50 CFR Part 32
2005–2006 Refuge-Specific Hunting and Sport Fishing Regulations; Proposed Rule
DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service
50 CFR Part 32
RIN 1018–AU14
2005–2006 Refuge-Specific Hunting and Sport Fishing Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service proposes to add six refuges to the list of areas open for hunting and/or sport fishing programs and increase the availability of activities at seven other refuges. We also propose to implement pertinent refuge-specific regulations for those activities and amend certain regulations on other refuges that pertain to migratory game bird hunting, upland game hunting, big game hunting, and sport fishing for the 2005–2006 season.

DATES: We must receive your comments on or before August 5, 2005.

ADDRESSES: Submit written comments to Chief, Division of Conservation Planning and Policy, National Wildlife Refuge System, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Room 670, Arlington, VA 22203. See SUPPLEMENTARY INFORMATION for information on electronic submission. For information on specific refuges’ public use programs and the conditions that apply to them or for copies of compatibility determinations for any refuge(s), contact individual programs at the addresses/phone numbers given in “Available Information for Specific Refuge(s),” under SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT: Leslie A. Marler, (703) 358–2397; Fax (703) 358–2248.

SUPPLEMENTARY INFORMATION: The National Wildlife Refuge System Administration Act of 1966 closes national wildlife refuges in all States except Alaska to all uses until opened. The Secretary of the Interior (Secretary) may open refuge areas to any use, including hunting and/or sport fishing, upon a determination that such uses are compatible with the purposes of the refuge and National Wildlife Refuge System (Refuge System or we) mission. The action also must be in accordance with provisions of all laws applicable to the areas, developed in coordination with the appropriate State fish and wildlife agency(ies), consistent with the principles of sound fish and wildlife management and administration, and otherwise in the public interest. These requirements ensure that we maintain the biological integrity, diversity, and environmental health of the Refuge System for the benefit of present and future generations of Americans.

We annually review refuge hunting and sport fishing programs to determine whether to include additional refuges or whether individual refuge regulations governing existing programs need modifications, deletions, or additions. Changing environmental conditions, State and Federal regulations, and other factors affecting fish and wildlife populations and habitat may warrant modifications to refuge-specific regulations to ensure the continued compatibility of hunting and sport fishing programs and to ensure that these programs will not materially interfere with or detract from the fulfillment of refuge purposes or the Refuge System’s mission.

Provisions governing hunting and sport fishing on refuges are in Title 50 of the Code of Federal Regulations in part 32 (50 CFR part 32). We regulate hunting and sport fishing on refuges to:
- Ensure compatibility with refuge purpose(s);
- Properly manage the fish and wildlife resource(s);
- Protect other refuge values;
- Ensure refuge visitor safety; and
- Provide opportunities for quality wildlife-dependent recreation.

On many refuges where we decide to allow hunting and sport fishing, our general policy of adopting regulations identical to State hunting and sport fishing regulations is adequate in meeting these objectives. On other refuges, we must supplement State regulations with more-restrictive Federal regulations to ensure that we meet our management responsibilities, as outlined in the “Statutory Authority” section. We issue refuge-specific hunting and sport fishing regulations when we open wildlife refuges to migratory game bird hunting, upland game hunting, big game hunting, or sport fishing. These regulations list the wildlife species that you may hunt or fish, seasons, bag or creel limits, methods of hunting or sport fishing, descriptions of areas open to hunting or sport fishing, and other provisions as appropriate. You may find previously issued refuge-specific regulations for hunting and sport fishing in 50 CFR part 32. In this rulemaking, we are also proposing to standardize and clarify the existing language of these regulations.

Plain Language Mandate

In this rule we made some of the revisions to the individual refuge units to comply with a Presidential mandate to use plain language in regulations; as such, these particular revisions do not modify the substance of the previous regulations. These types of changes include using “you” to refer to the reader and “we” to refer to the Service, using the word “allow” instead of “permit” when we do not require the use of a permit for an activity, and using active voice.

