Subsistence Management Regulations for Public Lands in Alaska, Subpart D: Emergency Action—Klawock River and Lake

AGENCY: Forest Service, USDA; Fish and Wildlife Service, Interior.

ACTION: Emergency action.

SUMMARY: This provides notice of the Federal Subsistence Board’s in-season management action to protect coho salmon escapement in the Klawock River and Lake. This regulatory adjustment provides an exception to the Subsistence Management Regulations for Public Lands in Alaska, published in the Federal Register on February 13, 2001. Those regulations established seasons, harvest limits, methods, and means relating to the taking of fish and shellfish for subsistence uses during the 2001 regulatory year.

DATES: This closure is effective November 2, 2001, through December 31, 2001.

SUPPLEMENTARY INFORMATION:

Background

Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) (16 U.S.C. 3111–3126) requires that the Secretary of the Interior and the Secretary of Agriculture implement a joint program to grant a preference for subsistence uses of fish and wildlife resources on public lands in Alaska, unless the State of Alaska enacts and implements laws of general applicability that are consistent with ANILCA and that provides for the subsistence definition, preference, and participation specified in Sections 803, 804, and 805 of ANILCA. In December 1989, the Alaska Supreme Court ruled that the rural preference in the State subsistence statute violated the Alaska Constitution and, therefore, negated State compliance with ANILCA.

The Department of the Interior and the Department of Agriculture (Departments) assumed, on July 1, 1990, responsibility for implementation of Title VIII of ANILCA on public lands. The Departments administer Title VIII through regulations at Title 50, part 100 and title 36, part 242 of the Code of Federal Regulations (CFR). Consistent with Subparts A, B, and C of these regulations, as revised January 8, 1999, (64 FR 1276), the Departments established a Federal Subsistence Board to administer the Federal Subsistence Management Program. The Board’s composition includes a Chair appointed by the Secretary of the Interior with concurrence of the Secretary of Agriculture; the Alaska Regional Director, U.S. Fish and Wildlife Service; the Alaska Regional Director, National Park Service; the Alaska State Director, Bureau of Land Management; the Alaska Regional Director, Bureau of Indian Affairs; and the Alaska Regional Forester, USDA Forest Service. Through the Board, these agencies participate in the development of regulations for Subparts, A, B, and C, which establish the program structure and determine which Alaska residents are eligible to take specific species for subsistence uses, and the annual Subpart D regulations, which establish seasons, harvest limits, and methods and means for subsistence take of species in specific areas. Subpart D regulations for the 2001 fishing seasons, harvest limits and methods and means were published on February 13, 2001, (66 FR 10142). Because this rule relates to public lands managed by an agency or agencies in both the Departments of Agriculture and the Interior, identical closures and adjustments would apply to 36 CFR part 242 and 50 CFR part 100.

The Alaska Department of Fish and Game (ADF&G), under the direction of the Alaska Board of Fisheries (BOF), manages sport, commercial, personal use, and State subsistence harvest on all lands and waters throughout Alaska. However, on Federal lands and waters, the Federal Subsistence Board implements a subsistence priority for rural residents as provided by Title VIII of ANILCA. In providing this priority, the Board may, when necessary, preempt State harvest regulations for fish or wildlife on Federal lands and waters.

This emergency action was necessary because of predictions of low returns of coho salmon in the Klawock River and Lake. This emergency action is authorized and in accordance with 50 CFR 100.19(d) and 36 CFR 242.19(d).

Klawock River and Lake

To date, the total return has been 4,381 coho salmon. This represents approximately 75% of the escapement objective of 6,000 coho salmon. Coho salmon are still entering the system and have been seen in the system as late as February. Fishing pressure at this time is low. Along with an Emergency Order issued by the Alaska Department of Fish and Game closing sport fishing, reducing the daily harvest coho salmon while conserving stocks needed to reach spawning escapement goals.

On November 2, 2001, the Federal Subsistence Board, acting through the delegated field official, initiated a coho salmon action reducing the daily harvest limit to two fish in the Klawock River and Lake for the period from November 2, 2001, through December 31, 2001. This action was necessary due to low coho salmon returns.

This regulatory action was necessary to assure the continued viability of the coho salmon runs and provide a long-term subsistence priority during a period of limited harvest opportunity.

