Adult Atlantic salmon

Greg Thompson/USFWS

Highlights

The station traps and holds wild Connecticut River Atlantic salmon for spawning.

The station maintains Atlantic salmon kelts and domestics for public viewing.

The station developed the nation's first genetic mating restoration program.

The station offers special needs fishing programs for veterans and other groups.

950 disabled Americans participated in the station's special needs catch and release fishing program in 2006.

Issues

Restoring Atlantic salmon to the Connecticut River

Maintaining genetic diversity with unique genetic pairing at spawning time
