not interfere with the primary purpose(s) of the refuge.

There are 389 national wildlife refuges where we administer hunting and/or fishing programs. We only collect user information at about 20 percent of these refuges. Information that we plan to collect will help us to:

(1) Administer and monitor hunting and fishing programs on refuges.
(2) Distribute hunting and fishing permits in a fair and equitable manner to eligible participants.

We are proposing nine new application and report forms associated with hunting and fishing on refuges. We may not allow all opportunities on all refuges; therefore, we developed different forms to simplify the process and avoid confusion for applicants. Not all refuges will use each form and some refuges may collect the identical information in a nonform format.

We will use the following application forms when we assign areas, dates, and/or types of hunts via a drawing because of limited resources, high demand, or when a permit is needed to hunt. We will issue application forms for specific periods, usually seasonally or annually.

(1) FWS Form 3-2359 (Big Game Hunt Application).
(2) FWS Form 3-2360 (Fishing Report).
(3) FWS Form 3-2361 (Migratory Bird Hunt Report).
(4) FWS Form 3-2362 (Upland/Small Game/Furbearer Report).

We plan to collect information on:

(1) Names of users so we can differentiate between responses.
(2) City and State of residence so that we can better understand if users are local or traveling.
(3) Dates, time, and number in party so we can identify use trends to allocate staff and resources.
(4) Details of success by species so that we can evaluate quality of experience and resource impacts.

Comments: On April 22, 2008, we published a notice in the Federal Register (72 FR 21640) announcing our intent to request that OMB approve this information collection. We solicited public comment for 60 days, ending on June 23, 2008. We did not receive any comments in response to this notice.

We again invite comments concerning this information collection on:

(1) whether or not the collection of information is necessary, including whether or not the information will have practical utility;
(2) the accuracy of our estimate of the burden for this collection of information;
(3) ways to enhance the quality, utility, and clarity of the information to be collected; and
(4) ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Notice of Decision and Availability of the Record of Decision for the Final Comprehensive Conservation Plan and Environmental Impact Statement for Trempealeau National Wildlife Refuge, Buffalo and Trempealeau Counties, WI

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of decision and availability of the record of decision.

SUMMARY: The U.S. Fish and Wildlife Service announces the decision and availability of the Record of Decision (ROD) for the Final Comprehensive Conservation Plan (CCP) and Environmental Impact Statement (EIS) for Trempealeau National Wildlife Refuge (NWR) in Wisconsin. A thorough analysis of the environmental, social, and economic considerations was completed and presented in the Final CCP/EIS. The Final CCP/EIS was released to the public and a Notice of Availability was published in the Federal Register on April 15, 2008, (73 FR 20329). The ROD documents the selection of Alternative C, the Preferred Alternative in the Final CCP/EIS, as the CCP for Trempealeau National Wildlife Refuge. The ROD was signed by the Regional Director, U.S. Fish and Wildlife Service, Midwest Region, on June 17, 2008.

ADDRESSES: The ROD and Final CCP/EIS may be viewed at Trempealeau National Wildlife Refuge Headquarters. You may obtain a copy of the ROD at the planning website http://www.fws.gov/midwest/planning/Trempealeau or by writing to the following address: U.S. Fish and Wildlife Service, Division of Conservation Planning, Bishop Henry Whipple Federal Building, 1 Federal Drive, Fort Snelling, Minnesota 55111.

FOR FURTHER INFORMATION CONTACT: Vickie Hirschboeck, (608) 539–2311 extension 12.

SUPPLEMENTARY INFORMATION: The Trempealeau National Wildlife Refuge CCP will provide management guidance for conservation of Refuge resources and public use activities during the next 15 years. Three alternatives and their consequences were described in detail in the Draft and Final Environmental Impact Statement. Under all alternatives threatened and endangered species will be protected; cultural resources will be protected; the Refuge’s Fire Management Plan will guide prescribed
Alternative, as the CCP for the Refuge.

Alternative A. No Action. Present management practices would continue under this Alternative. The No Action alternative is a status quo alternative where current conditions and trends continue. The alternative served as the baseline to compare and contrast with the other alternatives.

Alternative B. Wildlife and Habitat Focus. Under this alternative there would be minimal disturbance to wildlife from public use and increased level of effort on fish and wildlife habitat management. Habitat management would be a high priority. Invasive species control in the forested habitats would allow restoration of prairie and oak savanna. Prescribed fire and mowing would be used to manage 11 prairie units totaling 585 acres. Pine plantations would be eliminated.

Additional dikes and water control structures would be placed within existing impoundments. The deer hunt and furbearer management would continue as in the past. Public use opportunities will be expanded. Environmental education programs will be promoted at local schools and to community groups and the general public. Waterfowl hunting opportunities will be expanded by opening the area west of the Canadian National Railroad dike to a limited hunt. Ski trails will be maintained when conditions permit. Options to alleviate flooding of the entrance road to provide year-round access to the Refuge will be explored. Use of volunteers will be expanded in all programs. A Trempealeau NWR Friends Group will be started. A multi-purpose Room will be added to the office/visitor contact station to accommodate larger groups and provide a place for orientation. The staff will include the addition of three seasonal positions, including a biological technician, a tractor operator, and a park ranger. Law enforcement duties will be covered by a new position shared with the Winona District. A private lands biologist will also be shared with the Winona District.

Basis for the Decision

Alternative C is the most environmentally preferable alternative. Chapter 1 of the Final EIS identified three broad needs: (1) Contribute to the Refuge System mission; (2) fulfill the refuge needs through the most balanced and environmentally preferable alternative. The No Action alternative will ensure abundant public use; (4) neighboring landowners and community; and (5) administration and operations. Alternative C has long-term benefits to the natural and human environment. Alternative C will increase water quality and more effectively control invasive plants. This alternative will ensure abundant opportunity for all current recreational uses (e.g., hunting, fishing, observation and photography, interpretation and environmental education). It will have a positive economic impact and will increase the capacity of the Refuge to meet its purposes and mission of the Refuge System. Alternative C is also expected to lead to improved communication and problem solving with neighboring land owners.

Dated: July 22, 2008.

Charles M. Wooley,
Acting Regional Director, U.S. Fish and Wildlife Service, Fort Snelling, Minnesota.

Bureau of Indian Affairs

Jicarilla Apache Nation Liquor Ordinance

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes the Jicarilla Apache Nation Amended Liquor Ordinance. The amended Ordinance regulates and controls the possession, sale, and consumption of liquor within the Jicarilla Apache Nation. The Nation is located on trust land and this amended Ordinance allows for the possession and sale of alcoholic beverages within the exterior boundaries of the Jicarilla Indian Reservation. This amended Ordinance will increase the ability of the tribal government to control the distribution and possession of liquor within their Reservation and at the same time will provide an important source of revenue and strengthening of the tribal government and the delivery of tribal services.

DATES: Effective Date: This Act is effective as of September 8, 2008.

FOR FURTHER INFORMATION CONTACT: Iris A. Drew, Tribal Government Services Officer, Southwest Regional Office, 1001 Indian School Road, Albuquerque, New Mexico 87104; Telephone (505) 563–3530; Fax (505) 563–3060; or Elizabeth Colliflower, Office of Tribal Services, 1849 C Street, NW., Mail Stop 4513–