Statutory Authority

Amendments enacted by the National Wildlife Refuge System Improvement Act of 1997 (Improvement Act) build upon the Administration Act in a manner that provides an “organic act” for the Refuge System similar to those that exist for other public Federal lands. The Improvement Act serves to ensure that we effectively manage the Refuge System as a national network of lands, waters, and interests for the protection and conservation of our Nation’s wildlife resources. The Administration Act states first and foremost that we focus Refuge System mission on conservation of fish, wildlife, and plant resources and their habitats. The Improvement Act requires the Secretary, before allowing a new use of a refuge, or before expanding, renewing, or extending an existing use of a refuge, to determine that the use is compatible. The Improvement Act established as the policy of the United States that wildlife-dependent recreation, when compatible, is a legitimate and appropriate public use of the Refuge System, through which the American public can develop an appreciation for fish and wildlife. The Act established six wildlife-dependent recreational uses, when compatible, as the priority general public uses of the Refuge System. These uses are: hunting, fishing, wildlife observation and photography, and environmental education and interpretation.

The Recreation Act authorizes the Secretary to administer areas within the Refuge System for public recreation as an appropriate incidental or secondary use only to the extent that doing so is practicable and not inconsistent with the primary purpose(s) for which Congress and the Service established the areas. The Recreation Act requires that any recreational use of refuge lands be compatible with the primary purpose(s) for which we established the refuge and
not inconsistent with other previously authorized operations.

The Administration Act and Recreation Act also authorize the Secretary to issue regulations to carry out the purposes of the Acts and regulate uses.

We develop specific management plans for each refuge prior to opening it to hunting or sport fishing. In many cases, we develop refuge-specific regulations to ensure the compatibility of the programs with the purpose(s) for which we established the refuge and the Refuge System mission. We ensure initial compliance with the Administration Act and the Recreation Act for hunting and sport fishing on newly acquired refuges through an interim determination of compatibility made at or near the time of acquisition. These regulations ensure that we make the determinations required by these acts prior to adding refuges to the lists of areas open to hunting and sport fishing in 50 CFR part 32. We ensure continued compliance by the development of comprehensive conservation plans, specific plans, and by annual review of hunting and sport fishing programs and regulations.

**New Hunting and Sport Fishing Programs**

In preparation for new openings, we include the following documents in each refuge’s “opening package” (which the Region completes, the Regional Director reviews, and the refuge copies and sends to the Headquarters Office for review of compliance with the various opening requirements): (1) Step-down management plan; (2) appropriate National Environmental Policy Act (NEPA) documentation (e.g., Categorical Exclusion, Environmental Assessment, or Environmental Impact Statement); (3) appropriate NEPA decision documentation (e.g., Finding of No Significant Impact, Record of Decision); (4) Endangered Species Act Section 7 evaluation; (5) copies of letters requesting State and, where appropriate, Tribal involvement and the results of the request(s); (6) draft news release; (7) outreach plan; and (8) draft refuge-specific regulation. Upon approval of these documents, the Regional Director(s) is certifying that the opening of these refuges to hunting and/or sport fishing has been found to be compatible with the principles of sound fish and wildlife management and administration and otherwise will be in the public interest.

In accordance with the Administration Act and Recreation Act, we have determined that these openings are compatible and consistent with the purpose(s) for which we established the respective refuges and the Refuge System mission. A copy of the compatibility determinations for these respective refuges is available by request to the Regional office noted under the heading “Available Information for Specific Refuges.”

A. refuge added to part 32 and activity(ies) opened  
B. refuge already listed in part 32; added hunt category  
C. refuge already listed in part 32; species added to hunt category  
D. refuge already listed in part 32; land added  
E. refuge opened to that activity for many years but never listed in part 32; correcting administrative oversight  
F. refuge removed from part 32 (explanation below)

*Previously published.

We are adding 6 refuges to the list of open refuges in part 32 and increasing hunt categories at 7 refuges already listed in part 32.

Lands acquired as “waterfowl production areas,” which we generally manage as part of wetland management districts, are open to the hunting of migratory game birds, upland game, big game, and sport fishing subject to the provisions of State law and regulations (see 50 CFR 32.1 and 32.4). We are adding these existing wetland management districts (WMDs) to the list of refuges open for all four activities in 50 CFR part 32 this year: Big Stone WMD, Minnesota Valley WMD both in the State of Minnesota; and Arrowwood WMD, Audubon WMD, Chase Lake WMD, Crosby WMD, J. Clark Salyer WMD, Kulm WMD, Lostwood WMD, Long Lake WMD, Tewaukon WMD, and Valley City WMD all in the State of North Dakota.

