Channel 275A at Frederic are 44–46–29 North Latitude and 84–39–29 West Longitude. Since Frederic is located within 320 kilometers (200 miles) of the U.S.-Canadian border, concurrence of the Canadian government has been requested.

The Commission requests comments on a petition filed by Jeraldine Anderson proposing the allotment of Channel 275A at Goree, Texas, as the community’s first local aural transmission service. Channel 275A can be allotted to Goree in compliance with the Commission’s minimum distance separation requirements with a site restriction of 4.3 kilometers (2.7 miles) northeast to avoid a short-spacing to the licensed site of Station KHXS(FM), Channel 274C1, Merkel, Texas. The coordinates for Channel 275A at Goree are 33–30–00 North Latitude and 99–30–00 West Longitude.

The Commission requests comments on a petition filed by Jeraldine Anderson proposing the allotment of Channel 299A at Leakey, Texas, as the community’s third FM transmission service. Channel 299A can be allotted to Leakey in compliance with the Commission’s minimum distance separation requirements with a site restriction of 13.3 kilometers (8.3 miles) west to avoid short-spacings to the licensed sites of Station KXTN-FM, Channel 298C, San Antonio, Texas, and Station XHPC-FM, Channel 300B, Piedras, Mexico. The coordinates for Channel 299A at Leakey are 29–41–58 North Latitude and 99–53–41 West Longitude. Since Leakey is located within 320 kilometers (199 miles) of the U.S.-Mexican border, concurrence of the Mexican government has been requested.

The Commission requests comments on a petition filed by Jeraldine Anderson proposing the allotment of Channel 221C3 at Sweetwater, Texas, as the community’s second FM transmission service. Channel 221C3 can be allotted to Sweetwater in compliance with the Commission’s minimum distance separation requirements at city reference coordinates and requires no site restriction. The coordinates for Channel 221C3 at Sweetwater are 32–28–15 North Latitude and 100–24–20 West Longitude. Since Sweetwater is located within 320 kilometers (199 miles) of the U.S.-Mexican border, concurrence of the Mexican government has been requested.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex parte contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible ex parte contacts. For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

1. The authority citation for part 73 continues to read as follows: Authority: 47 U.S.C. 154, 303, 334 and 336.

§73.202 [Amended]
2. Section 73.202(b), the Table of FM Allotments under Michigan, is amended by adding Frederic, Channel 237A.
3. Section 73.202(b), the Table of FM Allotments under Texas, is amended by adding Channel 264A at Dilley; adding Goree, Channel 275A; adding Channel 277C3 at Junction; adding Channel 291A at Knox City, TX; adding Channel 299A at Leakey; and adding Channel 221C3 at Sweetwater, TX.

Federal Communications Commission.

John A. Karousos,
Chief, Allocations Branch, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AG99
Endangered and Threatened Wildlife and Plants; Proposed Determination of Critical Habitat for the Oahu Elepaio; Correction

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; correction.

SUMMARY: The proposed rule to designate critical habitat for the Oahu elepaio (Chasiempis sandwichensis ibidis) was published in the Federal Register on June 6, 2001. The maps and legal descriptions of the critical habitat units are correct as published in the Federal Register, but Figure 2 in the background of the proposed rule, which showed the proposed critical habitat units in relation to the current, recent historical, and presumed prehistoric distributions of the Oahu elepaio, is incorrect. This document contains the correct version of Figure 2 with an accurate map of the proposed critical habitat units.

DATES: Comments on the proposed rule that was published June 6, 2001 (66 FR 30372) must be received no later than September 6, 2001.

ADDRESSES: Send written comments on the proposed rule to Paul Henson, Field Supervisor, Pacific Islands Fish and Wildlife Office, U.S. Fish and Wildlife Service, 300 Ala Moana Boulevard, Room 3–122, Box 50088, Honolulu, Hawaii 96850.

FOR FURTHER INFORMATION CONTACT: Paul Henson, Field Supervisor, or Eric VanderWerf, Biologist, at the above address (telephone: 808/541–3441; facsimile: 808/541–3470).

SUPPLEMENTARY INFORMATION: On June 6, 2001, the U.S. Fish and Wildlife Service (Service) published a proposed rule to designate critical habitat for the Oahu elepaio (66 FR 30372). The proposed rule contained correct maps and legal descriptions of the proposed critical habitat units. However, Figure 2 in the background of the proposed rule, which showed the proposed critical habitat units in relation to the current, recent historical, and presumed prehistoric distribution of the Oahu elepaio, showed the proposed critical habitat units incorrectly. Figure 2 erroneously showed an additional habitat unit in the northern Koolau Mountains, and the boundary of the Northern Waianae Unit was inaccurate along its northwestern edge. We are providing a corrected version of Figure 2 that contains an accurate map of the proposed critical habitat units, and which matches the critical habitat units depicted in the legal description of the original proposed rule. Page 30377 of the proposed rule should be replaced with Figure 2 of this correction.

In addition, we attempted to use the correct spelling of Hawaiian words by including diacritical marks (a single grave mark (’)) before a vowel indicating a glottal stop, and a macron or horizontal line above a vowel indicating a longer or stressed vowel sound), but we acknowledge that these marks were not printed correctly in the proposed rule. In the final rule to designate critical habitat for the Oahu elepaio, we will ensure that the Hawaiian diacritical marks are either used correctly or eliminated.

Correction
Accordingly, make the following correction to FR Doc. 01–14171 published at 66 FR 30372 on June 6, 2001.

PART 17—[CORRECTED]

1. On page 30377, correct the map for Figure 2 to read as follows:

BILLING CODE 4310–55–P

Figure 2. Current, recent historical (1975), and presumed prehistoric distributions of the O‘ahu ‘elepaio. Years indicate when ‘elepaio were last observed in that area.

Joseph E. Dodridge,
Acting Assistant Secretary for Fish and Wildlife and Parks.
