DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service

50 CFR Part 92
RIN 1018–AV53

Migratory Bird Subsistence Harvest in Alaska; Harvest Regulations for Migratory Birds in Alaska During the 2008 Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service or we) is publishing migratory bird subsistence harvest regulations in Alaska for the 2008 season. This proposed rule establishes regulations that prescribe dates when harvesting of birds may occur, species that can be taken, and methods and means excluded from use. These regulations were developed under a Co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives. These regulations enable the continuation of customary and traditional subsistence uses of migratory birds in Alaska. The rulemaking is necessary because the regulations governing the subsistence harvest of migratory birds in Alaska are subject to annual review. This rulemaking proposes region-specific regulations that go into effect on April 2, 2008, and expire on August 31, 2008.

DATES: Comments on the proposed subsistence harvest regulations for migratory birds in Alaska must be submitted by December 14, 2007.

ADDRESSES: You may submit comments on this proposed rule by any of the following methods:
1. U.S. mail or hand delivery: Regional Director, Alaska Region, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, AK 99503.
2. Fax: (907) 786–3306.
3. E-mail: ambcc@fws.gov.

FOR FURTHER INFORMATION CONTACT: Fred Armstrong, (907) 786–3887; or Donna Dewhurst, (907) 786–3499, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Mail Stop 201, Anchorage, AK 99503.

SUPPLEMENTARY INFORMATION:

How Do I Find the History of These Regulations?

Background information, including past events leading to this action, accomplishments since the Migratory Bird Treaties with Canada and Mexico were amended, and a history addressing conservation issues can be found in the following Federal Register notices: August 16, 2002 (67 FR 53511); July 21, 2003 (68 FR 43010); April 2, 2004 (69 FR 17318); April 8, 2005 (70 FR 18244); February 28, 2006 (71 FR 10404); and April 11, 2007 (72 FR 18138). These documents are readily available at http://alaska.fws.gov/ambcc/regulations.htm.

Why Is This Current Rulemaking Necessary?

This current rulemaking is necessary because the migratory bird harvest season is closed unless opened, and the regulations governing subsistence harvest of migratory birds in Alaska are subject to public review and annual approval. The Alaska Migratory Bird Co-management Council (Co-management Council) held a meeting in April 2007 to develop recommendations for changes effective for the 2008 harvest season. These recommendations were presented to the Service Regulations Committee (SRC) on August 1 and 2, 2007, and were approved.

This rule proposes regulations for the taking of migratory birds for subsistence uses in Alaska during 2008. This rule lists migratory bird species that are proposed to be open or closed to harvest, as well as proposed season openings and closures by region.

How Will the Service Continue To Ensure That the Subsistence Harvest Will Not Raise Overall Migratory Bird Harvest?

The Service has an emergency closure provision (§ 92.21), so that if any significant increases in harvest are documented for one or more species in a region, an emergency closure can be requested and implemented. Eligibility to harvest under the regulations established in 2003 was limited to permanent residents, regardless of race, in villages located within the Alaska Peninsula, Kodiak Archipelago, the Aleutian Islands and in areas north and west of the Alaska Range (§ 92.5). These geographical restrictions opened the initial subsistence migratory bird harvest to the combined population of Alaska residents. High-population areas such as Anchorage, the Matanuska-Susitna and Fairbanks North Star boroughs, the Kenai Peninsula roaded area, the Gulf of Alaska roaded area, and Southeast Alaska were excluded from the eligible subsistence harvest areas.

Based on petitions requesting inclusion in the harvest, in 2004, we added 13 additional communities based on criteria set forth in § 92.5(c). These communities were Gulkana, Gakona, Tazlina, Copper Center, Mentasta Lake, Chitina, Chistochina, Tatitlek, Chenega, Port Graham, Nanwalek, Tyonek, and Hoona, with a combined population of 2,766. In 2005, we added three additional communities for glaucous-winged gull gathering only, based on petitions requesting inclusion. These southeastern communities were Craig, Hydaburg, and Yakutat, with a combined population of 2,459.