We are correcting the following administrative errors in 50 CFR part 32: we are removing Pocasse National Wildlife Refuge in the State of South Dakota as it was an easement refuge, and it is no longer a part of the Refuge System; we are removing Rock Lake National Wildlife Refuge in the State of North Dakota as it closed to hunting in 1996; we are adding Great Meadows in the State of Massachusetts as open to fishing as it has been open to that opportunity for years but never reflected in 50 CFR part 32; and we are adding migratory bird hunting to San
Bernardino National Wildlife Refuge in the State of Arizona, as it has been open to that opportunity since 1986, and that was never reflected in 50 CFR part 32.

This document proposes to codify in the Code of Federal Regulations, all of the Service’s hunting and/or sport fishing regulations that are applicable at Refuge System units previously opened to hunting and/or sport fishing. We are doing this to better inform the general public of the requirements at each refuge, to increase understanding and compliance with these requirements, and to make enforcement of these regulations more efficient. In addition to now finding these conditions in 50 CFR part 32, visitors to our refuges will usually find these terms and conditions reiterated in literature distributed by each refuge or posted on signs.

We have cross-referenced a number of existing regulations in 50 CFR parts 26, 27, and 32 to assist hunting and sport fishing visitors with understanding safety and other legal requirements on refuges. This redundancy is deliberate, with the intention of improving safety and compliance in our hunting and sport fishing programs.

Fish Advisory

For health reasons, anglers should review and follow State-issued consumption advisories before enjoying recreational sport fishing opportunities on Service-managed waters. You can find information about current fish consumption advisories on the Internet at: http://www.epa.gov/ost/fish/.

Request for Comments

You may comment on this proposed rule by any one of several methods:

1. Federal eRulemaking Portal at http://www.regulations.gov. Follow the instructions at that site for submitting comments.

2. You may mail comments to: Chief, Division of Conservation Planning and Policy, National Wildlife Refuge System, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Room 670, Arlington, VA 22203.

3. You may comment via the Internet to: refugesystempolicycomments@fws.gov. Please submit Internet comments as an ASCII file, avoiding the use of special characters and any form of encryption. Please also include: “Attn: 1018–AU14” and your full name and return mailing address in your Internet message. If you only use your e-mail address, we will consider your comment to be anonymous and will not consider it in the final rule. If you do not receive a confirmation from the system that we have received your Internet message, contact us directly at (703) 358–2036.

4. You may fax comments to: Chief, Division of Conservation Planning and Policy, National Wildlife Refuge System, at (703) 358–2248.

5. Finally, you may hand-deliver or courier comments to the address mentioned above. In light of increased security measures, please call (703) 358–2036 before hand delivering comments.

We seek comments on this proposed rule and will accept comments by any of the methods described above. Our practice is to make comments, including the names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home addresses from the rulemaking record, which we will honor to the extent allowable by law. Also, in some circumstances, we would withhold from the rulemaking record a respondent’s identifiable information by law. If you wish for us to withhold your name and/or address, you must state this request prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses and from individuals identifying themselves as representatives or officials of organizations or businesses available for public inspection in their entirety.

Department of the Interior policy is, whenever practicable, to afford the public a meaningful opportunity to participate in the rulemaking process. We considered providing a 30-day, rather than a 30-day, comment period. However, we determined that an additional 30-day delay in processing these refuge-specific hunting and sport fishing regulations would hinder the effective planning and administration of our hunting and sport fishing programs. That delay would jeopardize establishment of hunting and sport fishing programs this year, or shorten their duration. Many of these rules also relieve restrictions and allow the public to participate in recreational activities on a number of refuges. In addition, in order to continue to provide for previously authorized hunting opportunities while at the same time providing for adequate resource protection, we must be timely in providing modifications to certain hunting programs on some refuges.

When finalized, we will incorporate this regulation into 50 CFR part 32. Part 32 contains general provisions and refuge-specific regulations for hunting and sport fishing on refuges.

