

Moving Forward with Landscape-scale Conservation: The Northeast Region's Representative Species Workshops

Feedback Form

Thank you for participating in the Northeast Region's Representative Species Workshops. Please use this form to provide feedback on the Northeast Region's Representative Species workshops. If you have additional questions or comments that are not covered below, please feel free to add them in the space provided.

Thank you,

The Conservation Science Team

After attending today's workshop, do you feel like you better understand:

- 1) Why the Service needs to engage in landscape-level conservation?

- 2) The role of biological planning, including selection of representative species, for design of landscape-scale conservation and the connection to Strategic Habitat Conservation (SHC)?

- 3) How representative species will help to focus where to work on the landscape?

- 4) The Northeast Region's use of representative species in implementing SHC?

- 5) How to provide feedback on the Service's draft technical guidance and the Northeast Region's approach to identification of representative species?

- 6) What the next steps will be for moving ahead with biological planning and representative species in the Northeast Region?

- 7) Other questions or concerns?