In 2007, we have enacted the Alaska Department of Fish and Game’s (ADF&G) request to expand the Fairbanks North Star Borough excluded area to include the Central Interior area. This excluded the following additional communities from participation in this harvest: Big Delta/Fort Greely, Healy, McKinley Park/Village and Ferry, with a combined population of 2,812. These removed communities reduced the percentage of the State population included in the subsistence harvest to 13 percent.

Subsistence harvest has been monitored for the past 15 years through the use of annual household surveys in the most heavily used subsistence harvest areas, e.g., Yukon/Kuskokwim Delta. Continuation of this monitoring enables tracking of any major changes or trends in levels of harvest and user participation after legalization of the harvest. The Office of Management and Budget (OMB) has approved the information collection and assigned OMB control number 1018–0124, which expires on January 31, 2010.

What Birds Will Be Open To Harvest in 2008?

At the request of the North Slope Borough Fish and Game Management Committee, the Co-management Council recommended continuing into 2008 the provisions originally established in 2005 to allow subsistence use of yellow-billed loons inadvertently caught in subsistence fishing (gill) nets on the North Slope. Yellow-billed loons are culturally important for the Inupiat Eskimo of the North Slope for use in traditional dance regalia. A maximum of 20 yellow-billed loons may be caught in 2008 pursuant to this provision.

Individuals in the North Slope Borough Department of Wildlife is required by the end of each season. In
addition, the North Slope Borough has asked fishermen, through announcements on the radio and through personal contact, to report all entanglements of loons to better estimate the levels of injury or mortality caused by gill nets. In 2006, two yellow-billed loons were reported taken in fishing nets and an additional one was found alive in a net and released. This provision, to allow subsistence possession and use of yellow-billed loons caught in fishing gill nets, is subject to annual review and renewal by the SRC.

We are proposing to consolidate the lists of birds closed and open to harvest (currently in §§ 92.31 and 92.32, respectively) into one open list and to move this list to subpart C (permanent regulations at § 92.22). We would also add the following clarifying statement: “You may harvest birds or gather eggs from the following species, listed in taxonomic order, within all included regions. When birds are listed at the species level, all subspecies existing in Alaska are also open to harvest. All bird species not listed are closed to harvesting and egg gathering.” We excluded some bird species from the list purely on the basis of current population concerns, and we will reopen the harvest of these species if their population status improves. This proposal was requested by the Executive Director of the Alaska Migratory Bird Co-management Council. By going from two bird lists, an open list and a closed list, to just an open list, we could save thousands of dollars per year. Up until now, we have been printing both lists in the Federal Register each year, at both the proposed and final rule stage. This action would also clarify and simplify the regulations as to which bird species can be legally harvested, eliminating the confusion caused by situations when birds are not listed anywhere but are illegal to harvest, such as all Passerines.

What Is Proposed for Change in the Region-Specific Regulations for 2008?

We are proposing to remove from the 2006–07 regulation the Special Area Closure in the Yukon/Kuskokwim Delta Region that included the goose colonies in Kokechik Bay, Tutakoke River, Kiggigak Island Colony, Baird Peninsula, and Baird Island. This proposal was requested by the Association of Village Council Presidents. Removal of this Special Area Closure would make the regulation consistent with the Pacific Flyway recommendation to place the harvest of brant under a less restrictive status.

We are proposing to amend the migratory bird harvest seasons for the Kodiak Archipelago to extend the early season 10 days until June 30 for seabird harvesting (closed period would then be July 1–31), and remain the same for all other birds. This proposal was requested by the Kodiak Regional Advisory Council to allow for variations in the nesting phenology of seabirds, primarily to accommodate egg gathering on the later-nesting black-legged kittiwakes.

We are proposing to amend the migratory bird harvest seasons for the Northwest Arctic Region to move the seabird egg-gathering season start date from July 3 to May 20. This proposal was requested by the Maniilaq Association to accommodate harvesting of gull eggs, primarily glaucous, glaucous-winged, mew and Sabine’s gulls. Gulls typically initiate egg laying earlier than other seabirds such as alcids.

