This above lists include persons known by the U.S. Fish and Wildlife Service (USFWS) to have the skills and experience to search for and successfully find freshwater mussels and their habitat. Any individuals handling or conducting surveys for endangered mussels must first obtain from the Pennsylvania Fish and Boat Commission a Scientific Collector's Permit, and a Special Permit to survey for endangered and threatened species pursuant to 58 PA Code 75.5. All permitted collector's encounters with endangered mussels must be reported in writing to the PFBC and USFWS within 48 hours.

This information is not to be construed as an endorsement of individuals or firms by the USFWS. While persons on this list are believed to be qualified to conduct freshwater mussel surveys that meet USFWS, the USFWS reserves the right to review any specific survey or survey data to determine its acceptability. Persons not on this list, but who have documented experience in conducting scientific studies of, or successful searches for, freshwater mussels and their habitat may submit their qualifications to the USFWS for review. The submission must include documentation that the requestor has experience successfully locating and identifying freshwater mussel habitats, and successfully locating and identifying freshwater mussel species (including federal-status mussel species) in their river and stream habitat. The submission must also include documentation of the requestor field experience with endangered mussel species in the river drainage in which he/she intends to conduct survey work. Additions to and deletions from this list are at the sole discretion of the USFWS. This list is subject to revision at any time without prior notice.
