

Northern Spotted Owl (*Strix occidentalis caurina*) final revised critical habitat units and sub-units* for WASHINGTON

*Sub-units were delineated by the US Fish and Wildlife Service after the August 13, 2008 Federal Register publication of spotted owl critical habitat to assist in locating projects within CHUs for operational purposes only.

Critical Habitat Units [Sub-unit numbers]

- Southwest Washington Cascades [01 & 03-07]
- Northwest Washington Cascades [08-22]
- Olympic Peninsula [26-28]
- Okanogan [30-37]
- Entiat [38-44]
- Southeast Washington Cascades [45-50]
