The application plan calls for the proposed deepwater port terminal to be located outside State waters in the Gulf of Mexico on the U.S. Outer Continental Shelf (OCS). Beacon Port would consist of a Main Terminal, Riser Platform, and connecting pipelines. The Main Terminal would be located approximately 50 miles (80 km) off the coast, East-Southeast of Galveston, TX (approximately 45 miles (72 km) South of High Island, TX) in OCS lease block High Island Area 27 (HIA 27). The Riser Platform would be located approximately 29 miles off the coast, South-Southeast of Johnson’s Bayou, LA (approximately 27 miles South of Holly Beach, LA) in OCS lease block West Cameron 167 (WC 167). Beacon Port would serve as an LNG receiving, storage, and regasification facility. The Main terminal would be located in water depth of approximately 65 feet (20 m).

The proposed Beacon Port Main Terminal would include: two concrete Gravity Based Structures (GBS) that would contain the LNG storage tanks, LNG carrier berthing provisions, LNG unloading arms, low and high pressure pumps, vaporizers, metering, utility systems, general facilities and accommodations. The Main Terminal would be able to receive LNG carriers up to 253,000 cubic meters cargo capacity. LNG carrier arrival frequency would be planned to match specified terminal gas delivery rates. The terminal would have storage capacity for up to 300,000 cubic meters of LNG (150,000 cubic meters per tank) on site.

Regasification of LNG would be accomplished through the use of open rack vaporizers (ORV’s). In normal operation, four pumps would operate having a combined total flow rate of approximately 167.5 million gallons per day (26,400 m³/hr). At peak operation, five pumps would operate with a combined total flow rate of approximately 203 million gallons per day (32,000 m³/hr).

Beacon Port proposes the installation of approximately 46 miles of offshore natural gas transmission pipeline on the OCS. A 42-inch diameter pipeline would connect the Main Terminal with the Riser Platform. Three additional pipelines (24-inch, 20-inch, and 12.75-inch in diameter) are proposed to connect the Riser Platform with existing gas distribution pipelines in the West Cameron (WC) 167 OCS block. The deepwater port would be designed to handle an average delivery of approximately 1.5 billion standard cubic feet of natural gas per day (Bscfd) with a peak delivery of approximately 1.8 Bscfd.

Dated: May 18, 2005.

B. R. Emond, Acting Director of Standards, Marine Safety, Security, and Environmental Protection U.S. Coast Guard.

H. Keith Lesnick, Senior Transportation Specialist, Deepwater Ports Program Manager, U.S. Maritime Administration.
of Columbia, Commonwealth of the Northern Mariana Islands, Guam, U.S. Virgin Islands, and American Samoa. Annual Burden Estimates: 28 hours per year (56 respondents at 1/2 hour each).

Your comments are invited on: (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility; (2) the accuracy of the agency’s estimates of burden utility, and clarity of the information to be collected; and (4) ways to minimize the burden of collection of information on respondents, including through the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: April 18, 2005.
Hope Grey, Information Collection Clearance Officer, Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service

Information Collection Submitted to the Office of Management and Budget (OMB) for Approval Under the Paperwork Reduction Act; National Survey of Fishing, Hunting, and Wildlife-Associated Recreation (FHWAR)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (Fish and Wildlife Service) have submitted the collection of information described below to OMB for approval under the provisions of the Paperwork Reduction Act of 1995. The information collected for the National Survey of Fishing, Hunting, and Wildlife-Associated Recreation is needed to assist Federal and State agencies in administering the Sport Fish and Wildlife Restoration grant programs. The 2006 FHWAR will provide up-to-date information on the uses and demands for wildlife-related recreation resources, trends in uses of those resources, and a basis for developing and evaluating programs and projects to meet existing and future needs. We have conducted this survey every 5 years since 1955.

DATES: You must submit comments on or before June 23, 2005.

ADDRESSES: Send your comments and suggestions on this information collection reinstatement to the Desk Officer for the Department of the Interior at OMB–OIRA at (202) 395–6566 (fax) or OIRA_DOCKET@OMB.eop.gov (e-mail). Please provide a copy of your comments to Hope Grey, Information Collection Clearance Officer, Fish and Wildlife Service, MS 222–ARLSQ, 4401 North Fairfax Drive, Arlington, VA 22203 (mail); (703) 358–2269 (fax); or hope_grey@fws.gov (e-mail).

FOR FURTHER INFORMATION CONTACT: To request a copy of the information collection requirements, explanatory information, or related materials, contact Hope Grey at the addresses above or by phone at (703) 358–2482.

SUPPLEMENTARY INFORMATION: OMB regulations at 5 CFR 1320.8 which implement provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). Previously, we had approval from OMB to collect information on the 2001 FHWAR Survey under OMB control number 1018–0088. This approval expired on September 30, 2003. We have submitted a request to OMB to reinstate approval for the 2006 FHWAR information collection. We are requesting a 3-year term of approval for this information collection. Federal agencies may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. OMB has up to 60 days to approve or disapprove our information collection request, but may respond after 30 days. Therefore, to ensure that your comments receive consideration, send all comments and suggestions to OMB by the date listed in the DATES section.

On November 26, 2004, we published in the Federal Register (69 FR 68666) a notice of our intent to request information collection authority from OMB. In that notice, we solicited public comments for 60 days, ending on January 25, 2005. We received comments from only one individual regarding this notice. The commenter expressed an objection to using taxpayers’ money to collect information on hunting (which the commenter opposes) and to the survey being conducted every 5 years. The commenter recommended that groups like the Friends of Animals, Fund for Animals, and Humane Society be involved in collecting information. We note the concerns raised by this individual. However, we believe the FHWAR information collection provides an important means of measuring the extent of wildlife-related recreation and will be of great benefit to Federal and State agencies responsible for maintaining and enhancing fish and wildlife resources in the United States. The FHWAR collects information on nonconsumptive activities (observing, feeding, and photographing wildlife) as well as on consumptive activities (hunting and fishing). The survey, conducted only every 5 years, is paid for by grants from multistate conservation grant programs authorized by Public Law 106–408 (sections 113 and 122). Money for the programs comes from Federal excise tax and import duties on hunting, shooting, boating, and angling equipment and from a tax on motorboat and small engine fuel—not from general tax revenues. The Census Bureau was selected to collect the information for the survey because of its expertise, excellent response rates, reliable methodology, and 39 years of experience collecting information for the FHWAR.

We collect the information in conjunction with carrying out our responsibilities under the Federal Aid in Sport Fish Restoration Act (16 U.S.C. 777–777M), commonly referred to as the Dingell-Johnson Act, and the Federal Aid in Wildlife Restoration Act (16 U.S.C. 669–669i), commonly referred to as the Pittman-Robertson Act. Under these acts, as amended, we provide approximately $500 million in grants annually to States for projects that support sport fish and wildlife management and restoration, including the improvement of fish and wildlife habitats, fishing and boating access, fish stocking, and hunting and fishing opportunities. We also provide grants for aquatic education and hunter education, maintenance of completed projects, and research into problems affecting fish and wildlife resources. These projects help to ensure that the American people have adequate opportunities for fish and wildlife recreation.

The 2006 FHWAR will be the 11th conducted since 1955. We sponsor the survey at the States’ request, which is made through the International Association of Fish and Wildlife Agencies. The Census Bureau collects the information using computer-assisted telephone or in-person interviews. A sample of sportspersons and wildlife watchers will be selected from a household survey that is randomly selected. Respondents will be asked about their participation and expenditures. Three detailed interviews