Clarity of This Regulation

Executive Order (E.O.) 12866 requires each agency to write regulations that are easy to understand. We invite your comments on how to make this rule easier to understand, including answers to questions such as the following: (1) Are the requirements in the rule clearly stated? (2) Does the rule contain technical language or jargon that interferes with its clarity? (3) Does the format of the rule (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce its clarity? (4) Would the rule be easier to understand if it were divided into more (but shorter) sections? (5) Is the description of the rule in the “Supplementary Information” section of the preamble helpful in understanding the rule? (6) What else could we do to make the rule easier to understand?

Send a copy of any comments on how we could make this proposed rule easier to understand to: Office of Regulatory Affairs, Department of the Interior, Room 7229, 1849 C Street, NW., Washington, DC 20240. You may e-mail your comments to: Execsec@ios.doi.gov.

Regulatory Planning and Review

In accordance with the criteria in Executive Order 12866, the Service asserts that this rule is not a significant regulatory action. The Office of Management and Budget (OMB) makes the final determination under Executive Order 12866.

a. This rule will not have an annual economic effect of $100 million or adversely affect an economic sector, productivity, jobs, the environment, or other units of the government. A cost–benefit and full economic analysis is not required. However, a brief assessment follows to clarify the costs and benefits associated with the proposed rule.

The purpose of this rule is to add six refuges to the list of areas open for hunting and/or sport fishing programs and increase the activities available at seven other refuges. The refuges are located in the States of Alabama, California, Connecticut, Maine, Massachusetts, Minnesota, Missouri, New Hampshire, New York, and Washington. Fishing and hunting are two of the wildlife-dependent uses of national wildlife refuges that Congress recognizes as legitimate and appropriate, and we should facilitate their pursuit, subject to such restrictions or regulations as may be necessary to ensure their compatibility with the purpose of each refuge. Many of the 545 existing national wildlife refuges already have programs where we allow fishing and hunting. Not all refuges
have the necessary resources and landscape that would make fishing and hunting opportunities available to the public. By opening these refuges to new activities, we have determined that we can make quality experiences available to the public. This rule establishes hunting and/or fishing programs and expands existing activities at the following refuges: Cahaba River National Wildlife Refuge in Alabama, Sacramento River and Stone Lakes National Wildlife Refuges in California, Stewart B. McKinney National Wildlife Refuge in Connecticut, Moosehorn National Wildlife Refuge in Maine, Assabet River, Great Meadows, and Oxbow National Wildlife Refuges in Massachusetts, Glacial Ridge National Wildlife Refuge in Minnesota, Squaw Creek National Wildlife Refuge in Missouri, Silvio O. Conte National Wildlife Refuge in New Hampshire, Wertheim National Wildlife Refuge in New York, and Julia Butler Hansen Refuge for the Columbian White-Tailed Deer in Washington.

We are correcting the following administrative errors in 50 CFR part 32: we are removing Pocasset National Wildlife Refuge in the State of South Dakota as it was an easement refuge, and it is no longer a part of the Refuge System; we are removing Rock Lake National Wildlife Refuge in the State of North Dakota as it closed to hunting back in 1996. Since both of these closures happened years ago, and we are just correcting 50 CFR part 32 to reflect this, there is no appreciable economic impact.

Lands acquired as “waterfowl production areas,” which we generally manage as part of wetland management districts (WMDs), are open to the hunting of migratory game birds, upland game, big game, and sport fishing subject to the provisions of State law and regulations (see 50 CFR 32.1 and 32.4). We are adding these existing WMDs to the list of refuges open for all four activities in part 32 this year: Big Stone WMD and Minnesota Valley WMD, both in the State of Minnesota; and Arrowwood WMD, Audubon WMD, Chase Lake WMD, Crosby WMD, J. Clark Salyer WMD, Kulm WMD, Lostwood WMD, Long Lake WMD, Tewaukon WMD, and Valley City WMD, all in the State of North Dakota. We do not expect any change in visitation rates at these wetland management districts because recreationists currently have the option to participate in these activities.

**Benefits Accrued**

Benefits from this proposed regulation would be derived from the new fishing and hunting days from opening the refuges to these activities. If the refuges establishing new fishing and hunting programs were a pure addition to the current supply of such activities, it would mean an estimated increase of 7,455 user days of hunting and 12,000 user days of fishing (Table 1).

These new fishing and hunting days would generate: (1) Consumer surplus (the net benefit received by recreationists); and (2) expenditures associated with fishing and hunting on the refuges.

