SUPPLEMENTARY INFORMATION:

Background

On April 5, 1999, the National Marine Fisheries Service (NMFS) and the Fish and Wildlife Service (FWS) published a notice in the Federal Register (64 FR 16397) proposing to list the coastal cutthroat trout (Oncorhynchus clarki clarki) population in southwestern Washington and the Columbia River, excluding the Willamette River above Willamette Falls, as threatened pursuant to the Endangered Species Act of 1973, as amended (Act). The 6-month extension was necessary to obtain and review new information needed to resolve substantial scientific disagreement about the status of this population.

In response to a request for a public hearing during the public comment period for the 6-month extension, the FWS will hold a public hearing on the date and address described in the DATES and ADDRESSES sections above.

Anyone wishing to make an oral statement for the record is encouraged to provide a written copy of their statement and present it to the FWS at the hearing. In the event there is a large attendance, the time allotted for oral statements may be limited. Oral and written statements receive equal consideration. There are no limits to the length of written comments presented at the hearing or mailed to the FWS. Legal notices announcing the date, time, and location of the hearing will be published in newspapers concurrently with the Federal Register notice.

Comments from the public regarding the accuracy of this proposed rule are sought, especially regarding: (1) Biological or other relevant data concerning any threat to cutthroat trout; (2) The range, distribution, and population size of coastal cutthroat trout in southwestern Washington and the Columbia River; (3) Current or planned activities in the subject area and their possible impacts on the species; (4) Cutthroat trout escapement, particularly escapement data partitioned into natural and hatchery components; (5) The proportion of naturally reproducing fish that were reared as juveniles in a hatchery; (6) Homing and straying of natural and hatchery fish; and (7) The reproductive success of naturally reproducing hatchery fish and their relationship to southwestern Washington and the Columbia River coastal cutthroat trout populations; and (8) Efforts being made to protect native, naturally reproducing populations of coastal cutthroat trout.

Reopening of the comment period will enable the FWS to respond to the request for a public hearing on the proposed action. The comment period on this proposal closes on July 3, 2000. Written comments should be submitted to the FWS office listed in the ADDRESSES section.