We are proposing to add a special brant open season from June 20 through July 5 for the coastline surrounding Wainwright within the Southern Unit of the North Slope Region. The open area would consist of the coastline, from mean high water line outward to include open water, from Nokotlek Point east to longitude line 158°30’ W. This proposal would allow for harvest of non-nesting, failed nesting, and sub-adult black brant migrating from western Alaska to their molting areas on the North Slope. This proposal was requested by the North Slope Borough Department of Wildlife Management to allow for the continuation of Wainwright’s customary and traditional harvest of brant (non- or failed nesters and sub-adult) migrating to their molting areas. This would be a very limited harvest of migrating brant only, to be used for a traditional celebration after a successful whaling season. Black brant (Niglingaq) are a very important subsistence resource to the Wainwright Inupiat. The most concentrated hunting for brant takes place along the beach as brant migrate in large flocks northward during the months of May and June. Often people hunting brant and eiders stay at traditional campsites along the coastline within a day’s travel of Wainwright. One or several families set up tents on the sand or atop banks and may remain there for several days. Brant hunters may sit in driftwood blinds on the beach near camp if the birds are flying overhead, or they may go out onto the ice if birds are flying more offshore. Much of the brant harvest in June is in preparation for Nalukataq (blanket toss). Nalukataq is a traditional community feast and recognition for successful whaling crews, which is usually held mid-to-late June. At this celebration, one of the main courses served to the entire community and visiting guests is duck and goose soup. Black brant is one type of goose that is harvested specifically for the Nalukataq feast.

Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Statutory Authority

We derive our authority to issue these regulations from the Migratory Bird Treaty Act of 1918, 16 U.S.C. 712(1), which authorizes the Secretary of the Interior, in accordance with the treaties with Canada, Mexico, Japan, and Russia, to “issue such regulations as may be necessary to assure that the taking of migratory birds and the collection of their eggs, by the indigenous inhabitants of the State of Alaska, shall be permitted for their own nutritional and other essential needs, as determined by the Secretary of the Interior, during seasons established so as to provide for the preservation and maintenance of stocks of migratory birds.”

Required Determinations

Executive Order 12866

Executive Order 12866 requires each agency to write regulations that are easy to understand. We invite your comments on how to make this rule easier to understand, including answers to questions such as the following:

(1) Are the requirements in the rule clearly stated?
(2) Does the rule contain technical language or jargon that interferes with its clarity?
(3) Does the format of the rule (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce its clarity?
(4) Would the rule be easier to understand if it were divided into more (but shorter) sections?
(5) Is the description of the rule in the “Supplementary Information” section of the preamble helpful in understanding the rule?
(6) What else could we do to make the rule easier to understand?

Send a copy of any comments regarding how we could make this rule easier to understand to: Office of
Regulatory Affairs, Department of the Interior, Room 7229, 1849 C Street NW., Washington, DC 20240. You may also e-mail the comments to this address: Exsec@ios.doi.gov.

OMB has determined that this document is not a significant rule subject to OMB review under Executive Order 12866.

(a) This rule will not have an annual economic effect of $100 million or more or adversely affect an economic sector, productivity, jobs, the environment, or other units of government. The rule does not provide for new or additional hunting opportunities, and therefore, will have minimal economic or environmental impact. This rule benefits those participants who engage in the subsistence harvest of migratory birds in Alaska in two identifiable ways: First, participants receive the consumptive value of the birds harvested; and second, participants get the cultural benefit associated with the maintenance of a subsistence economy and way of life. The Service can estimate the consumptive value for birds harvested under this rule but does not have a dollar value for the cultural benefit of maintaining a subsistence economy and way of life.

