SUPPLEMENTARY INFORMATION:

I. Background

In the Federal Register of April 14, 2006 (71 FR 19526), FDA published a notice of availability of a draft guidance entitled “Recommended Study Design and Evaluation of Effectiveness Studies for Swine Respiratory Disease Claims.” The notice gave interested persons until June 28, 2006, to comment on the draft guidance. FDA received a few comments on the draft guidance. We considered those comments as we finalized the guidance. The guidance, announced in this document, finalizes the draft guidance that we announced on April 14, 2006.

The purpose of the guidance is to provide the Center for Veterinary Medicine’s (CVM’s) current thinking regarding the recommended design and evaluation of effectiveness studies for swine respiratory disease (SRD) claims. This guidance identifies specific, detailed recommendations for sponsors of new animal drug applications to consider when they design and write protocols for SRD effectiveness studies.

This level 1 guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance satisfies the agency’s current thinking on the topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.
