

NALCC Communications Tools

NALCC Conference Call
October 14th, 2010

Discussion Outline:

1. Communications Action Item Updates
2. Website: What is important to have on the site?
3. Data Sharing Discussion: Introduce Sharepoint 2010
4. Additional Communication Needs

Communications Update

1. Registered the domain name and purchased the Web address <http://www.northeastatlanticlcc.org> for the public website.
2. Created a secure space to share information and data. Will be available in the coming month.
3. Current LCC Websites have been redesigned. Visit <http://www.fws.gov/northeast/science/lcc.html>
4. Under construction: North Atlantic LCC General Powerpoint

What should the Website include:

- About Us
- Meetings
- Projects
- Partners
- Contact
- Additional Information?

North Atlantic Landscape Conservation Cooperative

The Department of the Interior and U.S. Fish and Wildlife Service are facilitating a **coordinated network of LCCs across the United States**, to address major environmental and human-related factors that limit fish and wildlife populations at the broadest of scales, including developing adaptation strategies in response to climate change. The science provided by these partnerships will inform biological planning and conservation design, and help direct research and monitoring necessary to inform decisions about conservation delivery.

The Northeast Region will lead the development of the North Atlantic LCC in 2010, while also beginning development of the Appalachian LCC. The Northeast Region will also be supporting the development of the Great Lakes and South Atlantic LCC. The region is building upon strong partnerships to create the North Atlantic LCC, which, guided by the principles of strategic habitat conservation (SHC), will develop and communicate landscape-scale scientific information to shape conservation across the Eastern Seaboard south to Virginia. The North Atlantic LCC will be part of a network of LCCs initiated by USFWS in 2010 that covers the Atlantic and Gulf coasts of the United States, a geographic area that, when compared to other areas globally, is highly susceptible to impacts precipitated by climate change, including sea level rise and storm surges.

The California Landscape Conservation Cooperative (CA LCC) is a management-science partnership among agencies, non-governmental organizations and other entities that informs on-the-ground conservation actions addressing climate change and other stressors within and across landscapes.

Location: Big Sur, California

Coming Soon!

News

Phase II is Coming Soon! (Posted September 24th, 2010)

Phase II of the California Landscape Conservation Cooperative (CA LCC) is getting underway! It will include partners from the Central Coast, southern California and northern Mexico. Keep looking here for more information about a Phase II kick off workshop to be held in Southern or Central California in January 2011.

Phase I of the process has focused on bringing partners together from the San Francisco Bay Area, the Central Valley, and the Northern and Central Sierra Nevada. Phase II will bring partners together to finalize the organization and interests of all members of the CA LCC community.

Project Summaries

- [Avian demographic response](#)
- [Assessing species vulnerability](#)
- [Tracking landscape change](#)
- [Understanding impacts of climate change on birds](#)
- [Climate-driven geomorphic alteration of intertidal habitat](#)
- [Incorporating the geography of climate change](#)
- [San Francisco Bay Area Upland Habitat Goals](#)
- [Vulnerability analysis and monitoring program for tidal marsh bird populations](#)
- [Monitoring protocol for wintering shorebird populations](#)
- [Developing an environmental change network for landbirds](#)
- [Tidal marsh bird population and habitat assessment for SF bay](#)

Process for Selecting FY 2010 projects

AREAS OF EMPHASIS IN THE REQUEST FOR PROPOSALS

Climate Information
Downscaled models, interfacing information, data management

Water Resource Issues
Hydrological models, management regimes

Land Cover

Species & Habitat Information

Data Sharing, Management, & Interfacing

Communication & Information Exchange

Habitat Connectivity
Corridors & hot spots

PROJECT CONSIDERATIONS

Project Shows Measurable Short-term Results

Project is within CA LCC first Phase Region

Does the Project...

- Meet multiple CA LCC needs, benefit other LCCs, have multiple partners, leverage funding, and set CA LCC for long-term success?
- Improve the understanding of how species, habitats, or landscapes adjust to stressors, including climate change?
- Address existing resource goals, plans or priorities?

Project Recommendation Process

Over 70 initial project concepts were submitted. A set of the Interim Steering Committee(ISC) formed a project review team and requested 5 page proposals from 18 submitted concepts. The project review team reviewed the 18 proposals and ranked them high, medium or low. The group then met and discussed each proposal and came to consensus on whether to fund the proposal or not and provided a justification for the selection.

Sharepoint 2010

- Secure project management and data sharing site;
- Set multiple layers of permission;
- Anybody can be invited to join.