Assuming the new days are a pure addition to the current supply, the additional days would create consumer surplus of approximately $919,000 annually [(7,455 days × $47.32 CS per day) + (12,000 days × $47.07 CS per day)] (Table 2). However, the participation trend is flat in fishing and hunting activities because the number of Americans participating in these activities has been stagnant since 1991. Any increase in the supply of these activities introduced by adding refuges where the activity is available will most likely be offset by other sites losing participants, especially if the new sites have higher quality fishing and/or hunting opportunities. Therefore, the additional consumer surplus is more likely to be smaller.

† Due to the unavailability of consistent consumer surplus estimates for these various site-specific activities, a national consumer surplus estimate is used for this analysis. The estimates are from: Kaval, Pam and John Loomis. "Updated Outdoor Recreation Use Values with Emphasis on National Park Recreation." October 2003.

In addition to benefits derived from consumer surplus, this proposed rule would also have benefits from the recreation-related expenditures. Due to the unavailability of site specific expenditure data, we use the national estimates from the 2001 National Survey of Fishing, Hunting, and Wildlife Associated Recreation to identify expenditures for food and lodging, transportation, and other incidental expenses. Using the average expenditures for these categories with the expected maximum additional participation on the Refuge System yields approximately $818,000 in fishing-related expenditures and $718,000 in hunting-related expenditures (Table 3).

By having ripple effects throughout the economy, these direct expenditures are only part of the economic impact of waterfowl hunting. Using a national impact multiplier for hunting activities (2.73) derived from the report “Economic Importance of Hunting in America” and a national impact multiplier for sportfishing activities (2.79) from the report “Sportfishing in America” for the estimated increase in direct expenditures yields a total economic impact of approximately $4.2 million (2004 dollars) (Southwick Associates, Inc., 2003). (Using a local impact multiplier would yield more accurate and smaller results. However, we employed the national impact multiplier due to the difficulty in developing local multipliers for each specific region.)

Since we know that most of the fishing and hunting occurs within 100 miles of a participant’s residence, then it is unlikely that most of this spending would be “new” money coming into a local economy and, therefore, this spending would be offset with a decrease in some other sector of the local economy. The net gain to the local economies would be no more than $4.2 million, and most likely considerably less. Since 80 percent of the participants travel less than 100 miles to engage in hunting and fishing activities, their spending patterns would not add new money into the local economy and, therefore, the real impact would be on the order of $848,000 annually.

In summary, we estimate that the additional fishing and hunting opportunities would yield approximately $919,000 in consumer surplus and $848,000 in recreation-related expenditures annually. The 10-year quantitative benefit for this rule would be $17.7 million ($15.5 million discounted at 3 percent or $13.3 million discounted at 7 percent).

b. This proposed rule will not create inconsistencies with other agencies’ actions. This action pertains solely to the management of the Refuge System. The fishing and hunting activities located on national wildlife refuges account for approximately 1 percent of the available supply in the United States. Any small, incremental change in the supply of fishing and hunting opportunities will not measurably impact any other agency’s existing programs.
c. This proposed rule will not materially affect entitlements, grants, user fees, loan programs, or the rights and obligations of their recipients. This proposed rule does not affect entitlement programs. There are no grants or other Federal assistance programs associated with public use of national wildlife refuges.

d. This proposed rule will not raise novel legal or policy issues. This proposed rule opens six additional refuges for fishing and hunting programs and increases the activities available at seven other refuges. This proposed rule continues the practice of allowing recreational public use of national wildlife refuges. Many refuges in the Refuge System currently have opportunities for the public to hunt and fish on refuge lands.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (as amended by the Small Business Regulatory Enforcement Fairness Act [SBREFA] of 1996) (5 U.S.C. 601, et seq.), whenever a Federal agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies that the rule would not have a significant economic impact on a substantial number of small entities. Thus, for a regulatory flexibility analysis to be required, impacts must exceed a threshold for “significant impact” and a threshold for a “substantial number of small entities.” See 5 U.S.C. 605(b).

SBREFA amended the Regulatory Flexibility Act to require Federal agencies to provide a statement of the factual basis for certifying that a rule would not have a significant economic impact on a substantial number of small entities.

