The tribe and developers are currently conducting a marketing study to assist in determining the overall size of the proposed facility. At this time, the casino can be expected to be approximately 200,000 square feet in size, which would be constructed during Phase I. Phase II would include the construction and operation of a 300 room hotel on the project site. The casino footprint would consist of a combination of uses, including the main gaming hall, food and beverage facilities, banking and administration facilities, and possibly an event center. The conceptual design of the facility is expected to be completed prior to the public scoping meeting announced in this notice.
