Applicants must specify the MSA or geographic area within a State where services are proposed.

SAMHSA/CSAT is limiting eligibility to applicants serving MSAs and States listed in Appendix B because in the absence of consistent reporting of HIV data by all jurisdictions, the best indicator of the magnitude of the epidemic is AIDS case rates derived from the CDC HIV/AIDS surveillance reports.

Available Funds: It is expected that approximately $16 million will be available for thirty-two (32) awards in FY 2003. Applicants proposing to enhance and/or expand substance abuse treatment may request not more than $500,000 in total costs (direct and indirect) per year. Applicants proposing only to enhance and/or expand outreach and pretreatment services may request not more than $400,000 in total costs (direct and indirect) per year. Applications with proposed budgets that exceed these amounts per year will be returned without review.

Period of Support: Awards may be requested for up to 5 years.

Criteria for Review and Funding: General Review Criteria: Competing applications requesting funding under this activity will be reviewed for technical merit in accordance with established PHS/SAMHSA peer review procedures. Review criteria that will be used by the peer review groups are specified in the application guidance material.

Award Criteria for Scored Applications: Applications will be considered for funding on the basis of their overall technical merit as determined through the peer review group and the appropriate National Advisory Council review process. Availability of funds will also be an award criterion. Additional award criteria specific to the programmatic activity may be included in the application guidance materials.

Catalog of Federal Domestic Assistance Number: 93.243.

Program Contact: For questions on program issues, contact: David C. Thompson, Division of Services Improvement, CSAT/SAMHSA, Rockwall II, 7th Floor, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–6523, (e-mail) dthompson@samhsa.gov.

For questions on grants management issues, contact: Steve Hudak, Division of Grants Management, OPS/SAMHSA, Rockwall II, 6th floor, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–9666, e-mail: shudak@samhsa.gov.

Public Health System Reporting Requirements: The Public Health System Impact Statement (PHSIS) is intended to keep State and local health officials apprised of proposed health services grant and cooperative agreement applications submitted by community-based nongovernmental organizations within their jurisdictions. Community-based nongovernmental service providers who are not transmitting their applications through the State must submit a PHSIS to the head(s) of the appropriate State and local health agencies in the area(s) to be affected not later than the pertinent receipt date for applications. This PHSIS consists of the following information:

- A copy of the face page of the application (Standard form 424).
- A summary of the project (PHSIS), not to exceed one page, which provides:
  1. A description of the population to be served.
  2. A summary of the services to be provided.
  3. A description of the coordination planned with the appropriate State or local health agencies.

State and local governments and Indian Tribal Authority applicants are not subject to the Public Health System Reporting Requirements. Application guidance materials will specify if a particular FY 2003 activity is subject to the Public Health System Reporting Requirements.

PHS Non-use of Tobacco Policy Statement: The PHS strongly encourages all grant and contract recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103–227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of a facility) in which regular or routine education, library, day care, health care, or early childhood development services are provided to children. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

Executive Order 12372: Applications submitted in response to the FY 2003 activity listed above are subject to the intergovernmental review requirements of Executive Order 12372, as implemented through DHHS regulations at 45 CFR part 100. E.O. 12372 sets up a system for State and local government review of applications for Federal financial assistance. Applicants (other than Federally recognized Indian tribal governments) should contact the State’s Single Point of Contact (SPOC) as early as possible to alert them to the prospective application(s) and to receive any necessary instructions on the State’s review process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. A current listing of SPOCs is included in the application guidance materials or on SAMHSA’s website under “Assistance with Grant Applications”. The SPOC should send any State review process recommendations directly to: Division of Extramural Activities, Policy, and Review, Substance Abuse and Mental Health Services Administration, Parklawn Building, Room 17–89, 5600 Fishers Lane, Rockville, Maryland 20857.

The due date for State review process recommendations is no later than 60 days after the specified deadline date for the receipt of applications. SAMHSA does not guarantee to accommodate or explain SPOC comments that are received after the 60-day cut-off.

Richard Kopanda,
Executive Officer, SAMHSA.

Receipt of a Permit Application (Smoot) for Incidental Take of the Houston Toad

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: Ralph Smoot (Applicant) has applied for an incidental take permit (TE–068275–0) pursuant to section 10(a) of the Endangered Species Act (Act). The requested permit would exempt the applicant from Section 9 prohibitions. The proposed take would occur as a result of the construction and occupation of Earth-sheltered condominiums on a 2.5-acre property on Highway 71, Bastrop County, Texas.

DATES: Written comments on the application should be received within 60 days of the date of this publication.

