(1) Type of Information Collection: Revision of an existing information collection.
(2) Title of the Form/Collection: Application to Extend/Change Nonimmigrant Status.
(4) Affected public who will be asked or required to respond, as well as brief abstract: Primary: Individuals or households. This information collection is used to determine eligibility for the requested immigration benefit; the form will serve as a standardized request for the benefit sought and will ensure that basic information required to assess eligibility is provided by all applicants.
(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: 261,867 responses at 45 minutes (.75) per response.
(6) An estimate of the total public burden (in hours) associated with the collection: 196,400 annual burden hours.

If you have additional comments, suggestions, or need a copy of the information collection instrument, please visit the USCIS Web site at: http://www.regulations.gov/fdmspublic/component/main. We may also be contacted at: USCIS, Regulatory Management Division, 111 Massachusetts Avenue, NW., 3rd floor, Suite 3008, Washington, DC 20529; telephone number 202–708–8377.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[DOCKET No. FR–5125–N–42]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

DATES: Effective Date: October 19, 2007.

FOR FURTHER INFORMATION CONTACT: Kathy Ezell, Department of Housing and Urban Development, 451 Seventh Street, SW., Room 7262, Washington, DC 20410; telephone (202) 708–1234; TTY number for the hearing- and speech-impaired (202) 708–2565, (these telephone numbers are not toll-free), or call the toll-free Title V information line at 800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in National Coalition for the Homeless v. Veterans Administration, No. 88–2503–OG (D.D.C.), HUD publishes a Notice, on a weekly basis, identifying unutilized, underutilized, excess and surplus Federal buildings and real property that HUD has reviewed for suitability for use to assist the homeless. Today’s Notice is for the purpose of announcing that no additional properties have been determined suitable or unsuitable this week.

Dated: October 11, 2007
Mark R. Johnston, Deputy Assistant Secretary for Special Needs.

Fish and Wildlife Service

Recovery Plan for Nosa Luta or Rota Bridled White-eye (Zosterops rotensis)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of the Recovery Plan for the Nosa Luta or Rota Bridled White-eye (Zosterops rotensis). This species, which is found only on the island of Rota in the Commonwealth of the Northern Mariana Islands, was federally listed as endangered in 2004 (69 FR 3022). In 1999, the population was estimated to be approximately 1,000 individuals and the species’ core range consisted of approximately 628 acres (254 hectares) of forest above 490 feet (150 meters) elevation. Available information indicates that habitat loss and degradation and predation by introduced rats (Rattus spp.) and black drongos (Dicrurus macrocercus) may be having some impact on the n Rosa Luta population. Due to its restricted range and small population size, the species is also highly susceptible to random catastrophic events like typhoons and the accidental introduction of new predators like the brown treesnake (Boiga irregularis), and avian diseases...
like west Nile virus. Therefore, recovery actions in this plan focus on protecting and enhancing forests in the species’ range; determining the specific habitat requirements of the species to better manage areas for the species’ conservation; assessing the impact of black drongos and rats on nosa Luta, and controlling these species as appropriate; preventing the introduction of new predators and avian diseases; and developing techniques to safeguard the species from extinction due to random catastrophic events. Due to the limited information available about the species and its threats, this recovery plan focuses on ten years of the recovery process. As additional information is learned about the species and its threats, recovery strategies and measures should be reassessed to determine the steps needed for downlisting and then delisting the species.

The primary objectives of this recovery plan are to stop further declines in the range and composition of the nosa Luta population, develop safeguards to prevent the species from going extinct, and reverse population declines to population levels estimated in 1982 (10,000 individuals). These objectives will be attained by conducting the following actions: (1) Reducing the decline of intact nosa Luta habitat to help reduce further population declines and range restrictions and increasing the amount of habitat available for sustaining an increasing nosa Luta population; (2) assessing the impact of black drongos and introduced rats on the nosa Luta population and controlling these species, as needed, to decrease their impacts on the nosa Luta; (3) preventing the brown treesnake and other threats, like West Nile virus, from becoming established on Rota to prevent further declines in the nosa Luta population; (4) evaluating the need and determining the requirements for establishing a second population of nosa Luta to prevent the species’ extinction; and (5) establishing an outreach program to increase public support for conservation of the nosa Luta.

