Notice of Availability of an Amendment to the Draft Recovery Plan for Gabbro Soil Plants of the Central Sierra Nevada Foothills for Review and Comment

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability, for public review, of an Amendment to the Draft Recovery Plan for Gabbro Soil Plants of the Central Sierra Nevada Foothills. This amendment to the draft recovery plan covers four plants listed as endangered, Calyxstegia stebbinsii (Stebbins’ morning-glory), Ceanothus roderickii (Pine Hill ceanothus), Fremontodendron californicum ssp. decumbens (Pine Hill flannelbush), and Galium californicum ssp. sierrae (El Dorado bedstraw); one plant listed as threatened, Senecio layneae (Layne’s butterweed); and one plant species of concern, Wyethia reticulata (El Dorado mule-ears). The amendment includes a revision of and correction to the preserve recommendation maps found in the draft plan. It also includes changes to the text in the recovery, stepdown narrative, and implementation chapters necessitated by changes in the preserve maps.

DATES: Comments on the amendment to the draft recovery plan must be received on or before January 29, 2001.

ADDRESSES:Copies of the amendment to the draft recovery plan are available for inspection, by appointment, during normal business hours at the following location: U.S. Fish and Wildlife Service, Sacramento Fish and Wildlife Office, 2800 Cottage Way, Room W–2605, Sacramento, California (telephone (916) 414–6600). Requests for copies of the amendment to the draft recovery plan and written comments and materials regarding this amendment should be addressed to Wayne S. White, Field Supervisor, Ecological Services, at the above address.

FOR FURTHER INFORMATION CONTACT: Diane Elam or Kirsten Tarp, Fish and Wildlife Biologists, at the above address.

SUPPLEMENTARY INFORMATION:

*Note: The general License/Permit Application form 3–200–1 is the first page of all 3–200 application forms. The 3–200–1 form is not generally used by itself, therefore, it has zero respondents.

Frequency of Collection: 7597 applications annually.

Description of Respondents: Individuals, biomedical companies, circuses, zoological parks, botanical gardens, nurseries, museums, universities, scientists, antique dealers, Exotic pet industry, hunters, taxidermists, commercial importers/exporters of wildlife and plants, freight forwarders/brokers, local, State, tribal and Federal governments.

Total Annual Burden Hours: 7597.

Total Annual Responses: 7597.

The total number of Annual Responses and Annual Burden Hours have been reduced because the 3–200–1 form is generally not used by itself, rather it is the first page of each of the other 3–200 License/Permit Application Forms. Therefore, there have been zero responses to the 3–200–1 form. The Annual Burden Hours to complete the first page of the 3–200 forms have already been accounted for in each of the other 3–200 License/Permit Application Forms.

Rebecca A. Mullin,
U.S. Fish and Wildlife Service, Information Collections Officer.

from a significant portion of their historic ranges. The remaining natural communities are highly fragmented, and many sites are vulnerable to extirpation from edge effects, impaired dispersal, or changes in fire regime.

The objectives of this amendment are to: (1) Make available to the public a revised preserve recommendation for the Pine Hill formation of western El Dorado County and (2) correct mistakes in mapping of preserve areas that appeared in the draft plan. The amendment includes the revised preserve recommendation maps and portions of the recovery chapter, stepdown narrative, and implementation schedule that were changed to correspond to the revised recommendation. In this amendment we have not addressed the public comments that were previously submitted on the draft plan. These comments will, however, be addressed in the final recovery plan.

Public Comments Solicited

The Service solicits written comments on the amendment described above. All comments received by the date specified above will be considered prior to approval of the final recovery plan. Comments that were submitted to us during the March 8 to July 7, 1999, public comment period on the draft plan do not need to be resubmitted. These comments, as well as comments received on the amendment, will be addressed in the final recovery plan.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Elizabeth H. Stevens,
Acting Manager, California/Nevada Operations Office, Region 1, Fish and Wildlife Service.

Request for Public Comments on Proposed Information Collection to be Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposed information collection described below will be submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information may be obtained by contacting the Bureau’s clearance officer at the phone number listed below. Comments and suggestions on the proposal should be made within 60 days directly to the Bureau clearance officer, U.S. Geological Survey, 807 National Center, 12201 Sunrise Valley Drive, Reston, Virginia, 20192, telephone (703) 648–7313.

Specific public comments are requested as to:

1. Whether the collection of information is necessary for the proper performance of the functions on the bureaus, including whether the information will have practical utility;

2. The accuracy of the bureau’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

3. The quality, utility, and clarity of the information to be collected; and

4. How to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other forms of information technology.

Title: Conservation Reserve Program (CRP) Contractee Perceptions on Environmental Benefits and Management.

OMB Approval No.: New collection.

Abstract: The Conservation Reserve Program (CRP) is the Nation’s largest environmental program with enrollment currently over 30 million acres. Continuing refinement of conservation and management provisions by the U.S. Department of Agriculture (USDA) continue to give greater importance to wildlife habitat. Program participants who decide to renew contracts often are required to improve the quality or composition of vegetation on land enrolled in the program. An evaluation of contractee perceptions about the validity of these requirements will assist USDA in refinement of CRP management and conservation policies in the 2002 Farm Bill. Description of contractee opinions about personal, local, and regional effects of the program will be useful for documentation of environmental and social effects of the program.

Bureau Form No.: None.

Frequency: One time.

Description of Respondents:

Individual or households.

Estimated Completion Time: 11.5 minutes per respondent (approximate).

Number of Respondents: 1400.

Burden hours: 268 hours. (The burden estimates are based on 11.5 minutes to complete each questionnaire and a 70% return rate.)

All comments concerning this notice should be addressed to Arthur W. Allen, Wildlife Biologist, (970–226–9312), [Arthur_allan@usgs.gov], U.S. Geological Survey, Biological Resources Division, Social, Economic and Institutional Analysis Section, 4512 McMurry Avenue, Fort Collins, CO 80525–3400.

Bureau Clearance Officer: John Cordyack (703) 648–7313.

Dennis B. Finn,
Chief Biologist.
