

Qualified Surveyors List

(updated 6/22/2015)

This list is compiled by the Panama City Ecological Services Field Office of the U.S. Fish and Wildlife Service and represents individuals who are qualified to conduct surveys for federally listed freshwater mussels in the Escambia, Yellow, and Choctawhatchee River drainages, and/or the Econfina, Apalachicola, Ochlockonee, and Suwannee River drainages in Alabama, Georgia and Florida. Inclusion on this list does not represent an endorsement by the U.S. Fish and Wildlife.

Surveys must follow the Freshwater Mussel Survey Protocol which can be accessed on our website:

<http://www.fws.gov/panamacity/mussels.html>. If the survey determines that listed mussels are present, contact this office to allow us the opportunity to work with you to ensure that a project avoids or minimizes adverse effects to rare species and their habitats. For projects in Alabama, contact the Alabama Ecological Services Field Office in Daphne; for projects in Georgia, contact the Georgia Ecological Services Field Office in Athens.