This proposed rule does not increase the number of recreation types allowed on the System but establishes hunting and/or fishing programs on six refuges and expands activities at seven other refuges. As a result, opportunities for wildlife-dependent recreation on national wildlife refuges will increase. The changes in the amount of allowed use are likely to increase visitor activity on these national wildlife refuges. But, as stated in the Regulatory Planning and Review section, this is likely to be a substitute site for the activity and not necessarily an increase in participation rates for the activity. To the extent visitors spend time and money in the area of the refuge that they would not have spent there anyway, they contribute new income to the regional economy and benefit local businesses.

Many small businesses within the retail trade industry (such as hotels, gas stations, taxidermy shops, bait and tackle shops, etc.) may benefit from some increased refuge visitation. A large percentage of these retail trade establishments in the majority of affected counties qualify as small businesses (Table 4).

We expect that the incremental recreational opportunities will be scattered, and so we do not expect that the rule will have a significant economic effect (benefit) on a substantial number of small entities in any region or nationally. Using the estimate derived in the Regulatory Planning and Review section, we expect approximately $848,000 to be spent in total in the refuges’ local economies. The maximum increase ($4.2 million if all spending were new money) at most would be less than 1 percent for local retail trade spending (Table 4).

With the small increase in overall spending anticipated from this proposed rule, it is unlikely that a substantial number of small entities will have more than a small benefit from the increased spending near the affected refuges. Therefore, we certify that this rule will not have a significant economic effect on a substantial number of small entities as defined under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.). An initial/final Regulatory Flexibility Analysis is not required. Accordingly, a Small Entity Compliance Guide is not required.

Small Business Regulatory Enforcement Fairness Act

The proposed rule is not a major rule under 5 U.S.C. 804(2), the Small
Business Regulatory Enforcement Fairness Act. We anticipate no significant employment or small business effects. This rule:
a. Does not have an annual effect on the economy of $100 million or more. The additional fishing and hunting opportunities at the seven refuges would generate angler and hunter expenditures with an economic impact estimated at $4.2 million per year (2004 dollars). Consequently, the maximum benefit of this rule for businesses both small and large would not be sufficient to make this a major rule. The impact would be scattered across the country and would most likely not be significant in any local area.
b. Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. This proposed rule will have only a slight effect on the costs of hunting and fishing opportunities for Americans. Under the assumption that any additional hunting and fishing opportunities would be of high quality, participants would be attracted to the refuge. If the refuge were closer to the participants’ residences, then a reduction in travel costs would occur and benefit the participants. The Service does not have information to quantify this reduction in travel cost but assumes that, since most people travel less than 100 miles to hunt and fish, the reduced travel cost would be small for the additional days of hunting and fishing generated by this proposed rule. We do not believe this proposed rule to affect the supply or demand for fishing and hunting opportunities in the United States and, therefore, it should not affect prices for fishing and hunting equipment and supplies, or the retailers that sell equipment. Additional refuge hunting and fishing opportunities would account for less than 0.001 percent of the available opportunities in the United States.
c. Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises. This proposed rule represents only a small proportion of recreational spending of a small number of affected anglers and hunters, approximately a maximum of $4.2 million annually in impact. Therefore, this rule will have no measurable economic effect on the wildlife-dependent industry, which has annual sales of equipment and travel expenditures of $72 billion nationwide. Refuges that establish hunting and fishing programs may hire additional staff from the local community to assist with the programs, but this would not be a significant increase because we are only opening six refuges to hunting and/ or fishing and only seven refuges are increasing programs by this proposed rule.

Unfunded Mandates Reform Act
Since this rule applies to public use of federally owned and managed refuges, it does not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than $100 million per year. The rule does not have a significant or unique effect on State, local, or Tribal governments or the private sector. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 et seq.) is not required.

Takings (Executive Order 12630)
In accordance with Executive Order 12630, the rule does not have significant takings implications. This regulation will affect only visitors to national wildlife refuges and describe what they can do while they are on a refuge.

Federalism (Executive Order 13132)
As discussed in the Regulatory Planning and Review and Unfunded Mandates Reform Act sections above, this rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment under Executive Order 13132. In preparing this proposed rule, we worked with State governments.

Civil Justice Reform (Executive Order 12988)
In accordance with Executive Order 12988, the Office of the Solicitor has determined that the rule does not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of the Order. The regulation will clarify established regulations and result in better understanding of the regulations by refuge visitors.

