DEPARTMENT OF ENERGY
Notice Inviting Financial Assistance Applications

AGENCY: U.S. Department of Energy (DOE), National Energy Technology Lab (NETL).

ACTION: Notice Inviting Financial Assistance Applications.

SUMMARY: The Department of Energy announces that it intends to conduct a competitive Program Solicitation and award financial assistance (cooperative agreements) for the program entitled “Development and Demonstration of Black Liquor/Biomass Gasification in the Forest Products Industry.” Through this solicitation, NETL seeks to support applications to improve the processing of Black Liquor and Biomass from the forest industry using Gasification Systems. Applications will be subjected to a review by a DOE technical panel, and awards will be made to a limited number of applicants based on a scientific and engineering evaluation of the responses received to determine the relative merit of the approach taken in response to this offering by the DOE, and funding availability.

FOR FURTHER SOLICITATION INFORMATION CONTACT: William Mundorf, U.S. Department of Energy, National Energy Technology Laboratory, Acquisition and Assistance Division, PO Box 10940, MS 921–143, Pittsburgh PA 15236–0940, Telephone: (412) 386–4463, FAX: (412) 386–6137, E-mail: mundorf@NETL.doe.gov. The solicitation (available in both WordPerfect 6.1 and Portable Document Format (PDF)) will be released on DOE’s NETL World Wide Web Server Internet System (http://www.NETL.doe.gov/business/solicit) on or about January 3, 2000.

Objectives: Through Program Solicitation No. DE–PS26–00FT40772, the U.S. Department of Energy (DOE) seeks applications for cost-shared demonstration of technologies which will enhance economic competitiveness, improve energy efficiency, and reduce environmental impacts while providing quality products within the forest products industry. The focus of the research will address research priorities identified by the forest products industry in the Agenda 2020 The Path Forward: An Implementation Plan. Approximately $14,000,000 fiscal year 2000 (FY 2000) federal funds are expected to be available to support the first year of a multi-year effort. DOE is looking for a path forward to demonstrate cost-effective, energy efficient, gasification technologies for integrated gasification combined cycle or gasification/cogeneration applications. Competitive development of combined cycle, gasification technologies (for both black liquor and biomass feedstocks) are well underway. However, large-scale pilot plant or demonstrations are needed to promote widespread adoption of advanced gasification technologies in the Forest Products industry. DOE anticipates awarding multiple cooperative agreements. Projects will be limited to eight years or less, but it is expected that successful demonstrations will be achieved in as early as three years. Proposals for projects which will both develop and demonstrate existing technologies will require a minimum 50% cost share of the total estimated project cost. Eligibility: Eligibility for participation in this Program Solicitation is considered to be full and open. All interested parties may apply. The solicitation will contain a complete description of the technical evaluation factors and relative importance of each factor.

Program Technology Definition: The Department is interested in obtaining applications to improve the processing of Black Liquor and Biomass from forest products using gasification systems:

(A) Black Liquor Gasification Systems: Kraft black liquor and semi-chemical caustic-carbonate liqour are mixtures of dissolved organic components resulting from the
