(b) Conduct research to improve practices and programs;
(c) Collect and disseminate information on training programs, technological developments, etc.;
(d) Establish an interagency committee (i.e., the Interagency Mail Policy Council) to provide an exchange of information among Federal agencies;
(e) Conduct studies, inspections, or surveys; and
(f) Promote economy and efficiency in the selection and utilization of space, staff, equipment, and supplies.

§ 102–192.170 What types of support does GSA offer to Federal agency mail management programs?

GSA will support Federal agency mail management programs by:
(a) Assisting development of agency policy and guidance in mail management and mail operations;
(b) Identifying better business practices and sharing them with Federal agencies;
(c) Developing and providing access to a Governmentwide management information system for mail;
(d) Helping agencies develop performance measures and management information systems for mail;
(e) Maintaining a current list of Agency Mail Managers; and
(f) Maintaining liaisons with the USPS and other service providers at the national level.

§ 102–192.175 What types of support does GSA offer to Federal mail managers?

The GSA Office of Governmentwide Policy maintains a website for mail communications policy. You may also contact GSA at: General Services Administration, Office of Governmentwide Policy, Mail Communications Policy Division (MTM), Washington DC 20405; or at: (e-mail address to be inserted later).

Dated: May 9, 2001.
G. Martin Wagner, Associate Administrator for Governmentwide Policy.

50 CFR Part 15

RIN 1018–AG64

Wild Bird Conservation Act; Review of Approved List of Captive-bred Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of review.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a review of all approved captive-bred species listed in the Approved List of Captive-bred Species as provided for in the Wild Bird Conservation Act (WBCA) of 1992. The WBCA requires periodic review of the list. The purpose of the review is to ensure that the list accurately reflects the most current status information for each listed species. We request comments that will provide us with the most current scientific and trade information available on these listed species as well as similar information on species that may warrant consideration for inclusion in the list. If inclusion of a species in the list is not consistent with the best scientific and trade information available at the conclusion of this review, we will change the list accordingly.

DATES: Your comments on this notice of review must be received by July 30, 2001 to receive consideration by us.

ADDRESSES: Submit comments, information, and questions to the Chief, Division of Scientific Authority; Mail Stop: Room 750, Arlington Square; U.S. Fish and Wildlife Service; Washington, DC 20240 (Fax number: 703–358–2276; E-mail address: fw9ia_dsa@fws.gov). Address express and messenger-delivered mail to the Division of Scientific Authority; 4401 North Fairfax Drive, Room 750; Arlington, Virginia 22203. Comments and materials received will be available for public inspection by appointment, from 8 a.m. to 4 p.m., Monday through Friday, at the Arlington, Virginia, address.

FOR FURTHER INFORMATION CONTACT: Michael D. Kreger, Biologist, Division of Scientific Authority (See ADDRESSES section) (phone: 703–358–1708, fax: 703–358–2276, E-mail: fw9ia_dsa@fws.gov).

SUPPLEMENTARY INFORMATION:

Background

The Wild Bird Conservation Act (WBCA) was enacted on October 23, 1992 to promote the conservation of exotic birds listed in the appendices of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) by ensuring that all imports of exotic bird species into the United States are biologically sustainable and not detrimental to the species; ensuring that imported birds are not subject to inhumane treatment during capture and transport; and assisting wild bird conservation and management programs in countries of origin.

What Is the Approved List of Captive-bred Species?

The Approved List of Captive-bred Species under the WBCA is a list of bird species that are included in the appendices of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), and which exist in international trade only as captive-bred specimens. The listing criteria are described in 50 CFR 15.31–15.32 and the list is presented in 50 CFR 15.33. A WBCA permit is not required if an exotic bird species is listed in the Approved List of Captive-bred Species. We periodically review and update the list. To be included in the list, a species must meet the following criteria:

(a) All specimens of the species known to be in trade (legal or illegal) must be captive bred;
(b) No specimens of the species may be removed from the wild for commercial purposes;
(c) Any importation of the species must not be detrimental to the survival of the species in the wild; and
(d) Adequate enforcement controls must be in place to ensure compliance.

Where Can the Approved List of Captive-bred Species Be Found?

The Approved Species List of Captive-bred Species can be found in 50 CFR 15.33. The list is also available on the World Wide Web at http://international.fws.gov/global/ wbcacbs.htm. This list contains the names of species of captive-bred exotic birds for which importation into the United States is not prohibited by the WBCA.

Why Is This Review Being Conducted?

The procedural rules for listing or removing species from the list can be found in 50 CFR 15.31. The WBCA requires that the Secretary of the Interior conduct a periodic review of each listed species and, after public comment, publish in the Federal Register a list of species of exotic birds that are listed in any CITES Appendix and that are not subject to a prohibition or suspension of importation by the WBCA based on their captive-bred status. The last review was conducted in 1994.