The economic value derived from the consumption of the harvested migratory birds has been estimated using the results of a paper by Robert J. Wolfe titled “Subsistence Food Harvests in Rural Alaska, and Food Safety Issues” (August 13, 1996). Using data from Wolfe’s paper and applying it to the areas that will be included in this process, we determined a maximum economic value of $6 million. This is the estimated economic benefit of the consumptive part of this rule for participants in subsistence hunting. The cultural benefits of maintaining a subsistence economy and way of life can be of considerable value to the participants, and these benefits are not included in this figure.

(b) This rule will not create inconsistencies with other agencies’ actions. We are the Federal agency responsible for the management of migratory birds, and coordinate with the State of Alaska’s Department of Fish and Game on management programs within Alaska. The State of Alaska is a member of the Alaska Migratory Bird Co-management Council.

(c) This rule will not materially affect entitlements, grants, user fees, loan programs, or the rights and obligations of their recipients. The rule does not affect entitlement programs.

(d) This rule will not raise novel legal or policy issues. The subsistence harvest regulations will go through the same national regulatory process as the existing migratory bird hunting regulations in 50 CFR part 20.

Regulatory Flexibility Act

The Department of the Interior certifies that this rule will not have a significant economic effect on a substantial number of small entities as defined under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). An initial regulatory flexibility analysis is not required. Accordingly, a Small Entity Compliance Guide is not required. The rule legalizes a pre-existing subsistence activity, and the resources harvested will be consumed by the harvesters or persons within their local community.

Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act, as discussed in the Executive Order 12866 section above.

(a) This rule will not have an annual effect on the economy of $100 million or more. It will legalize and regulate a traditional subsistence activity. It will not result in a substantial increase in subsistence harvest or a significant change in harvesting patterns. The commodities being regulated under this rule are migratory birds. This rule deals with legalizing the subsistence harvest of migratory birds and, as such, does not involve commodities traded in the marketplace. A small economic benefit from this rule derives from the sale of equipment and ammunition to carry out subsistence hunting. Most, if not all, businesses that sell hunting equipment in rural Alaska would qualify as small businesses. We have no reason to believe that this rule will lead to a disproportionate distribution of benefits.

(b) This rule will not cause a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. This rule does not deal with traded commodities and, therefore, does not have an impact on prices for consumers.

(c) This rule does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises. This rule deals with the harvesting of wildlife for personal consumption. It does not regulate the marketplace in any way to generate effects on the economy or the ability of businesses to compete.

Unfunded Mandates Reform Act

We have determined and certified pursuant to the Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.) that this rule will not impose a cost of $100 million or more in any given year on local, State, or tribal governments or private entities. A statement containing the information required by this Act is therefore not necessary. Participation on regional management bodies and the Co-management Council will require travel expenses for some Alaska Native organizations and local governments. In addition, they will assume some expenses related to coordinating involvement of village councils in the regulatory process. Total coordination and travel expenses for all Alaska Native organizations are estimated to be less than $300,000 per year. In the Notice of Decision (65 FR 16405; March 28, 2000), we identified 12 partner organizations (Alaska Native non-profits and local governments) to administer the regional programs. The Alaska Department of Fish and Game will also incur expenses for travel to Co-management Council and regional management body meetings. In addition, the State of Alaska will be required to provide technical staff support to each of the regional management bodies and to the Co-management Council. Expenses for the State’s involvement may exceed $100,000 per year, but should not exceed $150,000 per year. When funding permits, we make annual grant agreements available to the partner organizations and the Alaska Department of Fish and Game to help offset their expenses.

Paperwork Reduction Act

This rule has been examined under the Paperwork Reduction Act of 1995 and has been found to contain no information collection requirements. We have, however, received OMB approval of associated voluntary annual household surveys used to determine levels of subsistence take. The OMB control number for the information collection is 1018–0124, which expires on January 31, 2010. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Federalism Effects

As discussed in the Executive Order 12866 and Unfunded Mandates Reform Act sections above, this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment under Executive Order 12866 and Unfunded Mandates Reform Act.
Order 13132. We worked with the State of Alaska on development of these regulations.

Civil Justice Reform—Executive Order 12988

The Department, in promulgating this rule, has determined that it will not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of Executive Order 12988.