Energy Supply, Distribution or Use (Executive Order 13211)
On May 18, 2001, the President issued Executive Order 13211 on regulations that significantly affect energy supply, distribution, and use. Executive Order 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. Because this rule opens six refuges to hunting and/or sport fishing programs and makes minor changes to other refuges open to those activities, it is not a significant regulatory action under Executive Order 12866 and is not expected to significantly affect energy supplies, distribution, and use. Therefore, this action is a not a significant energy action and no statement of Energy Effects is required.

Consultation and Coordination with Indian Tribal Governments (Executive Order 13175)
In accordance with Executive Order 13175, we have evaluated possible effects on federally recognized Indian tribes and have determined that there are no effects. We coordinate recreational use on national wildlife refuges with Tribal governments having adjoining or overlapping jurisdiction before we propose the regulations. This regulation is consistent with and not less restrictive than Tribal reservation rules.

Paperwork Reduction Act
This regulation does not contain any information collection requirements other than those already approved by the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) (OMB Control Number is 1018–0102). See 50 CFR 25.23 for information concerning that approval. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Endangered Species Act Section 7 Consultation
In preparation for new openings, we include Section 7 consultation documents approved by the Service’s Endangered Species program in the refuge’s “openings package” for Regional review and approval from the Headquarters Office. We reviewed the changes in hunting and fishing regulations herein with regard to Section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1531–1544, as amended) (ESA). For the national wildlife refuges proposed to open for hunting and/or fishing we have determined that Moosehorn National Wildlife Refuge (bald eagle), Wertheim National Wildlife Refuge, Cahaba River National Wildlife Refuge, Julia Butler Hansen National Wildlife Refuge (Columbia white-tailed deer and bald eagle), Glacial Ridge National Wildlife Refuge, Squaw Creek National Wildlife Refuge (bald eagle), and Sacramento River National Wildlife Refuge will not likely adversely affect any endangered or threatened species or designated critical habitat; and Assabet River National Wildlife Refuge, Great Meadows National Wildlife Refuge,
Moosehorn National Wildlife Refuge (Atlantic salmon), Oxbow National Wildlife Refuge, Silvio O. Conte National Wildlife Refuge, Julia Butler Hansen National Wildlife Refuge (marbled murrelet, northern spotted owl, bull trout, howellia, Nelson’s checkermallow, streaked horned lark), Stewart B. McKinney National Wildlife Refuge, Squaw Creek National Wildlife Refuge (pipiing plover and least tern), and Stone Lakes National Wildlife Refuge will not affect any endangered or threatened species or designated critical habitat; and Squaw Creek National Wildlife Refuge (Eastern Massasauga rattlesnake) is not likely to jeopardize candidate or proposed species critical habitat.

We also comply with Section 7 of the ESA when developing Comprehensive Conservation Plans (CCPs) and step-down management plans for public use of refuges, and prior to implementing any new or revised public recreation program on a refuge as identified in 50 CFR 26.32. We also make determinations when required by the ESA before the addition of a refuge to the lists of areas open to hunting or fishing as contained in 50 CFR 32.7.

National Environmental Policy Act

We analyzed this rule in accordance with the criteria of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(C)) and 516 DM 6, Appendix 1. This rule does not constitute a major Federal action significantly affecting the quality of the human environment. An environmental impact statement/assessment is not required.

A categorical exclusion from NEPA documentation applies to this amendment of refuge-specific hunting and fishing regulations since it is technical and procedural in nature, and the environmental effects are too broad, speculative, or conjectural to lend themselves to meaningful analysis (516 DM 2, Appendix 1.10).

Prior to the addition of a refuge to the list of areas open to hunting and fishing in 50 CFR part 32, we develop hunting and fishing plans for the affected refuges. We incorporate these proposed refuge hunting and fishing activities in the refuge CCPs and/or other step-down management plans, pursuant to our refuge planning guidance in 602 FW 1, 3, and 4. We prepare these CCPs and step-down plans in compliance with section 102(2)(C) of NEPA, and the Council on Environmental Quality’s regulations for implementing NEPA in 40 CFR parts 1500–1508. We invite the affected public to participate in the review, development, and implementation of these plans.