**DEPARTMENT OF THE INTERIOR**

**Fish and Wildlife Service**

**Draft Environmental Assessment and Receipt of Application for an Enhancement of Survival Permit Associated With the Reintroduction of Black-Footed Ferrets on Private Land in Logan County, KS**

**AGENCY:** Fish and Wildlife Service, Interior

**ACTION:** Notice of availability and receipt of application.

**SUMMARY:** The U.S. Fish and Wildlife Service (Service) has prepared a draft Environmental Assessment (EA) for the proposed use of an Enhancement of Survival Permit (ESP) for the reintroduction of black-footed ferrets on private land in Logan County, Kansas, pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973. as amended (Act). The Service requests information, views, and opinions from the public via this notice.

**DATES:** Written comments on the permit application must be received by November 19, 2007.

**ADDRESSES:** Written data or comments should be submitted to the Assistant Regional Director, Fisheries-Ecological Services, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225–0486; facsimile 303–236–0027. Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act [5 U.S.C. 552A] and Freedom of Information Act [5 U.S.C. 552], by any party who submits a request for a copy of such documents within 30 days of the date of publication of this notice to Kris Olsen, by mail or by telephone at 303–236–4256. You also may obtain copies of the permit application and the draft EA by visiting our Web site at http://mountain-prairie.fws.gov/species/mammals/blackfootedferret/. All comments received from individuals become part of the official public record.

**FOR FURTHER INFORMATION CONTACT:** Kris Olsen, Regional Permit Coordinator ([ADDRESSES above]), telephone 303–236–4256, or Mike LeValley, Project Leader, Kansas Ecological Services Office, 2609 Anderson Avenue, Manhattan, Kansas 66502, telephone 785–359–3474, extension 105.

**SUPPLEMENTARY INFORMATION:** The applicant, Ecological Services, U.S. Fish and Wildlife Service, Manhattan, Kansas–3474, has requested issuance of an enhancement of survival permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Act. Our draft EA has been conducted pursuant to the National Environmental Policy Act (NEPA).

The black-footed ferret is one of the rarest mammals in North America. Formerly co-occurring across the ranges of all prairie dog species, its distribution has been greatly reduced due to disease (plague), poisoning of prairie dogs, and human-related habitat alteration. The only known current populations are those in captivity and those started through reintroduction of captive-bred individuals. Protection of this species and enhancement of its habitat on private land will benefit recovery efforts.

The primary objections of the proposed action are—(a) to experiment with reintroduction of ferrets into much smaller prairie dog colonies than has traditionally been attempted; and (b) to attempt to establish a self-sustaining population outside the known active occurrence of sylvatic plague. This action could result in the accidental taking of individual ferrets on or off the release properties, from normal agricultural activities and vehicular traffic, and the permit will cover that take. The property upon which ferrets will be reintroduced is currently used as grazing land and cropland and is bordered by private lands. At the present time, each property supports several active prairie dog colonies, which have been evaluated and determined potentially suitable for the support of ferrets. The proposed reintroduction experiment would continue for 5 years, after which it may be terminated or continued indefinitely depending upon success and cooperating landowner desires. For more information regarding specifics of the experiment, contact the Kansas Field Office (FOR FURTHER INFORMATION CONTACT above).

We have made the determination that the proposed activities will enhance survival and recovery of the black-footed ferret. This notice is provided pursuant to NEPA and section 10 of the Act.

The Service has evaluated the impacts of this action under the NEPA and determined that it is not a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the NEPA. The Service has also evaluated whether the activity complies with section 7 of the Act by conducting an intra-Service section 7 consultation on the issuance of the permit. The result of the biological opinion, in combination with the above finding and...