Taking Implication Assessment

This rule is not specific to particular land ownership, but applies to the harvesting of migratory bird resources throughout Alaska. Therefore, in accordance with Executive Order 12630, this rule does not have significant taking implications.

Government-to-Government Relations With Native American Tribal Governments

In accordance with the President’s memorandum of April 29, 1994, “Government-to-Government Relations With Native American Tribal Governments” (59 FR 22951), and Executive Order 13175 (65 FR 67249; November 6, 2000), concerning consultation and coordination with Indian Tribal Governments, we have consulted with Alaska tribes and evaluated the rule for possible effects on tribes or trust resources, and have determined that there are no significant effects. The rule will legally recognize the subsistence harvest of migratory birds and their eggs for tribal members, as well as for other indigenous inhabitants.

Endangered Species Act Consideration

Prior to issuance of annual spring and summer subsistence regulations, we will comply with the requirements of section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536; hereinafter the Act) to ensure that these regulations are not likely to jeopardize the continued existence of any species listed as endangered or threatened, or destroy or adversely modify any designated critical habitats for such species, and that they are consistent with conservation programs for those species. Consultations under Section 7 of the Act conducted in connection with the environmental assessment for the annual subsistence take regulations may cause us to change these regulations. Our biological opinion resulting from the Section 7 consultation is a public document available for public inspection at the address indicated under the caption ADDRESSES.

National Environmental Policy Act Consideration

The annual regulations and options were considered in the Environmental Assessment, “Managing Migratory Bird Subsistence Hunting in Alaska: Hunting Regulations for the 2008 Spring/Summer Harvest,” issued August 15, 2007. Copies are available from the address indicated under the caption ADDRESSES.

Energy Supply, Distribution, or Use (Executive Order 13211)

On May 18, 2001, the President issued Executive Order 13211 on regulations that significantly affect energy supply, distribution, and use. Executive Order 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. Because this rule would allow only for traditional subsistence harvest and would improve conservation of migratory birds by allowing effective regulation of this harvest, it is not a significant regulatory action under Executive Order 12866. Consequently, it is not expected to significantly affect energy supplies, distribution, and use. Therefore, this action is not a significant energy action under Executive Order 13211 and no Statement of Energy Effects is required.

List of Subjects in 50 CFR Part 92

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Subsistence, Treaties, Wildlife.

For the reasons set out in the preamble, we propose to amend title 50, chapter I, subchapter G, of the Code of Federal Regulations as follows:

PART 92—MIGRATORY BIRD SUBSISTENCE HARVEST IN ALASKA

1. The authority citation for part 92 continues to read as follows:

Subpart C—General Regulations Governing Subsistence Harvest

2. In subpart C, add § 92.22 to read as follows:

§ 92.22 Subsistence migratory bird species.

You may harvest birds or gather eggs from the following species, listed in taxonomic order, within all included areas except Southeast Alaska, which is restricted to Glaucous-winged gull egg harvesting only. When birds are listed at the species level, all subspecies existing in Alaska are also open to harvest. All bird species not listed are closed to harvesting and egg gathering.

(a) Family Anatidae.

2. Snow Goose (Chen caerulescens).

3. Lesser Canada Goose (Branta canadensis parvipes).

4. Taverner’s Canada Goose (Branta canadensis taverneri).

5. Aleutian Canada Goose (Branta canadensis leucopareia)—except in the Semidi Islands.

6. Cackling Canada Goose (Branta canadensis minimus)—except no egg gathering is permitted.

7. Black Brant (Branta bernicla nigricans)—except no egg gathering is permitted in the Yukon/Kuskokwim Delta and the North Slope regions.

