specifically request information on the current distribution of populations and evaluation of threats faced by the species in relation to the five listing factors (as defined in section 4(a)(1) of the Act) and the species’ listed status as judged against the definition of threatened or endangered. Finally, we solicit recommendations pertaining to the development of, or potential updates to, recovery plans and additional actions or studies that would benefit these species in the future.

Our practice is to make information, including names and home addresses of respondents, available for public review. Before including your address, telephone number, e-mail address, or other personal identifying information in your response, you should be aware that your entire submission—including your personal identifying information—may be made publicly available at any time. While you can ask us in your response to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Mail or hand-deliver information on the following species to the U.S. Fish and Wildlife Service Field Supervisor, at the corresponding addresses below. You may also view information we receive in response to this notice, as well as other documentation in our files, at the following locations by appointment, during regular business hours.

### How Are These Species Currently Listed?

Table 1 provides current listing information for the species under active review in this notice. Also, the List, which covers all listed species, is available on our Internet site at http://endangered.fws.gov/wildlife.html#Species.

### Definitions

To help you submit information about the species we are reviewing, we provide the following definitions:

**Species** includes any species or subspecies of fish, wildlife, or plant, and any distinct population segment of any species of vertebrate, which interbreeds when mature; 

**Endangered species** means any species that is in danger of extinction throughout all or a significant portion of its range; and

**Threatened species** means any species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

### How Do We Determine Whether a Species Is Endangered or Threatened?

Section 4(a)(1) of the Act establishes that we determine whether a species is endangered or threatened based on one or more of the five following factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) Overutilization for commercial, recreational, scientific, or educational purposes; (C) Disease or predation; (D) The inadequacy of existing regulatory mechanisms; or (E) Other natural or manmade factors affecting its continued existence. Section 4(a)(1) of the Act requires that our determination be made on the basis of the best scientific and commercial data available.

### What Could Happen as a Result of Our Review?

For each species under review, if we find new information that indicates a change in classification may be warranted, we may propose a new rule that could do one of the following: (a) Reclassify the species from threatened to endangered (uplist); (b) reclassify the species from endangered to threatened (downlist); or (c) remove the species from the List (delist).

If we determine that a change in classification is not warranted, then the species will remain on the List under its current status.