Which Species Are Included on the List?

Although the WBCA also contains provisions for an approved list of wild-caught birds harvested under approved sustainable-use management plans, and also allows imports from qualifying overseas breeding facilities, those lists
have not yet been established. The Approved List of Captive-bred Species currently contains the following species that are subject to this review, although other species may be added if information is received to show that they qualify:

Order Falconiformes:
- Buteo buteo—European buzzard

Order Columbiformes:
- Columba livia—Rock dove

Order Psittaciformes:
- Agapornis personata—Masked lovebird
- Agapornis roseicollis—Peach-faced lovebird
- Anatinga jandaya—Jandaya conure
- Barnardius barnardi—Mallee ringneck parrot
- Bolborhynchus lineola—Lineolated parakeet-blue form
- Bolborhynchus lineola—Lineolated parakeet-yellow form
- Bolborhynchus lineola—Lineolated parakeet-white form
- Cyanoramphus auriceps—Yellow-fronted parakeet
- Cyanoramphus novaeezelandiae—Red-fronted parakeet
- Forpus coelestis—Pacific parrotlet-lutino form
- Forpus coelestis—Pacific parrotlet-yellow form
- Forpus coelestis—Pacific parrotlet-blue form
- Forpus coelestis—Pacific parrotlet-cinnamon form
- Melopsittacus undulatus—Budgerigar
- Neophema bourkii—Bourke’s parrot
- Neophema chrysostoma—Blue-winged parrot
- Neophema elegans—Elegant parrot
- Neophema pulchella—Turquoise parrot
- Neophema splendida—Scarlet-chested parrot
- Nymphicus hollandicus—Cockatiel
- Platycercus adelaide—Adelaide rosella
- Platycercus adscitus—Pale-headed rosella
- Platycercus elegans—Crimson rosella
- Platycercus eximius—Eastern rosella
- Platycercus icterus—Western (stanley) rosella
- Platycercus venustus—Northern rosella
- Polytelis alexandrae—Princess parrot
- Polytelis anthopeplus—Regent parrot
- Polytelis swainsonii—Superb parrot
- Psephotus chrysopterygius—Golden-shouldered parakeet
- Psephotus haematotus—Red-rumped parakeet
- Psephotus varius—Mulga parakeet

Psittacula krameri manillensis—Indian ringneck parakeet
Psittacula euryops—Red-capped parrot
Trichoglossus chlorolepidotus—Scaly-breasted lori keet

Order Passeriformes:
- Aegintha temporalis—Red-browed finch
- Aidemosyne modesta—Cherry finch
- Chloropsis auriceps—Gouldian finch
- Emblema guttata—Diamond sparrow
- Emblema picta—Painted finch
- Lonchura castaneothorax—Chestnut-breasted finch
- Lonchura domestica—Society (Bengalese) finch
- Lonchura pectoralis—Pictorella finch
- Neochmia ruficauda—Star finch
- Psephotus acuticauda—Long-tailed grass finch
- Psephotus bichenovii—Double-barred finch
- Psephotus cincta—Parson finch
- Psephotus guttata—Zebra finch
- Psephotus personata—Masked finch
- Serinus canaria—Common canary

Note: Species with an asterisk (*) are protected by the Endangered Species Act and require a permit under that law for importation. The golden-shouldered parakeet is also listed in CITES Appendix I and is subject to the provisions of CITES, including a determination of whether import is for primarily commercial purposes.

Forty-eight species are currently included in the list. Most species are Psittaciiformes, which includes parrots, macaws, budgerigars, parakeets, lovebirds, cockatoos, and similar species. Of those, color mutations, such as the blue form of the Pacific parrotlet, are included since it is likely that these are captive-bred birds and would not have been removed from the wild. The list was established on January 24, 1996 (61 FR 2093) and has not been amended since then. Since the list was established, however, certain factors (e.g., changes in national legislation in range countries) may have altered patterns in the exotic bird trade, and captive breeding of some species may have improved or declined. We have received comments from aviculturists requesting that some captive-bred species, including additional color mutations, be added to the list, especially if the range country now strictly prohibits exportation of the species. We intend to examine these comments and any additional information in response to this Notice to determine the current status of species listed, to determine whether they should remain on the list, and to determine whether additional species should also be included in the list.

How Will We Determine Whether a Species Should Be on the Approved List?

We will consider the comments received in response to this Notice, as well as other relevant information given to us on captive breeding and trade in exotic birds. We will then evaluate the species against the criteria listed above. A species will be added to the list if it meets all of the criteria.

