that the participant suffers from a physical or mental disability resulting in the permanent inability of the participant to perform the service or other activities which would be necessary to comply with the obligation.

(d) In determining whether to waive or suspend any or all of the service or payment obligations of a participant as imposing undue hardship and being against equity and good conscience, the Secretary, on the basis of information and documentation as may be required, will consider:

(1) The participant’s present financial resources and obligations;
(2) The participant’s estimated future financial resources and obligations; and
(3) The extent to which the participant has problems of a personal nature, such as a physical or mental disability or terminal illness in the immediate family, which so intrude on the participant’s present and future ability to perform as to raise a presumption that the individual will be unable to perform the obligation incurred.

§68d.14 When can a GR–LRP payment obligation be discharged in bankruptcy?

Any payment obligation incurred under §68d.12 may be discharged in bankruptcy under Title 11 of the United States Code only if such discharge is granted after the expiration of the five-year period beginning on the first date that payment is required and only if the bankruptcy court finds that a non-discharge of the obligation would be unconscionable.

§68d.15 Additional conditions.

When a shortage of funds exists, participants may be funded only partially, as determined by the Secretary. However, once a GR–LRP contract has been signed by both parties, the Secretary will obligate such funds as necessary to ensure that sufficient funds will be available to pay benefits for the participant to perform the service or other activities unless, by mutual written agreement between the Secretary and the participant, specified otherwise. Benefits will be paid on a quarterly basis after each service period unless specified otherwise by mutual written agreement between the Secretary and the participant. The Secretary may impose additional conditions as deemed necessary.

§68d.16 What other regulations and statutes apply?

Several other regulations and statutes apply to this part. These include, but are not necessarily limited to:

(a) Debt Collection Act of 1982, Public Law 97–365, as amended (5 U.S.C. 5514);
(b) Fair Credit Reporting Act (15 U.S.C. 1681 et seq.);
(c) Federal Debt Collection Procedures Act of 1990, Public Law 101–647 (28 U.S.C. 1); and

SUPPLEMENTARY INFORMATION:

Background

Recovery of endangered or threatened animals and plants is a primary goal of the our endangered species program. A species is considered recovered when the species’ ecosystem is restored and/or threats to the species are removed so that self-sustaining and self-regulating populations of the species can be supported as persistent members of native biotic communities. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for downlisting or delisting listed species, and estimate time and cost for implementing the measures needed for recovery.

The Endangered Species Act of 1973, as amended in 1988 (Act) (16 U.S.C. 1531 et seq.), requires that recovery plans be developed for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act requires that during recovery plan development, we provide public notice and an opportunity for public review and comment. Information presented during the comment period has been considered in the preparation of the final recovery plan, and is summarized in an appendix to the recovery plan. We will forward substantive comments regarding recovery plan implementation to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions.

The thelypody was listed as a threatened species on June 25, 1999. This taxon is endemic to the Baker-Powell River Valley in eastern Oregon. It is currently found in five populations in Baker and Union Counties, Oregon. It formerly also occurred in the Willow Creek Valley in Malheur County. The species grows in alkaline meadows in valley bottoms, usually in and around shrubs such as greasewood or rabbitbrush. The plants are threatened by habitat modification such as grazing during spring and early summer, trampling, urban development, and competition from non-native plants.

The objective of this plan is to provide a framework for the recovery of the thelypody so that protection by the Act is no longer necessary. As recovery criteria are met, the status of the species will be reviewed and it will be considered for removal from the List of Endangered and Threatened Wildlife (50 CFR part 17). The Howell’s spectacular thelypody will be considered for delisting when: (1) At least five stable or increasing thelypody
populations are distributed throughout its extant or historic range and populations must be naturally reproducing with stable or increasing trends for 10 years; (2) all five populations are located on permanently protected sites; (3) management plans have been developed and implemented for each site that specifically provide for the protection of thelypody and its habitat; and (4) a post-delisting monitoring plan is in place that will monitor the status of thelypody for at least 5 years at each site once it has been delisted.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533 (f).

Dated: June 3, 2002.
Rowand W. Gould,
Regional Director, Region 1, U.S. Fish and Wildlife Service.