8. Tundra Swan (Cygnus columbianus)—except in Units 9(D) and 10.

10. Eurasian Wigeon (Anas penelope).

15. Northern Pintail (Anas acuta).

18. Redhead (Aythya americana).

22. King Eider (Somateria spectabilis).

23. Common Eider (Somateria mollissima).

24. Harlequin Duck (Histrionicus histrionicus).

25. Surf Scoter (Melanitta perspicillata).

27. Black Scoter (Melanitta nigra).

28. Long-tailed Duck (Clangula hyemalis).

29. Bufflehead (Bucephala albeola).

30. Common Goldeneye (Bucephala clangula).

31. Barrow’s Goldeneye (Bucephala islandica).

32. Hooded Merganser (Lophodytes cucullatus).

33. Common Merganser (Mergus merganser).

34. Red-breasted Merganser (Mergus serrator).

(b) Family Gaviidae.

1. Red-throated Loon (Gavia stellata).

2. Arctic Loon (Gavia arctica).

3. Pacific Loon (Gavia pacifica).

4. Common Loon (Gavia immer).

5. Yellow-billed Loon (Gavia adamsii)—In the North Slope Region.
only, a total of up to 20 yellow-billed loons inadvertently caught in fishing nets may be kept for subsistence purposes.

(c) Family Podicipedidae.
(1) Northern Fulmar (Fulmarus glacialis).
(2) [Reserved].
(e) Family Phalacrocoracidae.
(1) Common Ringed Plover (Charadrius hiaticula).
(h) Family Haematopodidae.
(1) Black Oystercatcher (Haematopus bachmani).
(2) [Reserved].
(g) Family Charadriidae.
(1) Greater Yellowlegs (Tringa melanoleuca).
(2) Lesser Yellowlegs (Tringa flavipes).
(3) Spotted Sandpiper (Actitis macularia).
(4) Bar-tailed Godwit (Limosa lapponica).
(5) Ruddy Turnstone (Arenaria interpres).
(6) Semipalmated Sandpiper (Calidris pusilla).
(7) Western Sandpiper (Calidris mauri).
(8) Least Sandpiper (Calidris minutilla).
(9) Baird’s Sandpiper (Calidris bairdii).
(10) Sharp-tailed Sandpiper (Calidris acuminata).
(11) Dunlin (Calidris alpina).
(12) Long-billed Dowitcher (Limnodromus scolopaceus).
(13) Common Snipe (Gallinago gallinago).
(14) Red-necked phalarope (Phalaropus lobatus).
(15) Red phalarope (Phalaropus fulicarius).
(i) Family Larididae.
(1) Pomarine Jaeger (Stercorarius pomarinus).
(2) Parasitic Jaeger (Stercorarius parasiticus).
(3) Long-tailed Jaeger (Stercorarius longicaudus).
(4) Bonaparte’s Gull (Larus philadelphia).
(5) Mew Gull (Larus canus).
(6) Herring Gull (Larus argentatus).
(7) Slaty-backed Gull (Larus schistisagus).
(8) Glaucous-winged Gull (Larus glaucescens).
(9) Glaucous Gull (Larus hyperboreus).
(10) Sabine’s Gull (Xema sabini).
(11) Black-legged Kittiwake (Rissa tridactyla).
(12) Red-legged Kittiwake (Rissa brevirostris).
(13) Ivory Gull (Pagophila eburnea).
(14) Arctic Tern (Sterna paradisaea).
(15) Aleutian Tern (Sterna aleutica).
(k) Family Alcidae.
(1) Common Murre (Uria aalge).
(2) Thick-billed Murre (Uria lomvia).
(3) Black Guillemot (Cepphus grylle).
(4) Pigeon Guillemot (Cepphus columna).
(5) Cassin’s Auklet (Ptychoramphus aleuticus).
(6) Parakeet Auklet (Aethia psittacula).
(7) Least Auklet (Aethia pusilla).
(8) Whiskered Auklet (Aethia pygmea).
(9) Crested Auklet (Aethia cristatella).
(10) Rhinoceros Auklet (Geronticus elUGINATUS).
(11) Horned Puffin (Fratercula corniculata).
(12) Tufted Puffin (Fratercula cirrhata).
(l) Family Strigidae.
(1) Great Horned Owl (Bubo virginianus).
(2) Snowy Owl (Nyctea scandiaca).

