

Freshwater Mussel Surveyors List

US Fish and Wildlife Service, Panama City Ecological Services Office (updated 3/4/2020)

This list represents individuals authorized to conduct surveys for federally listed freshwater mussels occurring in Eastern Gulf Slope River basins of Alabama, Florida, and Georgia (Fig. 1). Inclusion on this list does not represent an endorsement by the U.S. Fish and Wildlife.

Surveys must follow the Freshwater Mussel Survey Protocol: <http://www.fws.gov/panamacity/mussels.html>. If the survey determines that listed mussels are present, contact the appropriate Ecological Services Field Office to allow us the opportunity to work with you to ensure that the project avoids or minimizes adverse impacts to rare species and their habitats.
