RESTORATION SUGGESTION FORM
ONONDAGA LAKE NATURAL RESOURCE DAMAGE ASSESSMENT

Background:
The Onondaga Nation, Department of the Interior Fish and Wildlife Service and New York State Department of Environmental Conservation are conducting a natural resource damage assessment at Onondaga Lake. We are in the process of identifying potential projects to restore, replace or compensate for injuries to and lost use of natural resources caused by hazardous substances released in and around Onondaga Lake. We invite you to submit suggestions for restoration projects. Please understand we are currently collecting ideas and suggestions, not funding grant proposals for work to be done by a specific group. Projects that meet these requirements will be evaluated based on:

- Connection to potentially injured resource (proximity, linkage to resources or resource services affected by hazardous substance releases)
- Likelihood of success
- Cost effectiveness
- Ability to produce demonstrable, quantifiable benefits
- Compatibility with Trustee resource management goals

More information about the Natural Resource Damage Assessment can be found at: <http://www.fws.gov/northeastny/olc/onondaga.htm>

Instructions:
Please complete as many sections as possible. Your suggestion will be considered even if you are unable to fill out every section. If you need more space, please use additional paper and label appropriate sections. This form is also available on the web at: <http://www.fws.gov/northeastny/olc/onondaga.htm>. Send completed forms to:
Anne Secord, USFWS
3817 Luker Road, Cortland, NY 13045