The Board finds that additional public notice and comment requirements...
under the Administrative Procedure Act (APA) for this emergency closure are impracticable, unnecessary, and contrary to the public interest. Lack of appropriate and immediate conservation measures could seriously affect the continued viability of fish populations, adversely impact future subsistence opportunities for rural Alaskans, and would generally fail to serve the overall public interest. Therefore, the Board finds good cause pursuant to 5 U.S.C. 553(b)(3)(B) to waive additional public notice and comment procedures prior to implementation of this action and pursuant to 5 U.S.C. 553(d) to make this effective as indicated in the DATES section.

Conformance With Statutory and Regulatory Authorities

National Environmental Policy Act Compliance

A Final Environmental Impact Statement (FEIS) was published on February 28, 1992, and a Record of Decision on Subsistence Management for Federal Public Lands in Alaska (ROD) signed April 6, 1992. The final rule for Subsistence Management Regulations for Public Lands in Alaska, Subparts A, B, and C (57 FR 22940–22964, published May 29, 1992) implemented the Federal Subsistence Management Program and included a framework for an annual cycle for subsistence hunting and fishing regulations. A final rule that redefined the jurisdiction of the Federal Subsistence Management Program to include waters subject to the subsistence priority was published on January 8, 1999. (64 FR 1276.)

Compliance With Section 810 of ANILCA

The intent of all Federal subsistence regulations is to accord subsistence uses of fish and wildlife on public lands a priority over the taking of fish and wildlife on such lands for other purposes, unless restriction is necessary to conserve healthy fish and wildlife populations. A Section 810 analysis was completed as part of the FEIS process. The final Section 810 analysis determination appeared in the April 6, 1992, ROD which concluded that the Federal Subsistence Management Program, under Alternative IV with an annual process for setting hunting and fishing regulations, may have some local impacts on subsistence uses, but the program is not likely to significantly restrict subsistence uses.

Paperwork Reduction Act

The emergency closure does not contain information collection requirements subject to Office of Management andBudget (OMB) approval under the Paperwork Reduction Act of 1995.

Other Requirements

The emergency closure has been exempted from OMB review under Executive Order 12866.

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.) requires preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small business, organizations, or governmental jurisdictions. The exact number of businesses and the amount of trade that will result from this Federal land-related activity is unknown. The aggregate effect is an insignificant economic effect (both positive and negative) on a small number of small entities supporting subsistence activities, such as boat, fishing tackle, and gasoline dealers. The number of small entities affected is unknown; but, the effects will be seasonally and geographically-limited in nature and will likely not be significant. The Departments certify that the emergency closure will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Title VIII of ANILCA requires the Secretaries to administer a subsistence preference on public lands. The scope of this program is limited by definition to certain public lands. Likewise, the emergency closure has no potential takings of private property implications as defined by Executive Order 12630.

The Servicer has determined and certifies pursuant to the Unfunded Mandates Reform Act, 2 U.S.C. 1502 et seq. that the emergency closure will not impose a cost of $100 million or more in any given year on local or State governments or private entities. The implementation is by Federal agencies, and no cost is involved to any State or local entities or Tribal governments.

The Service has determined that the emergency closure meets the applicable standards provided in Sections 3(a) and 3(b)(2) of Executive Order 12988, regarding civil justice reform.

In accordance with Executive Order 13132, the emergency closure does not have sufficient federalism implications to warrant the preparation of Federalism Assessment. Title VIII of ANILCA precludes the State from exercising management authority over fish and wildlife resources on Federal lands. Cooperative salmon run assessment effects with ADF&G will continue.

In accordance with the President’s memorandum of April 29, 1994, “Government-to-Government Relations with Native American Tribal Governments” (59 FR 22951), Executive Order 13175, and 512 DM 2, we have evaluated possible effects on Federally recognized Indian tribes and have determined that there are no effects. The Bureau of Indian Affairs is a participating agency in this rulemaking.

On May 18, 2001, the President issued Executive Order 13211 on regulations that significantly affect energy supply, distribution, or use. This Executive Order requires agencies to prepare Statements of Energy when undertaking certain actions. As this action is not expected to significantly affect energy supply, distribution, or use, it is not a significant energy action and no Statement of Energy Effects is required.