ADDRESSES: Persons wishing to review the application may obtain a copy by writing to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Room 4102, Albuquerque, New Mexico 87103. Persons wishing to review the EA/HCP may obtain a copy by contacting Clayton Napier, U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200, Austin, Texas 78758 (512/400–0057). Documents will be available for public inspection by written request, by appointment only,
during normal business hours (8 to 4:30) at the U.S. Fish and Wildlife Service, Austin, Texas. Written data or comments concerning the application and EA/HCP should be submitted to the Supervisor, U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200, Austin, Texas 78758 Austin, Texas. Please refer to permit number TE–068275–0 when submitting comments.

FOR FURTHER INFORMATION CONTACT: Clayton Napier, U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200, Austin, Texas 78758 (512/490–0057).

SUPPLEMENTARY INFORMATION: Section 9 of the Act prohibits the “taking” of endangered species such as the Houston toad. However, the Fish and Wildlife Service (Service), under limited circumstances, may issue permits to take endangered wildlife species incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for endangered species are at 50 CFR 17.22.

The Service has prepared the Environmental Assessment/Habitat Conservation Plan (EA/HCP) for the incidental take application. A determination of jeopardy or non-jeopardy to the species and a decision pursuant to the National Environmental Policy Act (NEPA) will not be made until at least 60 days from the date of publication of this notice. This notice is provided pursuant to section 10(c) of the Act and NEPA regulations (40 CFR 1506.6).

Applicant: Ralph Smoot plans to construct Earth-sheltered condominiums, within 5 years, on a 2.5-acre property on Highway 71, Bastrop County, Texas. This action will eliminate 2.5 acres or less of Houston toad habitat and result in indirect impacts to the toad within the property. The Applicant proposes to compensate for the loss of Houston toad habitat by providing $5,000.00 to the Houston Toad Conservation Fund at the National Fish and Wildlife Foundation for the specific purpose of land acquisition and management within Houston toad habitat.

Susan MacMullin,
Acting Regional Director, Region 2.

Fish and Wildlife Service

Notice of Availability of the Second Revision of the Recovery Plan for the Red-cockaded Woodpecker (Picoides borealis)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: We, the Fish and Wildlife Service, announce the availability of the second revision of the recovery plan for the red-cockaded woodpecker (Picoides borealis). The original plan was approved in 1979 and the first revision was approved in 1985. The endangered red-cockaded woodpecker is endemic to mature pine woodlands of the Southeastern United States and currently occurs in 11 States (Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Oklahoma, and Arkansas). Intensive research has greatly increased our understanding of the ecology of red-cockaded woodpeckers and has provided powerful management tools that have been highly successful in reversing the widespread declines of past decades. With appropriate management, the species can achieve full recovery. This second revision of the recovery plan describes in detail the ecology and management of red-cockaded woodpeckers, and outlines a mechanism to recover the species based on new insight into population and species viability.

ADDRESSES: Recovery plans that have been approved by the Fish and Wildlife Service are available on the Internet at http://endangered.fws.gov/recovery/index.html. Recovery plans may also be obtained from the Fish and Wildlife Reference Service, 5430 Grosvenor Lane, Suite 110, Bethesda, Maryland 20814, telephone 301/429–6403 or 800/582–3421. The fee for the plan varies depending on the number of pages of the plan. A limited supply of this revision to the red-cockaded woodpecker recovery plan is also available from Ralph Costa, U.S. Fish and Wildlife Service, Department of Forest Resources, 261 Lehotzky Hall, Clemson University, Clemson, South Carolina 29634 (telephone 864/656–2432). Additionally, the plan is available on the Clemson Field Office Web site at http://rcwrecovery.fws.gov.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Costa at the above address and telephone number.

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals or plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program. To help guide the recovery effort, we are working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act requires that during recovery plan development, we provide public notice and an opportunity for public review and comment. This revision to the recovery plan was released for public comment on September 13, 2000 (65 FR 55269), and the comment period was reopened on November 21, 2002 (67 FR 70237). Information presented during the comment periods has been considered in the preparation of this revision. The red-cockaded woodpecker was listed as an endangered species in 1970 (35 FR 16047). This taxon is endemic to open, mature and old-growth pine ecosystems in the Southeastern United States. Currently, there are an estimated 14,068 red-cockaded woodpeckers living in 5,627 known active clusters across 11 States. It is estimated that pre-European settlement there were 1 to 1.5 million groups of red-cockaded woodpeckers. Limiting factors for the red-cockaded woodpecker are those that directly affect the number of potential breeding groups, because this is the primary determinant of population size and trend. Multiple factors currently impact the persistence of breeding groups and, therefore, population and species viability. Foremost among these are the factors that limit suitable nesting habitat, namely fire suppression and lack of cavity trees. Another factor directly limiting the number of potential breeding groups is habitat fragmentation and consequent isolation of groups, which results in disrupted dispersal of helpers and failure to replace breeders. There are several other threats to the existence and recovery of the species, not limiting most populations currently, but which will become more important as the current limitations are addressed. Chief among these are the degradation
