Substance Abuse Prevention and Treatment Block Grant, States must submit in their annual block grant applications an assessment of service needs Statewide, at the sub-state level, and for specified population groups (as required by Section 1929 of the Public Health Service Act).

Most States receiving these grants will conduct an adult telephone household survey to collect information on needed treatment for substance abuse/dependence. In addition, many States will conduct a variety of more focused studies which will collect data on treatment need in special populations, including adolescents, Temporary Assistance for Needy Families (TANF) recipients, transients, arrestees and other criminal justice populations.