What Could Happen as a Result of This Review?

If anyone provides us with substantial new information for one or more species in the table above, or if we find, as part of our review, any other credible new information on these species, we could either remove or add a species to the list.

What Will Happen if no New Information Is Submitted on any of the Listed Species?

No changes will be made to the list as a result of this review unless substantial information is received. However, we will initiate periodic reviews in the future, as resources allow and when new information suggests that a review may be warranted.

Request for Information

We request comments on this Notice of Review from any foreign government or agency, the public, other Federal, State, and local governmental agencies, the scientific community, industry, or any other interested party. The comments should provide as much scientific and trade information as possible (literature citations, etc.). Submissions with detailed information are much more helpful than those that merely advocate or state a position, but that contain no biological or trade information that would contribute to determining whether species should be included in the list. In particular, we are seeking information that indicates a need for a change in the status of any of the listed or unlisted species based on:

1. Status of captive breeding;
2. Whether there is legal trade from the wild;
3. Whether there is illegal trade from the wild and how much.

We are also seeking taxonomic and nomenclatural changes as well as of occurrences of any new color mutations of the taxa as well as suggestions for appropriate common names.

If possible, this information should be supported by documentation such as maps, breeding records, bibliographic references, or copies of any pertinent

BILLING CODE 4310–55–U

Fisheries Off West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery; Application for an Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit (EFP); request for comments.

SUMMARY: NMFS announces receipt of an application for an EFP from the Washington State Department of Fish and Wildlife (WSDFW). If awarded, the EFP would allow vessels with valid Washington State delivery permits to land certain federally managed groundfish species in excess of cumulative trip limits and sell them for profit, providing the vessel carries a State-sponsored observer. State observers would collect total catch and effort data, and retain specimens that are otherwise not available shoreside. This EFP proposal is intended to promote the objectives of the Pacific Coast Groundfish Fishery Management Plan (FMP) by providing data on total catch and incidental catch rates.

DATES: Comments must be received by June 28, 2001.

ADDRESSES: Copies of the EFP application are available from Becky Renko, Northwest Region, NMFS, 7600 Sand Point Way N.E., Bldg. 1, Seattle, WA 98115–0070.

FOR FURTHER INFORMATION CONTACT: Becky Renko, 206–526–6140.

SUPPLEMENTARY INFORMATION: This action is authorized by the FMP and implementing regulations at 50 CFR 600.745 and 50 CFR 660.350.

On April 5, 2001, NMFS received an EFP application from the WSDFW. The purpose of this exempted fishing activity would be to measure bycatch rates for canary rockfish and other rockfish species associated with fishing strategies currently used in the northern arrowtooth flounder fishery off Washington State.

Fishing for arrowtooth flounder, which is an abundant and commercially important species off Washington State, is constrained by efforts to rebuild canary rockfish, an overfished species. Fishers who have historically targeted arrowtooth flounder believe that the fishery can be prosecuted with a much lower rockfish bycatch rate than is currently assumed.

If issued, this EFP would allow certain vessels with valid Washington State delivery permits to retain and sell groundfish species in excess of cumulative trip limits, and would provide for a State-run observer program where observers collect and retain specimens of otherwise prohibited fish caught by the vessel. Observers would also collect much-needed data from which incidental catch rates and total catch of various species and species groups could be estimated. Without an EFP, groundfish regulations at 50 CFR 660.306(f) restrict vessels from landing groundfish species or species groups in excess of trip limits.

Data collected during this project is expected to have a broad significance to the management of the groundfish fishery by providing much needed information on: (1) Total catch in the northern flatfishery; (2) catch rates of incidentally caught species, including canary rockfish by fishing location; and (3) age structure data that is otherwise not available from landed catch. To the extent possible, data provided by the State observers will be compatible with that data collected by the NMFS coastwide observer program. If the EFP is issued, approximately seven vessels are expected to fish under the EFP from July to September 2001. All groundfish caught under this EFP would be counted against the optimum yields (OYs) for those species and will not result in total harvest above expected levels. NMFS will include special provisions should they be necessary to ensure that the canary rockfish OY is not exceeded.

In accordance with Pacific Coast groundfish regulations, NMFS has determined that the proposal warrants further consideration and has initiated consultation with the Pacific Fishery Management Council (Council). The Council will consider the EFP application during its June 11–15, 2001, meeting, which will be held at the Park Plaza Hotel, in Burlingame, CA. The applicants have been invited to appear in support of their application. A copy of the application is available for review from NMFS (see ADDRESSES).

Authority: 16 U.S.C. 1801 et seq.

Richard W. Surdi,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
