing for these resources does not occur. Therefore, the current prohibitions on fishing serve as the functional equivalent of an ACL of zero. However, NMFS will continue to monitor authorized fishing within the Monument in consultation with the U.S. Fish and Wildlife Service, and may develop additional fishing requirements, including Monument-specific catch limits for species that may require them. NMFS is also not proposing ACLs for pelagic MUS at this time, because NMFS previously determined that