Subpart D—Annual Regulations Governing Subsistence Harvest

3. In subpart D, revise §92.31 to read as follows:

§92.31 Region-specific regulations.
The 2008 season dates for the eligible subsistence harvest areas are as follows:
(a) Aleutian/Pribilof Islands Region.
(1) Northern Unit (Pribilof Islands):
(i) Season: April 2–June 30.
(ii) Closure: July 1–August 31.
(b) [Reserved].
(2) Central Unit (Aleut Region):
(i) Season: April 2–June 30.
(ii) Closure: July 1–August 31.
(c) Bristol Bay Region.
(1) Season: April 2–June 15 and July 16–August 31 (general season); April 2–July 15 for seabird egg gathering only.
(ii) Closure: June 15–July 15 (general season); July 16–August 31 (seabird egg gathering).
(d) Bering Strait/Norton Sound Region.
(1) Stubbins/St. Michael Area (Point Romanof to Canal Point):
(i) Season: April 15–June 14 and July 16–August 31.
(ii) Closure: June 15–July 15.
(2) Remainder of the region:
(i) Season: April 2–June 14 and July 16–August 31 for waterfowl; April 2–July 19 and August 21–August 31 for all other birds.
(ii) Closure: June 15–July 15 for waterfowl; July 20–August 20 for all other birds.
(e) Kodiak Archipelago Region, except for the Kodiak Island roaded area, is closed to the harvesting of migratory birds and their eggs. The closed area consists of all lands and waters (including exposed tidelands) east of a line extending from Crag Point in the north to the west end of Salt Bay in the south and all lands and water south of a line extending from Termin Point along the north side of Cascade Lake extending to Anton Larson Bay. Waters adjacent to the closed area are closed to harvest within 500 feet from the water’s edge. The offshore islands are open to harvest.
(1) Season: April 2–June 30 and July 31–August 31 for seabirds; April 2–June 20 and July 22–August 31 for all other birds.

(2) Closure: July 1–July 30 for seabirds; June 21–July 21 for all other birds.

(f) Northwest Arctic Region.

(1) Season: April 2–June 9 and August 15–August 31 (hunting in general); waterfowl egg gathering May 20–June 9 only; seabird egg gathering May 20–July 12 only; hunting molting/non-nesting waterfowl July 1–July 31 only.

(2) Closure: June 10–August 14, except for the taking of seabird eggs and molting/non-nesting waterfowl as provided in paragraph (f)(1) of this section.

(g) North Slope Region.

(1) Southern Unit (Southwestern North Slope regional boundary east to Peard Bay, everything west of the latitude line 158°30′ W and south of the latitude line 70°45′ N to the west bank of the Ikpikpuk River, and everything south of the latitude line 69°45′ N between the west bank of the Ikpikpuk River to the east bank of Sagavinirktok River):

(i) Season: April 2–June 29 and July 30–August 31 for seabirds; April 2–June 19 and July 20–August 31 for all other birds.

(ii) Closure: June 30–July 29 for seabirds; June 20–July 19 for all other birds.

(iii) Special Black Brant Hunting Opening: From June 20–July 5. The open area would consist of the coastline, from mean high water line outward to include open water, from Nokottek Point east to longitude line 158°30′ W. This includes Peard Bay, Kugra Bay, and Wainwright Inlet, but not the Kuk and Kugra river drainages.

(2) Northern Unit (At Peard Bay, everything east of the longitude line 158°30′ W and north of the latitude line 70°45′ N to west bank of the Ikpikpuk River, and everything north of the latitude line 69°45′ N between the west bank of the Ikpikpuk River to the east bank of Sagavinirktok River):

(i) Season: April 2–June 6 and June 7–August 31 for king and common eiders; April 2–June 15 and July 16–August 31 for all other birds.

(ii) Closure: June 7–July 6 for king and common eiders; June 16–July 15 for all other birds.

(3) Eastern Unit (East of eastern bank of the Sagavanirktok River):

(i) Season: April 2–June 19 and July 20–August 31.

(ii) Closure: June 20–July 19.

(4) All Units: Yellow-billed loons. Annually, up to 20 yellow-billed loons total for the region may be caught inadvertently in subsistence fishing nets in the North Slope Region and kept for subsistence use. Individuals must report each yellow-billed loon inadvertently caught while subsistence gill net fishing to the North Slope Borough Department of Wildlife Management by the end of the season.

(h) Interior Region.

(1) Season: April 2–June 14 and July 16–August 31; egg gathering May 1–June 14 only.

(2) Closure: June 15–July 15.

(i) Upper Copper River Region (Harvest Area: State of Alaska Game Management Units 11 and 13) (Eligible communities: Gulkana, Chitina, Talzina, Copper Center, Gakona, Mentasta Lake, Chistochina and Cantwell).

(1) Season: April 15–May 26 and June 27–August 31.

(3) The Copper River Basin communities listed above also documented traditional use harvesting birds in Unit 12, making them eligible to hunt in this unit using the seasons specified in paragraph (h) of this section.

(j) Gulf of Alaska Region.

(1) Prince William Sound Area (Harvest area: Unit 6[D]), (Eligible Chugach communities: Chenega Bay, Tatitlek).

(i) Season: April 2–May 31 and July 1–August 31.

(ii) Closure: June 1–30.

(2) Kachemak Bay Area (Harvest area: Unit 15[C] South of a line connecting the tip of Homer Spit to the mouth of Fox River. Eligible Chugach communities: Port Graham, Nanwalek).

(i) Season: April 2–May 31 and July 1–August 31.

(ii) Closure: June 1–30.

(k) Cook Inlet (Harvest area: Portions of Unit 16[B] as specified below) (Eligible communities: Tyonek only).

(1) Season: April 2–May 31—That portion of Unit 16(B) south of the Skwentna River and west of the Yentna River, and August 1–31—That portion of Unit 16(B) south of the Beluga River, Beluga Lake, and the Tumviurate Glacier.

(2) Closure: June 1–July 31.

(l) Southeast Alaska.

(1) Community of Hoonah (Harvest area: National Forest lands in Icy Strait and Cross Sound, including Middle Pass Rock near the Inian Islands, Table Rock in Cross Sound, and other traditional locations on the coast of Yakobi Island. The land and waters of Glacier Bay National Park remain closed to all subsistence harvesting [50 CFR 100.3].

(i) Season: Glaucous-winged gull egg gathering only: May 15–June 30.

(ii) Closure: July 1–August 31.

(2) Communities of Craig and Hydaburg (Harvest area: Small islands and adjacent shoreline of western Prince of Wales Island from Point Baker to Cape Chacon, but also including Coronation and Warren islands).

(i) Season: Glaucous-winged gull egg gathering only: May 15–June 30.

(ii) Closure: July 1–August 31.

(3) Community of Yakutat (Harvest area: Icy Bay [Icy Cape to Pt. Riu], and coastal lands and islands bordering the Gulf of Alaska from Pt. Manby southeast to Dry Bay).

(j) Season: Glaucous-winged gull egg gathering only: May 15–June 30.

(ii) Closure: July 1–August 31.

§§ 92.32 and 92.33 [Removed and Reserved]

4. Remove and reserve §§ 92.32 and 92.33.

David M. Verhey,
Acting Assistant Secretary for Fish and Wildlife and Parks.

Marine Mammals; Advance Notice of Proposed Rulemaking

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Advance notice of proposed rulemaking (ANPR); extension of comment period.

SUMMARY: On September 13, 2007, NMFS published an ANPR soliciting public comments on revisions to its implementing regulations at 50 CFR part 216 governing the issuance of permits for scientific research and enhancement activities involving marine mammals. Written comments were due by November 13, 2007. NMFS has decided to allow additional time for submission of public comments on this action.

DATES: The public comment period for this action has been extended for 30 days. Written comments must be received or postmarked by December 13, 2007.

ADDRESSES: You may submit comments by any one of the following methods:
