50 CFR Part 20
RIN 1018–AV62

Migratory Bird Hunting; Proposed Migratory Bird Hunting Regulations on Certain Federal Indian Reservations and Ceded Lands for the 2008–09 Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (hereinafter, Service or we) proposes special migratory bird hunting regulations for certain Tribes on Federal Indian reservations, off-reservation trust lands, and ceded lands for the 2008–09 migratory bird hunting season.

DATES: We will accept all comments on the proposed regulations that are postmarked or received in our office by August 25, 2008.

ADDRESSES: You may submit comments on the proposals by one of the following methods:

• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

• U.S. mail or hand-delivery: Public Comments Processing, Attn: 1018–AV62; Division of Policy and Directives Management; U.S. Fish and Wildlife Service; 4401 N. Fairfax Drive, Suite 222; Arlington, VA 22203.

We will not accept e-mail or faxes. We will post all comments on http://www.regulations.gov. This generally means that we will post any personal information you provide us (see the Public Comments section below for more information).

SUPPLEMENTARY INFORMATION: In the May 28, 2008, Federal Register (73 FR 30712), we requested proposals from Indian Tribes wishing to establish special migratory bird hunting regulations for the 2008–09 hunting season, under the guidelines described in the June 4, 1985, Federal Register (50 FR 23467). In this supplemental proposed rule, we propose special migratory bird hunting regulations for 28 Indian Tribes, based on the input we received in response to the May 28, 2008, proposed rule. As described in that document/proposed rule, the promulgation of annual migratory bird hunting regulations involves a series of rulemaking actions each year. This proposed rule is part of that series.

We developed the guidelines for establishing special migratory bird hunting regulations for Indian Tribes in response to tribal requests for recognition of their reserved hunting rights and, for some Tribes, recognition of their authority to regulate hunting by both tribal and nontribal hunters on their reservations. The guidelines include possibilities for:

1. On-reservation hunting by both tribal and nontribal hunters, with hunting by nontribal hunters on some reservations to take place within Federal frameworks but on dates different from those selected by the surrounding States;

2. On-reservation hunting by tribal members only, outside of the usual Federal frameworks for season dates and length, and for daily bag and possession limits; and

3. Off-reservation hunting by tribal members on ceded lands, outside of usual framework dates and season length, with some added flexibility in daily bag and possession limits.

In all cases, the regulations established under the guidelines must be consistent with the March 10 to September 1 closed season mandated by the 1916 Convention Between the United States and Great Britain (for Canada) for the Protection of Migratory Birds (Treaty). The guidelines apply to those Tribes having recognized reserved hunting rights on Federal Indian reservations (including off-reservation trust lands) and on ceded lands. They also apply to establishing migratory bird hunting regulations for nontribal hunters on all lands within the exterior boundaries of reservations where Tribes have full wildlife management authority over such hunting or where the Tribes and affected States otherwise have reached agreement over hunting by nontribal hunters on lands owned by non-Indians within the reservation. Tribes usually have the authority to regulate migratory bird hunting by nonmembers on Indian-owned reservation lands, subject to Service approval. The question of jurisdiction is more complex on reservations that include lands owned by non-Indians, especially when the surrounding States have established or intend to establish regulations governing hunting by non-Indians on these lands. In such cases, we encourage the Tribes and States to reach agreement on regulations that would apply throughout the reservations. When appropriate, we will consult with a Tribe and State with the aim of facilitating an accord. We also will consult jointly with tribal and State officials in the affected States where Tribes wish to establish special hunting regulations for tribal members on ceded lands. Because of past questions regarding interpretation of what events trigger the consultation process, as well as who initiates it, we provide the following clarification. We routinely provide copies of Federal Register publications pertaining to migratory bird management to all State Directors, Tribes, and other interested parties. It is the responsibility of the States, Tribes, and others to notify us of any concern regarding any feature(s) of any regulations. When we receive such notification, we will initiate consultation.

Our guidelines provide for the continued harvest of waterfowl and other migratory game birds by tribal members on reservations where such harvest has been a customary practice. We do not oppose this harvest, provided it does not take place during the closed season defined by the Treaty, and does not adversely affect the status of the migratory bird resource. Before developing the guidelines, we reviewed available information on the current status of migratory bird populations; reviewed the current status of migratory bird hunting on Federal Indian reservations; and evaluated the potential impact of such guidelines on migratory birds. We concluded that the impact of migratory bird harvest by tribal members hunting on their reservations is minimal.

One area of interest in Indian migratory bird hunting regulations relates to hunting seasons for nontribal hunters on dates that are within Federal frameworks, but which are different from those established by the State(s) where the reservation is located. A large influx of nontribal hunters onto a reservation at a time when the season is closed in the surrounding State(s) could result in adverse population impacts on one or more migratory bird species. The guidelines make this unlikely, however, because tribal proposals must include:

(a) Harvest anticipated under the requested regulations; (b) methods that will be employed to measure or monitor harvest (such as bag checks, mail questionnaires, etc.); (c) steps that will be taken to limit level of harvest, where it could be shown that failure to limit such harvest would adversely impact the migratory bird resource; and (d) tribal capabilities to establish and enforce migratory bird hunting regulations. We may modify regulations or establish experimental special hunts, after evaluation and confirmation of
harvest information obtained by the Tribes. We believe the guidelines provide appropriate opportunity to accommodate the reserved hunting rights and management authority of Indian Tribes while ensuring that the migratory bird resource receives necessary protection. The conservation of this important international resource is paramount. The guidelines should not be viewed as inflexible. In this regard, we note that they have been employed successfully since 1985. We believe they have been tested adequately and, therefore, we made them final beginning with the 1988–89 hunting season. We should stress here, however, that use of the guidelines is not mandatory and no action is required if a Tribe wishes to observe the hunting regulations established by the State(s) in which the reservation is located.

Service Migratory Bird Regulations Committee Meetings
Participants at the June 25–26, 2008, meetings reviewed information on the current status of migratory shore and upland game birds and developed 2008–09 migratory game bird regulations recommendations for these species plus regulations for migratory game birds in Alaska, Puerto Rico, and the U.S. Virgin Islands; special September waterfowl seasons in designated States; special sandhill crane seasons in the Atlantic Flyway; and extended falconry seasons. In addition, we reviewed and discussed preliminary information on the status of waterfowl. Participants at the previously announced July 30–31, 2008, meetings reviewed information on the current status of waterfowl and developed recommendations for the 2008–09 regulations pertaining to regular waterfowl seasons and other species and seasons not previously discussed at the early-season meetings. In accordance with Department of the Interior policy, these meetings were open to public observation and you may submit comments to the Director on the matters discussed.

Population Status and Harvest
The following paragraphs provide preliminary information on the status of waterfowl and information on the status and harvest of migratory shore and upland game birds excerpted from various reports. For more detailed information on methodologies and results, you may obtain complete copies of the various reports at the address indicated under FOR FURTHER INFORMATION CONTACT or from our Web site at http://fws.gov/migratorybirds/reports/report.html.

Waterfowl Breeding and Habitat Survey
Federal, provincial, and State agencies conduct surveys each spring to estimate the size of breeding populations and to evaluate the condition of the habitats. These surveys are conducted using fixed-wing aircraft, helicopters, and ground crews and encompass principal breeding areas of North America, covering an area over 2.0 million square miles. The Traditional survey area comprises Alaska, Canada, and the northcentral United States, and includes approximately 1.3 million square miles. The Eastern survey area includes parts of Ontario, Quebec, Labrador, Newfoundland, Nova Scotia, Prince Edward Island, New Brunswick, New York, and Maine, an area of approximately 0.7 million square miles.

Overall, habitat conditions during the 2008 May waterfowl survey were characterized in many areas by a delayed spring compared to several preceding years. Drought in many parts of the traditional survey area contrasted sharply with record amounts of snow and rainfall in the eastern survey area.

Traditional Survey Area (U.S. and Canadian Prairies)

Although spring was delayed in much of the traditional survey area, field crews reported that habitat conditions were suitable for nesting at the time of the survey. Much of the prairie potholes experienced drought conditions this spring and many semi-permanent wetlands and livestock ditches were still dry. At the time of the survey this area was considered to be in fair to poor condition, with the exceptions being regions with temporary and seasonal water in southeastern South Dakota, and areas of western South Dakota that received abundant rain and snowfall in early May; conditions were classified as good in both of these areas. Parts of the prairie pothole region experienced heavy rains following completion of the survey. This may improve habitat conditions for late nesters and may improve the success of re-nesting attempts.

The parklands were drier in 2008 than in 2007 when excess water created much additional waterfowl habitat; still, this area was classified as fair to good overall with most seasonal and semi-permanent wetlands full. A late April snowstorm recharged wetlands in some areas of the northern parklands, and these areas were classified as excellent.

Bush (Alaska, Northern Manitoba, Northern Saskatchewan, Northwest Territories, Yukon Territory, Western Ontario)

In the boreal forest, spring break-up was later in 2008 than in recent years, with locally variable snowfall and, consequently, variable runoff that resulted in habitat conditions ranging from fair in the east to good in the west. Most large lakes were still frozen on May 20 in the Northwest Territories; however, warmer temperatures in late May led to habitat conditions suitable for nesting during the survey period. Good conditions were present throughout Alaska, with slightly late spring conditions in some coastal areas.

Eastern Survey Area

In the eastern survey area, a cold winter with heavy snows and colder than average spring temperatures delayed spring conditions by 1–2 weeks relative to the early springs of preceding years. An exception was northern Quebec, which experienced an early spring with most ice melting by the last week of May. Quickly rising temperatures combined with spring rains led to flooding in parts of Maine and the Maritimes, which disrupted spring nesting phenology; as a result, habitat conditions in these areas were classified as fair. Elsewhere in the East, abundant water in most lakes and wetlands resulted in habitat conditions being classified as good or excellent.

Status of Teal

The estimate of blue-winged teal numbers from the Traditional Survey Area is 6.6 million. This represents a 1.0 percent decrease from 2007 and is 45 percent above the 1955–2007 average.

Sandhill Cranes

Compared to increases recorded in the 1970s, annual indices to abundance of the Mid-Continent Population (MCP) of sandhill cranes have been relatively stable since the early 1980s. The Central Platte River Valley, Nebraska, spring index for 2008, uncorrected for visibility bias, was 472,128 sandhill cranes. The photo-corrected, 3-year average for 2005–07 was 364,281, which is within the established population-objective range of 349,000–472,000 cranes. All Central Flyway States, except Nebraska, allowed crane hunting in portions of their States during 2007–08. About 9,808 hunters participated in these seasons, which was similar to the number that participated in the previous season. Hunters harvested 18,610 MCP cranes in the U.S. portion of the Central Flyway during the 2007–08 seasons, which was 6 percent higher than the
estimated harvest for the previous year. The retrieved harvest of MCP cranes in hunt areas outside of the Central Flyway (Arizona, Pacific Flyway portion of New Mexico, Alaska, Canada, and Mexico combined) was 13,567 during 2007–08. The preliminary estimate for the North American MCP sport harvest, including crippling losses, was 36,567 birds, which is similar to the previous year's estimate. The long-term (1982–2004) trends for the MCP indicate that harvest has been increasing at a higher rate than population growth.

The fall 2007 pre-migration survey for the Rocky Mountain Population (RMP) resulted in a record high count of 22,822 sandhill cranes. The 3-year average for 2004, 2005, and 2007 (no survey was conducted in 2006) was 20,732 sandhill cranes, which is within established population objectives of 17,000–21,000 for the RMP. Hunting seasons during 2007–08 in portions of Arizona, Idaho, Montana, New Mexico, Utah, and Wyoming resulted in a harvest of 820 RMP cranes, a 10 percent decrease from the harvest of 907 the year before.

**Woodcock**

Singing-ground and Wing-collection Surveys were conducted to assess the population status of the American woodcock (Scolopax minor). The Singing-ground Survey is intended to measure long-term changes in woodcock population levels. Singing-ground Survey data for 2008 indicate that the number of displaying woodcock in the Eastern Region in 2008 was unchanged from 2007, while the Central Region experienced a 9.2 percent decline. However, we note that measurement of short-term (i.e., annual) trends tends to give estimates with larger variances and is more prone to be influenced by climatic factors that may affect local counts during the survey. There was no significant trend in woodcock heard in the Eastern Region during 1998–2008; however, there was a declining trend of −1.5 percent per year in the Central Region. This represents the fifth consecutive year that the 10-year trend estimate for the Eastern Region did not indicate a significant decline, while it is the first time since 2003 that the Central Region had a declining trend. There were long-term (1968–2008) declines of 1.2 percent per year in the Eastern Region and 1.1 percent per year in the Central Region. Wing-collection Survey data indicate that the 2007 recruitment index for the U.S. portion of the Eastern Region (1.6 immatures per adult female) was 4 percent higher than the 2006 index and 8 percent below the long-term average. The recruitment index for the U.S. portion of the Central Region (1.5 immatures per adult female) was 10 percent lower than the 2006 index and 8 percent below the long-term average.

**Band-Tailed Pigeons and Doves**

Annual counts of Interior band-tailed pigeons seen and heard per Breeding Bird Survey (BBS) route have not changed significantly since implementation of the BBS in 1966; however, they decreased significantly over the last 10 years. The 2007 harvest was estimated to be 4,800 birds. For Pacific Coast band-tailed pigeons, annual BBS counts of birds seen and heard per route have decreased since 1966, but they have not changed significantly over the last 10 years. According to the Pacific Coast Mineral Site Survey, annual counts of Pacific Coast band-tailed pigeons seen per mineral site have increased significantly since the survey was experimentally implemented in 2001. The 2007 harvest was estimated to be 12,700 birds. Analyses of core Call-Survey data over the most recent 10 years indicated no significant trend for doves heard in either the Eastern or Western Management Units while the Central Unit showed a significant decline. Over the 43-year period, 1966–2007, all 3 units exhibited significant declines. In contrast, for doves seen over the 10-year period, no significant trends were found for any of the three Management Units. Over 43 years, no trend was found for doves seen in the Eastern and Central Units while a significant decline was indicated for the Western Unit. The preliminary 2007 harvest estimate for the United States was 20,550,000 doves. A banding program is underway to obtain current information in order to develop a model of dove population dynamics for each Management Unit to provide guidance for improving our decision-making process with respect to harvest management.

The two key states with a white-winged dove population are Arizona and Texas. California and New Mexico have much smaller populations.

The Arizona Game and Fish Department (AGFD) monitors white-winged dove populations by means of a call-count survey to provide an annual index to population size. The index peaked at a mean of 52.3 doves heard per route in 1968, but fell precipitously in the late 1970s. The index has stabilized to around 25 doves per route in the last few years. In 2008, the mean number of doves heard per route was 26.9. AGFD also monitors harvest. Harvest during the 15-day season (September 1–15) peaked in the late 1960s at ~740,000 birds and has since stabilized at around 100,000 birds. The 2007 Harvest Information Program (HIP) estimate was 127,600 birds. In 2007, Arizona redesigned their dove harvest survey questionnaire to sample only from hunters registered under HIP. In the future, AGFD and HIP harvest estimates should be more comparable than they have been in the past.

In Texas, white-winged doves continue to expand their breeding range. Nesting by whitewings has been recorded in most counties, except for the northeastern part of the State, primarily. Nesting is essentially confined to urban areas, but appears to be expanding to exurban areas. Concomitant with this range expansion has been a continuing increase in whitewing abundance. A new DISTANCE sampling protocol was implemented for Central and South Texas for 2007, and expanded in 2008 so that coverage is almost statewide. Once fully implemented, biologists should have the ability to obtain a good estimate of white-winged dove abundance in Texas. While 2008 data were not available at this time, 2007 surveys indicated an estimated abundance throughout surveyed areas (representing about 20 percent of the State) of about 2,300,000 whitewings. Total statewide harvest has averaged about 2 million birds annually.

The Texas Parks and Wildlife Department is working to improve management of white-winged doves in Texas in the following ways: (1) Expanding current spring surveys of spring populations to encompass areas throughout the State that now have breeding populations; (2) Completing the Tamaulipas-Texas White-winged Dove Strategic Plan so that there are consistent and comparable harvest management strategies, surveys, research, and data collection across the breeding range of the species; (3) Expanding operational banding in 2008 that was begun in 2007 to derive estimates of survival and harvest rates; (4) Implementing a wing-collection survey for recruitment rates in lieu of the feeding flight and production surveys; (5) Estimating probability of detection for more accurate estimates of breeding populations within urban environments; and (6) Evaluating and estimating reproductive success in urban areas to better estimate population increases.

In California, BBS data (although imprecise due to a small sample size) indicate that there has been a significant increase in the population between 1968 and 2007. According to HIP surveys, the preliminary harvest estimate for 2007
was 67,900. In New Mexico, BBS data (very imprecise due to a small sample size) also showed a significant increase over the long term. In 2007, the estimated harvest was 64,000.

White-tipped doves are believed to be maintaining a relatively stable population in the Lower Rio Grande Valley (LRGV) of Texas. DISTANCE sampling procedures in the LRGV include whitetips. However, until the sampling frame includes rural Rio Grande corridor habitats, not many whitetip will be reported. Sampling frame issues are expected to be resolved by next year. However, annual white-tipped dove harvest during the special season is only averaging 3,000–4,000 birds.

**Hunting Season Proposals From Indian Tribes and Organizations**

For the 2008–09 hunting season, we received requests from 28 Tribes and Indian organizations. We actively solicit regulatory proposals from other tribal groups that are interested in working cooperatively for the benefit of waterfowl and other migratory game birds. We encourage Tribes to work with us to develop agreements for management of migratory bird resources on tribal lands.

It should be noted that this proposed rule includes generalized regulations for both early- and late-season hunting. A final rule will be published in a late-August 2008 Federal Register that will include tribal regulations for the early-hunting season. Early seasons generally begin around September 1 each year and most commonly include such species as American woodcock, sandhill cranes, mourning doves, and white-winged doves. Late seasons generally begin on or around September 24 and most commonly include waterfowl species.

In this current rulemaking, because of the compressed timeframe for establishing regulations for Indian Tribes and because final frameworks dates and other specific information are not available, the regulations for many tribal hunting seasons are described in relation to the season dates, season length, and limits that will be permitted when final Federal frameworks are announced for early- and late-season regulations. For example, daily bag and possession limits for ducks on some areas are shown as the same as permitted in Pacific Flyway States under final Federal frameworks, and limits for geese will be shown as the same permitted by the State(s) in which the tribal hunting area is located.

The proposed framework for early-season regulations were published in the Federal Register on July 24, 2008 (73 FR 43290); early-season final frameworks will be published in late-August. Proposed late-season frameworks for waterfowl and coots will be published in mid-August, and the final frameworks for the late seasons will be published in mid-September. We will notify affected Tribes of season dates, bag limits, etc., as soon as final frameworks are established. As previously discussed, no action is required by Tribes wishing to observe migratory bird hunting regulations established by the State(s) where they are located. The proposed regulations for the 28 Tribes that have submitted proposals that meet the established criteria are shown below.

(a) Colorado River Indian Tribes, Colorado River Indian Reservation, Parker, Arizona (Tribal Members and Nontribal Hunters)

The Colorado River Indian Reservation is located in Arizona and California. The Tribes own almost all lands on the reservation and have full wildlife management authority.

In their 2008–09 proposal, the Colorado River Indian Tribes requested split dove seasons. They propose their early season begin September 1 and end September 15, 2008. Daily bag limits would be 10 mourning or white-winged doves in the aggregate. The late season for doves is proposed to open November 15, 2008, and close December 29, 2008. The daily bag limit would be 10 mourning doves. The possession limit would be twice the daily bag limit after the first day of the season. Shooting hours would be from one-half hour before sunrise to noon in the early season and until sunset in the late season. Other special tribally set regulations would apply.

The Tribes also propose duck hunting seasons. The season would open October 11, 2008, and run until January 25, 2009. The Tribes propose the same season dates for mergansers, coots, and common moorhens. The daily bag limit for ducks, including mergansers, would be seven, except that the daily bag limits could contain no more than two hen mallards, two redheads, two Mexican ducks, two goldeneye, three scaup, one pintail, and two cinnamon teal. The season on canvasback is closed. The possession limit would be twice the daily bag limit after the first day of the season. The daily bag and possession limit for coots and common moorhens would be 25, singly or in the aggregate.

For geese, the Colorado River Indian Tribes propose a season of October 18, 2008, through January 25, 2009. The daily bag limit for geese would be three light geese and three dark geese. The possession limit would be six light geese and six dark geese after opening day.

In 1996, the Tribe conducted a detailed assessment of dove hunting. Results showed approximately 16,100 mourning doves and 13,600 white-winged doves were harvested by approximately 2,660 hunters who averaged 1.45 hunter-days. Field observations and permit sales indicate that fewer than 200 hunters participate in waterfowl seasons. Under the proposed regulations described here and, based upon past seasons, we and the Tribes estimate harvest will be similar.

Hunters must have a valid Colorado River Indian Reservation hunting permit and a Federal Migratory Bird Stamp in their possession while hunting. Other special tribally set regulations would apply. As in the past, the regulations would apply both to tribal and nontribal hunters, and non-toxic shot is required for waterfowl hunting.

We propose to approve the Colorado River Indian Tribes regulations for the 2008–09 hunting season, given the seasons dates fall within final flyway frameworks (applies to nontribal hunters only).

(b) Confederated Salish and Kootenai Tribes, Flathead Indian Reservation, Pablo, Montana (Tribal and Nontribal Hunters)

For the past several years, the Confederated Salish and Kootenai Tribes and the State of Montana have entered into cooperative agreements for the regulation of hunting on the Flathead Indian Reservation. The State and the Tribes are currently operating under a cooperative agreement signed in 1990 that addresses fishing and hunting management and regulation issues of mutual concern. This agreement enables all hunters to utilize waterfowl hunting opportunities on the reservation.

As in the past, tribal regulations for nontribal hunters would be at least as restrictive as those established for the Pacific Flyway portion of Montana. Goose season dates would also be at least as restrictive as those established for the Pacific Flyway portion of Montana. Shooting hours for waterfowl hunting on the Flathead Reservation are sunrise to sunset. Steel shot or other federally approved nontoxic shots are the only legal shotgun loads on the reservation for waterfowl or other game birds.

For tribal members, the Tribe proposes outside frameworks for ducks and geese of September 1, 2008, through March 9, 2009. Daily bag and possession...
limits were not proposed for tribal members. The requested season dates and bag limits are similar to past regulations. Harvest levels are not expected to change significantly. Standardized check station data from the 1993–94 and 1994–95 hunting seasons indicated no significant changes in harvest levels and that the large majority of the harvest is by nontribal hunters.

We propose to approve the Tribes’ request for special migratory bird regulations for the 2008–09 hunting season.

(c) Crow Creek Sioux Tribe, Crow Creek Indian Reservation, Fort Thompson, South Dakota (Tribal Members and Nontribal Hunters)

The Crow Creek Indian Reservation has a checkerboard pattern of land ownership, with much of the land owned by non-Indians. Since the 1993–94 season, the Tribe has selected special waterfowl hunting regulations independent of the State of South Dakota. The Tribe observes migratory bird hunting regulations contained in 50 CFR part 20.

The Tribe requests a duck and merganser season of October 2 to December 14, 2008, with a daily bag limit of six ducks, including no more than five mallards (only two of which may be hens), two redheads, two wood ducks, one pintail, one canvasback, and three scaup. The merganser daily bag limit would be five and include no more than one hooded merganser. The daily bag limit for coots would be 15.

For Canada geese, the Tribe proposes an October 16, 2008, to January 18, 2009, season with a three-bird daily bag limit. For white-fronted geese, the Tribe proposes a September 25 to December 19, 2008, season with a daily bag limit of two. For snow geese, the Tribe proposes a September 24 to December 29, 2008, season with a daily bag limit of 20.

Similar to the last several years, the Tribe also requests a sandhill crane season from September 11 to October 17, 2008, with a daily bag limit of three.

In all cases, except snow geese, the possession limits would be twice the daily bag limit. There would be no possession limit for snow geese. Shooting hours would be from one-half hour before sunrise to sunset.

The season and bag limits would be essentially the same as last year, and, as such, the Tribe would expect similar harvest. In 1994–95, duck harvest was 48 birds, down from 67 in 1993–94. Goose harvest during recent past seasons has been fewer than 100 geese. Total harvest on the reservation in 2000 was estimated to be 179 ducks and 868 geese.

The Service proposes to approve the request for special migratory bird hunting regulations for the Crow Creek Sioux Tribe. We remind the Tribe that all sandhill crane hunters are required to obtain a Federal sandhill crane permit. As such, the Tribe should contact us for further information on obtaining the needed permits.

(d) Fond du Lac Band of Lake Superior Chippewa Indians, Cloquet, Minnesota (Tribal Members Only)

Since 1996, the Service and the Fond du Lac Band of Lake Superior Chippewa Indians have cooperated to establish special migratory bird hunting regulations for tribal members. The Fond du Lac’s May 29, 2008, proposal covers land set apart for the band under the Treaties of 1837 and 1854 in northeast and east-central Minnesota.

The band’s proposal for 2008–09 is essentially the same as that approved last year except the Tribe has separate regulations for the 1854 and 1837 ceded territories and reservation lands. The proposed 2008–09 waterfowl hunting season regulations for Fond du Lac are as follows:

Ducks
A. 1854 and 1837 Ceded Territories
Season Dates: Begin September 13 and end November 30, 2008.
Daily Bag Limit: 18 ducks, including no more than 12 mallards (only 3 of which may be hens), 3 black ducks, 6 scaup, 6 wood ducks, 6 redheads, 3 pintails, and 3 canvasbacks.

B. Reservation
Season Dates: Begin September 6 and end November 30, 2008.
Daily Bag Limit: 20 ducks.

Canada Geese
All Areas
Season Dates: Begin September 1 and end November 30, 2008.
Daily Bag Limit: 20 geese.

Coots and Common Moorhens (Common Gallinules)
A. 1854 and 1837 Ceded Territories
Season Dates: Begin September 13 and end November 30, 2008.
Daily Bag Limit: 20 coots and common moorhens, singly or in the aggregate.

Sora and Virginia Rails
A. 1854 and 1837 Ceded Territories
Season Dates: Begin September 1 and end November 30, 2008.
Daily Bag Limit: 25 sora and Virginia rails, singly or in the aggregate.

Common Snipe
All Areas
Season Dates: Begin September 1 and end November 30, 2008.
Daily Bag Limit: Eight common snipe.

Woodcock
All Areas
Season Dates: Begin September 1 and end November 30, 2008.
Daily Bag Limit: Three woodcock.

Mourning Dove
All Areas
Season Dates: Begin September 1 and end November 30, 2008.
Daily Bag Limit: 30 mourning dove.

The following general conditions apply:
1. While hunting waterfowl, a tribal member must carry on his/her person a valid Ceded Territory License.
2. Shooting hours for migratory birds are one-half hour before sunrise to one-half hour after sunset.
3. Except as otherwise noted, tribal members will be required to comply with tribal codes that will be no less restrictive than the provisions of Chapter 10 of the Model Off-Reservation Code. Except as modified by the Service
rules adopted in response to this proposal, these amended regulations parallel Federal requirements in 50 CFR part 20 as to hunting methods, transportation, sale, exportation, and other conditions generally applicable to migratory bird hunting.

4. Band members in each zone will comply with State regulations providing for closed and restricted waterfowl hunting areas.

5. There are no possession limits on any species, unless otherwise noted above. For purposes of enforcing bag limits, all migratory birds in the possession or custody of band members on ceded lands will be considered to have been taken on those lands unless tagged by a tribal or State conservation warden as having been taken on-reservation. All migratory birds that fall on reservation lands will not count as part of any off-reservation bag or possession limit.

The band anticipates harvest will be fewer than 500 ducks and geese.

We plan to approve the request for special migratory bird hunting regulations for the Fond du Lac Band of Lake Superior Chippewas.

(e) Grand Traverse Band of Ottawa and Chippewa Indians, Suttons Bay, Michigan (Tribal Members Only)

In the 1995–96 migratory bird seasons, the Grand Traverse Band of Ottawa and Chippewa Indians and the Service first cooperated to establish special regulations for waterfowl. The Grand Traverse Band is a self-governing, federally recognized Tribe located on the west arm of Grand Traverse Bay in Leelanau County, Michigan. The Grand Traverse Band is a signatory Tribe of the Treaty of 1836. We have approved special regulations for tribal members of the 1836 treaty’s signatory Tribes on ceded lands in Michigan since the 1986–87 hunting season.

For the 2008–09 season, the Tribe requests that the tribal member duck season run from September 22, 2008, through January 18, 2009. A daily bag limit of 12 would include no more than 2 pintail, 2 canvasback, 1 hooded merganser, 3 black ducks, 3 wood ducks, 3 redheads, and 6 mallards (only 3 of which may be hens).

For Canada and snow geese, the Tribe proposes a September 1 through November 30, 2008, and a January 1 through February 8, 2009, season. For white-fronted geese and brant, the Tribe proposes a September 20 through November 30, 2008, season. The daily bag limit for all geese (including brant) would be: Based on our information, it is unlikely that any Canada geese from the Southern James Bay Population will be harvested by the Tribe.

For woodcock, the Tribe proposes a September 1 through November 14, 2008, season. The daily bag limit will not exceed five birds. For mourning doves, skite, and rails, the Tribe proposes a September 1 through November 14, 2008, season. The daily bag limit would be 10 per species.

All other Federal regulations contained in 50 CFR part 20 would apply. The Tribe proposes to monitor harvest closely through game bag checks, patrols, and mail surveys. Harvest surveys from the 2006–07 hunting season indicated that approximately 15 tribal hunters harvested an estimated 112 ducks and 50 Canada geese.

We propose to approve the Grand Traverse Band of Ottawa and Chippewa Indians requested 2008–09 special migratory bird hunting regulations.

(f) Great Lakes Indian Fish and Wildlife Commission, Odanah, Wisconsin (Tribal Members Only)

Since 1985, various bands of the Lake Superior Tribe of Chippewa Indians have exercised judicially recognized off-reservation hunting rights for migratory birds in Wisconsin. The specific regulations were established by the Service in consultation with the Wisconsin Department of Natural Resources and the Great Lakes Indian Fish and Wildlife Commission (GLIFWC, which represents the various bands). Beginning in 1986, a tribal season on ceded lands in the western portion of the State’s Upper Peninsula was developed in coordination with the Michigan Department of Natural Resources, and we have approved special regulations for tribal members in both Michigan and Wisconsin since the 1986–87 hunting season. In 1987, the GLIFWC requested, and we approved, special regulations to permit tribal members to hunt on ceded lands in Michigan and Wisconsin. The States of Michigan and Wisconsin originally concurred with the regulations, although Wisconsin has raised concerns in the past and Michigan has annually raises objections. Minnesota did not concur with the original regulations, stressing that the State would not recognize Chippewa Indian hunting rights in Minnesota’s treaty area until a court with jurisdiction over the State acknowledges and defines the extent of these rights. We acknowledge all of the States’ concerns, but point out that the U.S. Government has recognized the Indian hunting rights decided in the Lac Courte Oreilles v. State of Wisconsin (Voigt) case, and that acceptable hunting regulations have been negotiated successfully in both Michigan and Wisconsin even though the Voigt decision did not specifically address ceded land outside Wisconsin. We believe this is appropriate because the treaties in question cover ceded lands in Michigan (and Minnesota), as well as in Wisconsin.

Consequently, in view of the above, we have approved special regulations since the 1987–88 hunting season on ceded lands in all three States, In fact, this recognition of the principle of reserved treaty rights for band members to hunt and fish was pivotal in our decision to approve a special 1991–92 season for the 1836 ceded area in Michigan.

For 2008, the GLIFWC proposed off-reservation special migratory bird hunting regulations on behalf of the member Tribes of the Voigt Intertribal Task Force of the GLIFWC (for the 1837 and 1842 Treaty areas) and the Bay Mills Indian Community (for the 1836 Treaty area). Member Tribes of the Task Force are: The Bad River Band of the Lake Superior Tribe of Chippewa Indians, the Lac Courte Oreilles Band of Lake Superior Chippewa Indians, the Lac du Flambeau Band of Lake Superior Chippewa Indians, the Red Cliff Band of Lake Superior Chippewa Indians, the St. Croix Chippewa Indians of Wisconsin, the Sokaogon Chippewa Community (Mole Lake Band), all in Wisconsin; the Mille Lacs Band of Chippewa Indians in Minnesota; and the Sokaogon Chippewa of Lake Superior Band of Chippewa Indians on the Keweenaw Bay Indian Community in Michigan.

The GLIFWC 2008 proposal is generally similar to last year’s regulations, except that it includes lengthened season dates for mourning doves, from September 1–October 30 to September 1–November 9, if a 70-day season is offered, and eliminates mallard species restrictions within the overall bag limit for ducks.

Under the GLIFWC proposed regulations, GLIFWC expects modifications to the mallard bag limits to have no appreciable impact on the mallard population since the total estimated mallard harvest last year was approximately 600 birds, tribal members averaged just 2.1 ducks per hunting trip, and only 1 survey respondent reported harvesting more than 10 ducks of all species on his best day of hunting last year. Thus, they expect that this proposed change is likely to affect, at most, a few individual hunters on a few individual days, and to have no appreciable effect on our populations (which have averaged 87,000 breeding birds on Wisconsin’s
Northern High and Northern Low State survey strata alone from 2003–2007. Given these factors, the Tribe expects harvest would likely remain below 5,000 ducks and 1,000 geese, which is similar to anticipated levels in previous years.

Recent GLIFWC harvest surveys (1996–98, 2001, and 2004) indicate that tribal off-reservation waterfowl harvest has averaged less than 1,000 ducks and 120 geese annually. In the latest survey year (2004), an estimated 53 hunters took an estimated 421 trips and harvested 645 ducks (1.5 ducks per trip) and 84 geese (0.2 geese per trip).

Further, in the last 5 years of harvest surveys, only 1 hunter reported harvesting 20 ducks in a single day. Analysis of hunter survey data over the period in question (1996–2004) indicates a general downward trend in both harvest and hunter participation.

While we acknowledge GLIFWC’s previously submitted data indicating that tribal harvest and participation have declined in recent years, we do not believe that the GLIFWC’s proposal for tribal waterfowl seasons on ceded lands in Wisconsin, Michigan, and Minnesota for the 2008–09 hunting season is in the best interests of the migratory bird resource. More specific discussion follows below.

Removal of Mallard Restrictions

We have several concerns with GLIFWC’s proposal for removal of mallard restrictions within the overall duck daily bag limits in the 1837, 1842, and 1836 Treaty Areas. An increase in the daily bag limit of mallards (by removal of the internal bag limit restriction) from 10 mallards per day to 30 mallards per day in the 1837 and 1842 Treaty Areas and 20 mallards per day in the 1836 Treaty Area could potentially have conservation impacts on locally-breeding mallards. Overharvest of mallards in localized areas due to removal of species restrictions could contribute to localized long-term declines. As we stated last year (October 15, 2007 Federal Register, 72 FR 58452), removal of the mallard bag limit restriction would be inconsistent with our current conservation concerns. Furthermore, last year, we implemented a pilot bag limit increase for ducks in the 1837 and 1842 Treaty Areas. We do not believe that one year is sufficient time to evaluate the pilot daily bag limit increases implemented last year. Normally, changes such as those implemented last year take several years to fully evaluate. As such, we believe the pilot bag limits implemented last year should warrant at least several years of data evaluation using GLIFWC’s current harvest survey. For these reasons, we believe that the regulations advanced by the GLIFWC for the 2008–09 hunting season are not in the best interests of the migratory bird resource. Thus, we propose to maintain the mallard bag limit restriction within the overall daily bag limit in all three of the Treaty Areas as 10 mallards. We believe this restriction is commensurate with the species’ population status.

Expanded Season Dates

We have no concerns about extending the dove season to mimic the proposed Federal framework regulations for mourning doves in the Eastern Management Unit (see July 24, 2008 Federal Register, 73 FR XXXXX).

The Commission and the Service are parties to a Memorandum of Agreement (MOA) designed to facilitate the ongoing enforcement of Service-approved tribal migratory bird regulations. Its intent is to provide long-term cooperative application.

Also, as in recent seasons, the proposal contains references to Chapter 10 of the Migratory Bird Harvesting Regulations of the Model Off-Reservation Conservation Code. Chapter 10 regulations parallel State and Federal regulations and, in effect, are not changed by this proposal.

The proposed 2008–09 waterfowl hunting season regulations for GLIFWC are as follows:

Ducks

A. Wisconsin and Minnesota 1837 and 1842 Treaty Areas

Season Dates: Begin September 15 and end December 31, 2008.

Daily Bag Limit: 30 ducks, including no more than 10 mallards (only 5 of which may be hens), 5 black ducks, 5 scaup, 5 pintails, 5 wood ducks, and 5 canvasbacks.

B. Michigan 1836 Treaty Area

Season Dates: Begin September 15 and end December 31, 2008.

Daily Bag Limit: 20 ducks, including no more than 10 mallards (only 5 of which may be hens), 5 black ducks, 5 scaup, 5 pintails, 5 wood ducks, and 5 canvasbacks.

Mergansers

All Ceded Areas

Season Dates: Begin September 15 and end December 31, 2008.

Daily Bag Limit: 10 mergansers.

Geese

All Ceded Areas

Season Dates: Begin September 1 and end December 31, 2008. In addition, any portion of the ceded territory that is open to State-licensed hunters for goose hunting after December 1 will also be open concurrently for tribal members.

Daily Bag Limit: 20 geese in aggregate.

Other Migratory Birds

A. Coots and Common Moorhens (Common Gallinules)

Season Dates: Begin September 15 and end December 31, 2008.

Daily Bag Limit: 20 coots and common moorhens (common gallinules), singly or in the aggregate.

B. Sora and Virginia Rails

Season Dates: Begin September 15 and end December 31, 2008.

Daily Bag Limit: 20, singly or in the aggregate.

C. Common Snipe

Season Dates: Begin September 15 and end December 1, 2008.

Daily Bag Limit: 16 common.

D. Woodcock

Season Dates: Begin September 2 and end December 1, 2008.

Daily Bag Limit: 10 woodcock.

E. Mourning Dove 1837 and 1842 Ceded Territories

Season Dates: Begin September 1 and end October 30, or November 9, 2008 if a 70-day season is offered to the States in the Mississippi Flyway.

Daily Bag Limit: 15.

General Conditions

A. All tribal members will be required to obtain a valid tribal waterfowl hunting permit.

B. Except as otherwise noted, tribal members will be required to comply with tribal codes that will be no less restrictive than the model ceded territory conservation codes approved by Federal courts in the Lac Courte Oreilles v. State of Wisconsin (Voigt) and Milles Lacs Band v. State of Minnesota cases. Chapter 10 in each of these model codes regulates ceded territory migratory bird hunting. Both versions of Chapter 10 parallel Federal requirements as to hunting methods, transportation, sale, exportation and other conditions generally applicable to migratory bird hunting. They also automatically incorporate by reference the Federal migratory bird regulations adopted in response to this proposal.

C. Particular regulations of note include:
1. Nontoxic shot will be required for all off-reservation waterfowl hunting by tribal members.

2. Tribal members in each zone will comply with tribal regulations providing for closed and restricted waterfowl hunting areas. These regulations generally incorporate the same restrictions contained in parallel State regulations.

3. Possession limits for each species are double the daily bag limit, except on the opening day of the season, when the possession limit equals the daily bag limit, unless otherwise noted above. Possession limits are applicable only to transportation and do not include birds that are cleaned, dressed, and at a member’s primary residence. For purposes of enforcing bag and possession limits, all migratory birds in the possession and custody of tribal members on ceded lands will be considered to have been taken on those lands unless tagged by a tribal or State conservation warden as taken on reservation lands. All migratory birds that fall on reservation lands will not count as part of any off-reservation bag or possession limit.

4. The hunting restrictions included in the respective sections 10.05(2)(h) of the model ceded territory conservation codes will be amended to include language which parallels that in place for nontribal members as published at 64 FR 29799, June 3, 1999.

5. The shell limit restrictions included in the respective sections 10.05(2)(b) of the model ceded territory conservation codes will be removed.

6. Hunting hours shall be from a half hour before sunrise to 15 minutes after sunset.

D. Michigan—Duck Blinds and Decoys. Tribal members hunting in Michigan will comply with tribal codes that contain provisions parallel to Michigan law regarding duck blinds and decoys.

(g) Jicarilla Apache Tribe, Jicarilla Indian Reservation, Dulce, New Mexico (Tribal Members and Nontribal Hunters)

The Jicarilla Apache Tribe has had special migratory bird hunting regulations for tribal members and nonmembers since the 1986–87 hunting season. The Tribe owns all lands on the reservation and has recognized full wildlife management authority. In general, the proposed seasons would be more conservative than allowed by the Federal frameworks of last season and by States in the Pacific Flyway. The Tribe proposed a 2008–09 waterfowl and Canada goose season beginning with the earliest possible opening date in the Pacific Flyway States and a closing date of November 30, 2008. Daily bag and possession limits for waterfowl would be the same as Pacific Flyway States. The Tribe proposes a daily bag limit for Canada geese of two. Other regulations specific to the Pacific Flyway guidelines for New Mexico would be in effect.

During the Jicarilla Game and Fish Department’s 2007–08 season, estimated duck harvest was 527, which is within the historical harvest range. The species composition in the past has included mainly mallards, gadwall, wigeon, and teal. Northern pintail comprised 2 percent of the total harvest in 2007. The estimated harvest of geese was 12 birds.

The proposed regulations are essentially the same as were established last year. The Tribe anticipates the maximum 2008–09 waterfowl harvest would be around 500–750 ducks and 10–20 geese.

We propose to approve the Tribe’s requested 2008–09 hunting seasons.

(h) Kalispel Tribe, Kalispel Reservation, Usk, Washington (Tribal Members and Nontribal Hunters)

The Kalispel Reservation was established by Executive Order in 1914, and currently comprises approximately 4,600 acres. The Tribe owns all Reservation land and has full management authority. The Kalispel Tribe has a fully developed wildlife program with hunting and fishing codes. The Tribe enjoys excellent wildlife management relations with the State. The Tribe and the State have an operational Memorandum of Understanding with emphasis on fisheries but also for wildlife.

The nontribal member seasons described below pertain to a 176-acre waterfowl management unit and 800 acres of reservation land with a guide for waterfowl hunting. The Tribe is utilizing this opportunity to rehabilitate an area that needs protection because of past land use practices, as well as to provide additional waterfowl hunting in the area. Beginning in 1996, the requested regulations also included a proposal for Kalispel-member-only migratory bird hunting on Kalispel-ceded lands within Washington, Montana, and Idaho.

For the 2008–09 migratory bird hunting seasons, the Kalispel Tribe proposed tribal and nontribal member waterfowl seasons. The Tribe requests that both duck and goose seasons open at the earliest possible date and close on the latest date under Federal frameworks. For nontribal hunters on reservation, the Tribe requests the seasons open at the earliest possible date and remain open, for the maximum amount of open days. Specifically, the Tribe requests that the season for ducks begin September 19, 2008, and end January 31, 2009. In that period, nontribal hunters would be allowed to hunt approximately 101 days. Hunters should obtain further information on specific hunt days from the Kalispel Tribe.

The Tribe also requests the season for geese run from September 1 to September 14, 2008, and from October 1, 2008, to January 31, 2009. Total number of days should not exceed 107. Nontribal hunters should obtain further information on specific hunt days from the Tribe. Daily bag and possession limits would be the same as those for the State of Washington.

The Tribe reports a 2007–08 nontribal harvest of 30 ducks. Under the proposal, the Tribe expects harvest to be similar to last year and less than 100 geese and 200 ducks.

All other State and Federal regulations contained in 50 CFR part 20, such as use of nontoxic shot and possession of a signed migratory bird hunting stamp, would be required.

For tribal members on Kalispel-ceded lands, the Kalispel propose season dates consistent with Federal flyway frameworks. Specifically, the Tribe requests outside frameworks for ducks of October 1, 2008, through January 31, 2009, and geese of September 1, 2008, through January 31, 2009. The Tribe requests that both duck and goose seasons open at the earliest possible date and close on the latest date under Federal frameworks. However, during that period, the Tribe proposes that the season run continuously. Daily bag and possession limits would be concurrent with the Federal rule.

The Tribe reports that there was no tribal harvest. Under the proposal, the Tribe expects harvest to be less than 200 birds for the season with less than 100 geese. Tribal members would be required to possess a signed Federal migratory bird stamp and a tribal ceded lands permit.

We propose to approve the regulations requested by the Kalispel Tribe, provided that the nontribal seasons conform to Treaty limitations and final Federal frameworks for the Pacific Flyway.

(i) Klamath Tribe, Chiloquin, Oregon (Tribal Members Only)

The Klamath Tribe currently has no reservation, per se. However, the Klamath Tribe has reserved hunting, fishing, and gathering rights within its former reservation boundary. This area of former reservation, granted to the
Klamaths by the Treaty of 1864, is over 1 million acres. Tribal natural resource management authority is derived from the Treaty of 1864, and carried out cooperatively under the judicially enforced Consent Decree of 1981. The parties to this Consent Decree are the Federal Government, the State of Oregon, and the Klamaths. The Klamath Indian Game Commission sets the seasons. The tribal biological staff and tribal Regulatory Enforcement Officers monitor tribal harvest by frequent bag checks and hunter interviews.

For the 2008–09 season, the Tribe requests proposed season dates of October 4, 2008, through February 1, 2009. Daily bag limits would be nine for ducks, nine for goose, and nine for coot, with possession limits twice the daily bag limit. Shooting hours would be one-half hour before sunrise to one-half hour after sunset. Steel shot is required.

Based on the number of birds produced in the Klamath Basin, this year’s harvest would be similar to last year’s. Information on tribal harvest suggests that more than 70 percent of the annual goose harvest is local birds produced in the Klamath Basin.

We propose to approve the Klamath Tribe’s requested 2008–09 special migratory bird hunting regulations.

(j) Leech Lake Band of Ojibwe, Cass Lake, Minnesota (Tribal Members Only)

The Leech Lake Band of Ojibwe is a federally recognized Tribe located in Cass Lake, Minnesota. The reservation employs conservation officers to enforce conservation regulations. The Service and the Tribe have cooperatively established migratory bird hunting regulations since 2000.

For the 2008–09 season, the Tribe requests a duck season starting on September 20 and ending December 31, 2008, and a goose season to run from September 1 through December 31, 2008. Daily bag limits for both ducks and geese would be 10. Possession limits would be twice the daily bag limit. Shooting hours are one-half hour before sunrise to one-half hour after sunset.

The annual harvest by tribal members on the Leech Lake Reservation is estimated at 500–1,000 birds.

We propose to approve the Leech Lake Band of Ojibwe’s special migratory bird hunting season.

(k) Little River Band of Ottawa Indians, Manistee, Michigan (Tribal Members Only)

The Little River Band of Ottawa Indians is a self-governing, federally recognized Tribe located in Manistee, Michigan, and a signatory Tribe of the Treaty of 1836. We have approved special regulations for tribal members of the 1836 treaty’s signatory Tribes on ceded lands in Michigan since the 1986–87 hunting season. Ceded lands are located in Lake, Mason, Manistee, and Wexford Counties. The Band proposes the following regulations to govern the hunting of migratory birds by tribal members within the 1836 Ceded Territory as well as on the Band’s Reservation.

For the 2008–09 season, the Little River Band of Ottawa Indians proposes a duck and merganser season from September 15, 2008, through January 20, 2009. A daily bag limit of 12 ducks would include no more than 2 pintail, 2 canvasback, 3 black duck, 3 wood ducks, 3 redheads, 6 mallards (only 2 of which may be a hen), and 1 hooded merganser. Possession limits would be twice the daily bag limit.

For white-fronted geese, snow geese, and brant, the Tribe proposes a September 20 through November 30, 2008, season. Daily bag limits would be five geese.

For Canada geese only, the Tribe proposes a September 1, 2008, through February 8, 2009, season with a daily bag limit of five Canada geese. The possession limit will not exceed 10 birds per species. All other Federal regulations contained in parallel State regulations.

The Tribe monitored harvest through mail surveys. General Conditions were as follows:

A. All tribal members will be required to obtain a valid tribal resource card and 2008–09 hunting license.

B. Except as modified by the Service rules adopted in response to this proposal, these amended regulations parallel all Federal regulations contained in 50 CFR part 20.

C. Particular regulations of note include:

(1) Nontoxic shot will be required for all waterfowl hunting by tribal members.

(2) Tribal members in each zone will comply with tribal regulations providing for closed and restricted waterfowl hunting areas. These regulations generally incorporate the same restrictions contained in parallel State regulations.

We propose to approve Little River Band of Ottawa Indians’ special migratory bird hunting regulations.
The Lower Brule Sioux Tribe first established tribal migratory bird hunting regulations for the Lower Brule Reservation in 1994. The Lower Brule Reservation is about 214,000 acres in size and is located on and adjacent to the Missouri River, south of Pierre. Land ownership on the reservation is mixed, and until recently, the Lower Brule Tribe had full management authority over fish and wildlife via an MOA with the State of South Dakota. The MOA provided the Tribe jurisdiction over fish and wildlife on reservation lands, including deeded and Corps of Engineers-taken lands. For the 2008–09 season, the two parties have come to an agreement that provides the public a clear understanding of the Lower Brule Sioux Tribe’s migratory bird hunting regulations and hunting season requirements. The Lower Brule Reservation waterfowl season is open to tribal and nontribal hunters.

For the 2008–09 migratory bird hunting season, the Lower Brule Sioux Tribe proposes a nontribal member duck, merganser, and coot season length of 97 days, or the maximum number of days allowed by federal frameworks in the High Plains Management Unit for this season. The Tribe proposes a season from October 13, 2008, through January 17, 2009. The daily bag limit would be five birds, including no more than five mallards (only one of which may be a hen), one pintail, two redheads, one canvasback, two wood ducks, two scaup, and one mottled duck. The daily bag limit for mergansers would be five, only two of which could be hooded mergansers. The daily bag limit for coots would be 15. Possession limits would be twice the daily bag limits.

For the 2008–09 season, the Lower Brule Tribe proposes a duck, merganser, and coot season from September 20, 2008, through March 10, 2009. The daily bag limit would be five birds, including no more than five mallards (only one of which may be a hen), one pintail, two redheads, one canvasback, two wood ducks, two scaup, and one mottled duck. The daily bag limit for mergansers would be five, only two of which could be hooded mergansers. The daily bag limit for coots would be 15. Possession limits would be twice the daily bag limits.

The Tribe’s proposed Canada goose season for tribal members would run from October 11, 2008, through March 10, 2009, with a daily bag limit of three Canada geese. The Tribe’s proposed white-fronted goose tribal season would run from October 4, 2008, through March 10, 2009, with a daily bag limit of two white-fronted geese. The Tribe’s proposed light goose tribal season would run from October 11, 2008, through March 10, 2009. The light goose daily bag limit would be 20. Possession limits would be twice the daily bag limits.

The Tribe’s proposed Canada goose season for tribal members would run from October 11, 2008, through March 10, 2009, with a daily bag limit of three Canada geese. The Tribe’s proposed white-fronted goose tribal season would run from October 4, 2008, through March 10, 2009, with a daily bag limit of two white-fronted geese. The Tribe’s proposed light goose tribal season would run from October 11, 2008, through March 10, 2009. The light goose daily bag limit would be 20. Possession limits would be twice the daily bag limits.

In the 2007–08 season, hunters harvested an estimated 656 geese and 550 ducks. In the 2007–08 season, duck harvest species composition was primarily mallard (88 percent), gadwall (5 percent), green-winged teal (3 percent), blue-winged teal (1 percent), and wigeon (2 percent). Goose harvest species composition in 2007–08 at Mni Sho Sho was approximately 96 percent Canada geese, 3 percent snow goose, and 1 percent white-fronted goose. Harvest of geese harvested by other hunters was approximately 97 percent Canada geese and 3 percent snow goose.

The Tribe anticipates a duck harvest similar to those of the previous 3 years and a goose harvest below the target harvest level of 3,000 to 4,000 geese. All basic Federal regulations contained in 50 CFR part 20, including the use of steel shot, Migratory Waterfowl Hunting and Conservation Stamps, etc., would be observed by the Tribe’s proposed regulations. In addition, the Lower Brule Sioux Tribe has an official Conservation Code that was established by Tribal Council Resolution in June 1982 and updated in 1996. We propose to approve the Tribe’s requested regulations for the Lower Brule Reservation given the season’s dates fall within final Federal flyway frameworks (applies to nontribal hunters only).

For tribal hunters, the Lower Brule Sioux Tribe proposes a duck, merganser, and coot season from September 20, 2008, through March 10, 2009. The daily bag limit would be five birds, including no more than five mallards (only one of which may be a hen), one pintail, two redheads, one canvasback, two wood ducks, two scaup, and one mottled duck. The daily bag limit for mergansers would be five, only two of which could be hooded mergansers. The daily bag limit for coots would be 15. Possession limits would be twice the daily bag limits.
establish special regulations for migratory game birds on the Makah Reservation and traditional hunting land off the Makah Reservation since the 2001–02 hunting season. Lands off the Makah Reservation are those contained within the boundaries of the State of Washington Game Management Units 601–603 and 607.

The Makah Indian Tribe proposes a duck and coot hunting season from September 27, 2008, to January 25, 2009. The daily bag limit is seven ducks, including no more than one canvasback, one pintail, three scaup, and one redhead. The daily bag limit for coots is 25. The Tribe has a year-round closure on wood ducks and harlequin ducks. Shooting hours for all species of waterfowl are one-half hour before sunrise to sunset.

For geese, the Tribe proposes the season open on September 27, 2008, and close January 25, 2009. The daily bag limit for geese is four and one brant. The Tribe notes that there is a year-round closure on Aleutian and Dusky Canada geese.

For band-tailed pigeons, the Tribe proposes the season open September 20, 2008, and close October 31, 2008. The daily bag limit for band-tailed pigeons is two.

The Tribe anticipates that harvest under this regulation will be relatively low since there are no known dedicated waterfowl hunters and any harvest of waterfowl or band-tailed pigeons is usually incidental to hunting for other species, such as deer, elk, and bear. The Tribe expects fewer than 50 ducks and 10 geese to be harvested during the 2008–09 migratory bird hunting season.

All other Federal regulations contained in 50 CFR part 20 would apply. The following restrictions are also proposed by the Tribe:

1. As per Makah Ordinance 44, only shotguns may be used to hunt any species of waterfowl. Additionally, shotguns must not be discharged within 0.25 miles of an occupied area;
2. Hunters must be eligible, enrolled Makah tribal members and must carry their Indian Treaty Fishing and Hunting Identification Card while hunting. No tags or permits are required to hunt waterfowl;
3. The Cape Flattery area is open to waterfowl hunting, except in designated wilderness areas, or within 1 mile of Cape Flattery Trail, or in any area that is closed to hunting by another ordinance or regulation;
4. The use of live decoys and/or baiting to pursue any species of waterfowl is prohibited;
5. Steel or bismuth shot only for waterfowl is allowed; the use of lead shot is prohibited; and
6. The use of dogs is permitted to hunt waterfowl.

We propose to approve the Makah Indian Tribe's proposed 2008–09 special migratory bird hunting regulations.

The Nation requires tribal members and nonmembers to comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 pertaining to shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp), which must be signed in ink across the face. Special regulations established by the Navajo Nation also apply on the reservation.

The Tribe proposes a total harvest of fewer than 500 mourning doves; 20 band-tailed pigeons; 1,000 ducks, coots, and mergansers; and 1,000 Canada geese for the 2008–09 season. The Tribe will monitor harvest by mail survey forms. Through the established Tribal Nation Code, Title 17 and 18 U.S.C. 1163, the Tribe will take action to close the season, reduce bag limits, or take other appropriate actions if the harvest is detrimental to the migratory bird resource.

We propose to approve the Navajo Nation’s special migratory bird season.

(q) Oneida Tribe of Indians of Wisconsin, Oneida, Wisconsin (Tribal Members Only)

Since 1991–92, the Oneida Tribe of Indians of Wisconsin and the Service have cooperated to establish uniform regulations for migratory bird hunting by tribal and nontribal hunters within the original Oneida Reservation boundaries. Since 1985, the Oneida Tribe’s Conservation Department has enforced the Tribe’s hunting regulations within those original reservation limits. The Oneida Tribe also has a good working relationship with the State of Wisconsin and the majority of the seasons and limits are the same for the Tribe and Wisconsin.

In a May 29, 2008, letter, the Tribe proposed special migratory bird hunting regulations. For ducks, the Tribe described the general outside dates as being September 20 through December 7, 2008, with a closed segment of November 22 to 30, 2008. The Tribe proposes a daily bag limit of six birds, which could include no more than six mallards (three hen mallards), six wood duck, one redhead, two pintail, and one hooded merganser.

For geese, the Tribe requests a season between September 1 and December 31, 2008, with a daily bag limit of three Canada geese. Hunters will be issued three tribal tags for geese in order to monitor goose harvest. An additional three tags will be issued each time birds are registered. The Tribe will close the season November 22 to 30, 2008. If a quota of 300 geese is attained before the season concludes, the Tribe will recommend closing the season early.

For woodcock, the Tribe proposes a season between September 6 and November 9, 2008, with a daily bag limit of three, respectively.

For mourning dove, the Tribe proposes a season between September 1 and November 9, 2008, with a daily bag limit of five, respectively.
The Tribes propose that, if permitted in Idaho under Federal frameworks. The Tribes propose that, if the same number of hunting days is permitted as in previous years, the season would have an opening date of October 4, 2008, and a closing date of January 17, 2009. The Tribes anticipate harvest will be between 4,000 and 6,000 geese.

The Tribe requests a common snipe season with the maximum number of days and the same daily bag and possession limits permitted in Idaho under Federal frameworks. The Tribes propose that, if the same number of hunting days is permitted as in previous years, the season would have an opening date of October 4, 2008, and a closing date of January 17, 2009.

Nontribal hunters must comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 pertaining to shooting hours, use of steel shot, and manner of taking. Special regulations established by the Shoshone-Bannock Tribes also apply on the reservation.

We note that the requested regulations are nearly identical to those of last year and propose they be approved for the 2008–09 hunting season given the seasons dates fall within final Federal flyway frameworks (applies to nontribal hunters only).

(s) Skokomish Tribe, Shelton, Washington (Tribal Members Only)

Since 1996, the Service and the Point No Point Treaty Tribes, of which the Skokomish Tribe was one, have cooperated to establish special regulations for migratory bird hunting. The Tribes have been acting independently since 2005, and the Skokomish Tribe would like to establish migratory bird hunting regulations for tribal members for the 2008–09 season. The Tribe has a reservation on the Olympic Peninsula in Washington State and is a successor to the signatories of the Treaty of Point No Point of 1855.

The Skokomish Tribe requests a duck and coot season from September 16, 2008, to February 28, 2009. The daily bag limit is seven ducks, including no more than two hen mallards, one pintail, one canvasback, and two redheads. The daily bag and possession limit on harlequin duck is one per season. The coot daily bag limit is 25. The possession limit is twice the daily bag limit except as noted above.

For geese, the Tribe requests a season from September 16, 2008, to February 28, 2009. The daily bag limit is four, including no more than three light geese. The season on Aleutian Canada geese is closed. For brant, the Tribe proposes a season from November 1, 2008, to February 28, 2009, with a daily bag limit of two. The possession limit is twice the daily bag limit.

For mourning doves, band-tailed pigeon, and snipe, the Tribe requests a season from September 16, 2008, to February 28, 2009, with a daily bag limit of 10, 2, and 8, respectively. The possession limit is twice the daily bag limit.

All Tribal hunters authorized to hunt migratory birds are required to obtain a tribal hunting permit from the Skokomish Tribe pursuant to tribal law. Hunting hours would be from one-half hour before sunrise to sunset. Only steel, tungsten-iron, tungsten-polymer, tungsten-matrix, and tin shot are allowed for hunting waterfowl. It is unlawful to use or possess lead shot while hunting waterfowl.

The Tribe anticipates harvest to be fewer than 150 birds. The Skokomish Public Safety Office enforcement officers have the authority to enforce these migratory bird hunting regulations.

We propose to approve the Skokomish Tribe’s requested migratory bird hunting season.

(t) Spokane Tribe of Indians, Spokane Indian Reservation, Wellpinit, Washington (Tribal Members Only)

The Spokane Tribe of Indians wishes to establish waterfowl seasons on their respective reservation for its membership access to an additional resource. An established waterfowl season on the reservation will allow access to a resource for members to continue practicing a subsistence lifestyle.

The Spokane Indian Reservation is located in northeastern Washington State. The reservation comprises approximately 157,000 acres. The boundaries of the Reservation are the Columbia River to the west, the Spokane River to the south (now Lake Roosevelt), Tshimik Creek to the east, and the 48th Parallel as the north boundary. Tribal membership comprises approximately 2,300 enrolled Spokane Tribal Members. Prior to 1939, the Spokane Tribe was primarily a salmon people; upon completion of Grand Coulee Dam creating Lake Roosevelt, the development of hydroelectricity without passage ultimately removed salmon access from historical fishing areas for the Spokane Tribe for the past 70 years. These proposed regulations would allow Tribal Members, spouses of a Spokane Tribal Member and first-generation descendants of a Spokane Tribal Member with a tribal permit and Federal Waterfowl stamps an opportunity to utilize the reservation wildlife to benefit tribal membership through access to this resource throughout Spokane Tribal...
The Tribe anticipates a total harvest of 200 ducks, 100 geese, 50 mergansers, 50 brant, 100 coots, and 100 snipe. Anticipated harvest needs include subsistence and ceremonial needs. Certain species may be closed to hunting for conservation purposes, and consideration for the needs of certain species will be addressed.

The Service proposes to approve the request for special migratory bird hunting regulations for the Stillaguamish Tribe of Indians.

(w) Swinomish Indian Tribal Community, LaConner, Washington (Tribal Members Only)

In 1996, the Service and the Swinomish Indian Tribal Community began cooperating to establish special regulations for migratory bird hunting. The Swinomish Indian Tribal Community is a federally recognized Indian Tribe consisting of the Suiattle, Skagit, and Kikialos. The Swinomish Reservation was established by the Treaty of Point Elliott of January 22, 1855, and lies in the Puget Sound area north of Seattle, Washington.

For the 2008–09 season, the Tribe requests to establish a migratory bird hunting season on all areas that are open and unclaimed and consistent with the meaning of the treaty. The Tribe requests to establish duck, merganser, Canada goose, brant, and coot seasons opening on the earliest possible date allowed by the final Federal frameworks for the Pacific Flyway and closing 30 days after the State of Washington closes its season. The Swinomish Tribe requests an additional three birds of each species over that allowed by the State for daily bag and possession limits.

The Community normally anticipates that the regulations will result in the harvest of approximately 300 ducks, 50 Canada geese, 75 mergansers, 100 brant, and 50 coot. The Swinomish utilize a report card and permit system to monitor harvest and will implement steps to limit harvest where conservation is needed. All tribal regulations will be enforced by tribal fish and game officers.

On reservation, the Tribal Community proposes a hunting season for the abovementioned species beginning on the earliest possible opening date and closing March 9, 2009. The Swinomish manage harvest by a report card and permit system, and we anticipate harvest will be similar to that expected off reservation.

We believe the estimated harvest by the Swinomish will be minimal and will not adversely affect migratory bird populations. We propose to approve the Tribe’s requested 2008–09 special migratory bird hunting regulations.

(x) The Tulalip Tribes of Washington, Tulalip Indian Reservation, Marysville, Washington (Tribal Members and Nontribal Hunters)

The Tulalip Tribes are the successors in interest to the Tribes and bands
signatory to the Treaty of Point Elliott of January 22, 1855. The Tulalip Tribes’ government is located on the Tulalip Indian Reservation just north of the City of Everett in Snohomish County, Washington. The Tribes or individual tribal members own all of the land on the reservation, and they have full wildlife management authority. All lands within the boundaries of the Tulalip Tribes Reservation are closed to nonmember hunting unless opened by Tulalip Tribal regulations.

For the 2008–09 season, the Tribe proposes tribal and nontribal hunting regulations for the 2008–09 season. Migratory waterfowl hunting by Tulalip Tribal members is authorized by Tulalip Tribal Ordinance No. 67. For ducks, mergansers, coot, and snipe, the proposed season for tribal members would be from September 15, 2008, through February 29, 2009. In the case of nontribal hunters hunting on the reservation, the season would be the latest closing date and the longest period of time allowed under final Pacific Flyway Federal frameworks. Daily bag and possession limits for Tulalip Tribal members would be 7 and 14 ducks, respectively, except that for blue-winged teal, canvasback, harlequin, pintail, and wood duck, the bag and possession limits would be the same as those established in accordance with final Federal frameworks. For coot, daily bag and possession limits are 25 and 50, respectively, and for snipe 8 and 18, respectively. Nontribal hunters should check with the Tulalip tribal authorities regarding additional conservation measures that may apply to specific species managed within the region. Ceremonial hunting may be authorized by the Department of Natural Resources at any time upon application of a qualified tribal member. Such a hunt must have a bag limit designed to limit harvest only to those birds necessary to provide for the ceremony.

For geese, tribal members propose a season from September 15, 2008, through February 29, 2009. Nontribal hunters would be allowed the longest season and the latest closing date permitted for Pacific Flyway Federal frameworks. For tribal hunters, the goose daily bag and possession limits would be 7 and 14, respectively, except that the bag limits for brant, cackling Canada geese, and dusky Canada geese would be established in accordance with final Federal frameworks. For nontribal hunters hunting on reservation lands, the daily bag and possession limits would be those established in accordance with final Federal frameworks for the Pacific Flyway. The Tulalip Tribes also set a maximum annual bag limit for those tribal members who engage in subsistence hunting of 365 ducks and 365 geese.

All hunters on Tulalip Tribal lands are required to adhere to shooting hour regulations set at one-half hour before sunrise to sunset, special tribal permit requirements, and a number of other tribal regulations enforced by the Tribe. Each nontribal hunter 16 years of age and older hunting pursuant to Tulalip Tribes’ Ordinance No. 67 must possess a valid Federal Migratory Bird Hunting and Conservation Stamp and a valid State of Washington Migratory Waterfowl Stamp. Each hunter must validate stamps by signing across the face.

Although the season length requested by the Tulalip Tribes appears to be quite liberal, harvest information indicates a total take by tribal and nontribal hunters under 1,000 ducks and 500 geese annually.

We propose approval of the Tulalip Tribe’s request to have a special season.

(y) Upper Skagit Indian Tribe, Sedro Woolley, Washington (Tribal Members Only)

The Upper Skagit Indian Tribe and the Service have cooperated to establish special regulations for migratory game birds since 2001. The Tribe has jurisdiction over lands within Skagit, Island, and Whatcom Counties, Washington. The Tribe issues tribal hunting regulations for the Upper Skagit Reservation.

The Tribe proposes a goose season of October 13, 2008, through February 25, 2009. The Tribe proposes a daily bag limit of six birds, which could include no more than two hen mallards, two drake mallards, two black ducks, two mottled ducks, one fulvous whistling duck, four mergansers, three scaup, one hooded merganser, three wood ducks, one canvasback, two redheads, one pintail, and four of all other species not listed. The Tribe requests a coot season starting October 15, 2008, through January 26, 2009. A daily bag limit of six teals would be in addition to the daily bag limit for ducks. For sea ducks, the Tribe proposes a season between October 13, 2008, and February 27, 2009, with a daily bag limit of seven, which could include no more than one hen eider and four of any one species unless otherwise noted above.

For Canada geese, the Tribe requests a season between September 15 to September 29, 2008, and October 29, 2008, through February 25, 2009, with a daily bag limit of 5 Canada geese during the first period, 3 Canada geese during the second period. For snow geese, the Tribe requests a season between September 8 to September 22, 2008, and October 29, 2008, to February 27, 2009, with a daily bag limit of 15 snow geese. For woodcock, the Tribe proposes a season between October 13 and November 28, 2008, with a daily bag limit of three.

Prior to 2008, the Tribe had 22 registered tribal hunters and estimates harvest to be no more than 15 geese, 25 mallards, 25 teal, 50 black ducks, and 50 of all other species combined. Tribal members hunting on the Reservation will observe all basic Federal migratory bird hunting regulations found in 50 CFR part 20, except shooting hours would be 15 minutes before official sunrise to 15 minutes after official sunset.

The Service proposes to approve the request for special migratory bird hunting regulations for the Upper Skagit Indian Tribe.

(z) Wampanoag Tribe of Gay Head, Aquinnah, Massachusetts (Tribal Members Only)

The Wampanoag Tribe of Gay Head is a federally recognized Tribe located on the island of Martha’s Vineyard in Massachusetts. The Tribe has approximately 560 acres of land, which it manages for wildlife through its natural resources department. The Tribe also enforces its own wildlife laws and regulations through the natural resources department.

For the 2008–09 season, the Tribe proposes a duck season of October 29, 2008, through February 25, 2009. The Tribe proposes a daily bag limit of six birds, which could include no more than two hen mallards, six drake mallards, two black ducks, two mottled ducks, one fulvous whistling duck, four mergansers, three scaup, one hooded merganser, two wood ducks, one canvasback, two redheads, one pintail, and four of all other species not listed. The Tribe proposes a teal season of October 13, 2008, through January 26, 2009. A daily bag limit of six teals would be in addition to the daily bag limit for ducks. For sea ducks, the Tribe proposes a season between October 13, 2008, and February 27, 2009, with a daily bag limit of seven, which could include no more than one hen eider and four of any one species unless otherwise noted above.

For Canada geese, the Tribe requests a season between September 15 to September 29, 2008, and October 29, 2008, through February 25, 2009, with a daily bag limit of 5 Canada geese during the first period, 3 Canada geese during the second period. For snow geese, the Tribe requests a season between September 8 to September 22, 2008, and October 29, 2008, to February 27, 2009, with a daily bag limit of 15 snow geese. For woodcock, the Tribe proposes a season between October 13 and November 28, 2008, with a daily bag limit of three.
members hunting on the Reservation will observe all basic Federal migratory bird hunting regulations found in 50 CFR part 20. The Tribe requires hunters to register with the Harvest Information Program.

The Service proposes to approve the request for special migratory bird hunting regulations for the Wanapamoag Tribe of Gay Head.

(aa) White Earth Band of Ojibwe, White Earth, Minnesota (Tribal Members Only)

The White Earth Band of Ojibwe is a federally recognized tribe located in northwest Minnesota and encompasses all of Mahnomen County and parts of Becker and Clearwater Counties. The reservation employs conservation officers to enforce migratory bird regulations. The Tribe and the Service first cooperated to establish special tribal regulations in 1999.

For the 2008–09 migratory bird hunting season, the White Earth Band of Ojibwe requests a duck and merganser season to start September 20 and end December 19, 2008. For ducks, they request a daily bag limit of 10, including no more than 2 mallards and 1 canvasback. The merganser daily bag limit would be five with no more than two hooded mergansers. For geese, the Tribe proposes an early season from September 1 through September 26, 2008, and a late season from September 27, 2008, through December 19, 2008. The early season daily bag limit is eight geese and the late season daily bag limit is five geese.

For coots, dove, rail, woodcock, and snipe, the Tribe proposes a September 1 through November 30, 2008, season with daily bag limits of 20 coots, 25 doves, 25 rails, 10 woodcock, and 10 snipe. Shooting hours are one-half hour before sunrise to one-half hour after sunset. Nontoxic shot is required. Based on past harvest surveys, the Tribe anticipates harvest of 1,000 to 2,000 Canada geese and 1,000 to 1,500 ducks. The White Earth Reservation Tribal Council employs four full-time Conservation Officers to enforce migratory bird regulations. We propose to approve the White Earth Band of Ojibwe’s request to have a special season.

(bb) White Mountain Apache Tribe, Fort Apache Indian Reservation, Whiteriver, Arizona (Tribal Members and Nontribal Hunters)

The White Mountain Apache Tribe owns all reservation lands, and the Tribe has recognized full wildlife management authority. The White Mountain Apache Tribe has requested regulations that are essentially unchanged from those agreed to since the 1997–98 hunting year.

The hunting zone for waterfowl is restricted and is described as: the length of the Black River west of the Bonito Creek and Black River confluence and the entire length of the Salt River forming the southern boundary of the reservation; the White River, extending from the Canyon Day Stockman Station to the Salt River; and all stock ponds located within Wildlife Management Units 4, 5, 6, and 7. Tanks located below the Mogollon Rim, within Wildlife Management Units 2 and 3, will be open to waterfowl hunting during the 2008–09 season. The length of the Black River east of the Black River/Bonito Creek confluence is closed to waterfowl hunting. All other waters of the reservation would be closed to waterfowl hunting for the 2008–09 season.

For nontribal and tribal hunters, the Tribe proposes a continuous duck, coot, merganser, gallinule, and moorhen hunting season, with an opening date of October 14, 2008, and a closing date of January 28, 2009. The Tribe proposes a separate canvasback season, with an opening date of October 14, 2008, and a closing date of December 10, 2008. The Tribe proposes a daily duck (including mergansers) bag limit of seven, which may include no more than two redheads, one pintail, one canvasback (when open), and seven mallards (including no more than two hen mallards). The daily bag limit for coots, gallinules, and moorhens would be 25, singly or in the aggregate. For geese, the Tribe is proposing a season from October 14, 2008, through January 28, 2009. Hunting would be limited to Canada geese, and the daily bag limit would be three.

Season dates for band-tailed pigeons and mourning doves would run concurrently from September 1 through September 15, 2008, in Wildlife Management Unit 10 and all areas south of Y–70 in Wildlife Management Unit 7, only. Proposed daily bag limits for band-tailed pigeons and mourning doves would be 3 and 10, respectively. Possession limits for the above species are twice the daily bag limits. Shooting hours would be from one-half hour before sunrise to sunset. There would be no open season for sandhill cranes, rails, and snipe on the White Mountain Apache lands under this proposal. A number of special regulations apply to tribal and nontribal hunters, which may be obtained from the White Mountain Apache Tribe Game and Fish Department.

We propose to approve the regulations requested by the Tribe for the 2008–09 season.

(cc) Yankton Sioux Tribe, Marty, South Dakota (Tribal Members and Nontribal Hunters)

On May 17, 2008, the Yankton Sioux Tribe submitted a waterfowl hunting proposal for the 2008–09 season. The Yankton Sioux tribal waterfowl hunting season would be open to both tribal members and nontribal hunters. The waterfowl hunting regulations would apply to tribal and trust lands within the external boundaries of the reservation.

For ducks (including mergansers) and coots, the Yankton Sioux Tribe proposes a season starting October 9, 2008, and running for the maximum amount of days allowed under the final Federal frameworks. The Tribe indicated that if the Service decided to close the canvasback season, the Tribe would close theirs; otherwise, the canvasback season would start October 9, 2008, and run for the maximum amount of days allowed under the final Federal frameworks. Daily bag and possession limits would be 6 ducks, which may include no more than 5 mallards (no more than 2 hens), 1 canvasback (when open), 2 redheads, 3 scaup, 1 pintail, or 2 wood ducks. The bag limit for mergansers is 5, which would include no more than 1 hooded merganser. The coot daily bag limit is 15.

For geese, the Tribe has requested a dark goose (Canada geese, brant, white-fronts) season starting October 29, 2008, and closing January 31, 2009. The daily bag limit would be three geese (including no more than one white-fronted goose or brant). Possession limits would be twice the daily bag limit. For white geese, the proposed hunting season would start October 29, 2008, and run for the maximum amount of days allowed under the final Federal frameworks for the State of South Dakota. Daily bag and possession limits would equal the maximum allowed under Federal frameworks.

All hunters would have to be in possession of a valid tribal license while hunting on Yankton Sioux trust lands. Tribal and nontribal hunters must comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 pertaining to shooting hours and the manner of taking. Special regulations established by the Yankton Sioux Tribe also apply on the reservation.

During the 2005–06 hunting season, the Tribe reported that 90 tribal hunters took 400 Canada geese, 75 light geese, and 90 ducks. Forty-five tribal
members harvested fewer than 50 geese and 50 ducks.

We concur with the Yankton Sioux proposal for the 2008–09 hunting season.

Public Comments

The Department of the Interior’s policy is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, we invite interested persons to submit written comments, suggestions, or recommendations regarding the proposed regulations. Before promulgation of final migratory game bird hunting regulations, we will take into consideration all comments received. Such comments, and any additional information received, may lead to final regulations that differ from these proposals.

You may submit your comments and materials concerning this proposed rule by one of the methods listed in the ADDRESSES section. We will not consider comments sent by e-mail or fax or to an address not listed in the ADDRESSES section. Finally, we will not consider hand-delivered comments that we do not receive, or mailed comments that are not postmarked, by the date specified in the DATES section.

We will post your entire comment—including your personal identifying information—on http://www.regulations.gov. If you provide personal identifying information in your comment, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on http://www.regulations.gov, or by appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Division of Migratory Bird Management, Room 4107, 4501 North Fairfax Drive, Arlington, VA 22203.

For each series of proposed rules, we will establish specific comment periods. We will consider, but possibly may not respond in detail to, each comment. As in the past, we will summarize all comments received during the comment period and respond to them after the closing date in any final rules.

NEPA Consideration

NEPA considerations are covered by the programmatic document “Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FSES 88–14),” filed with the Environmental Protection Agency on June 9, 1988. We published Notice of Availability in the Federal Register on June 16, 1988 (53 FR 22582). We published our Record of Decision on August 18, 1988 (53 FR 31341). In addition, an August 1985 environmental assessment entitled “Guidelines for Migratory Bird Hunting Regulations on Federal Indian Reservations and Ceded Lands” is available from the address indicated under the caption FOR FURTHER INFORMATION CONTACT.

In a notice published in the September 8, 2005, Federal Register (70 FR 53376), we announced our intent to develop a new Supplemental Environmental Impact Statement for the migratory bird hunting program. Public scoping meetings were held in the spring of 2006, as detailed in a March 9, 2006, Federal Register (71 FR 12216). We have prepared a scoping report summarizing the scoping comments and scoping meetings. The report is available by either writing to the address indicated under FOR FURTHER INFORMATION CONTACT or by viewing on our Web site at http://www.fws.gov/migratorybirds.

Endangered Species Act Consideration

Prior to issuance of the 2008–09 migratory game bird hunting regulations, we will comply with provisions of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531–1543; hereinafter, the Act), to ensure that hunting is not likely to jeopardize the continued existence of any species designated as endangered or threatened, or modify or destroy its critical habitat, and is consistent with conservation programs for those species. Consultations under Section 7 of this Act may cause us to change proposals in this and future supplemental rulemaking documents.

Executive Order 12866

The Office of Management and Budget has determined that the migratory bird hunting rules are significant and has reviewed these rules under Executive Order 12866. OMB bases its determination upon the following four criteria:

(a) Whether the rule will have an annual effect of $100 million or more on the economy or adversely affect an economic sector, productivity, jobs, the environment, or other units of the government.

(b) Whether the rule will create inconsistencies with other Federal agencies’ actions.

(c) Whether the rule will materially affect entitlements, grants, user fees, loan programs, or the rights and obligations of their recipients.

(d) Whether the rule raises novel legal or policy issues.

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(a) Be logically organized;

(b) Use the active voice to address readers directly;

(c) Use clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in the ADDRESSES section. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Regulatory Flexibility Act

The regulations have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). We analyzed the economic impacts of the annual hunting regulations on small business entities in detail as part of the 1981 cost-benefit analysis discussed under Executive Order 12866. This analysis was revised annually from 1990–95. In 1995, the Service issued a Small Entity Flexibility Analysis (Analysis), which was subsequently updated in 1996, 1998, 2004, and 2008. The primary source of information about hunter expenditures for migratory game bird hunting is the National Hunting and Fishing Survey, which is conducted at 5-year intervals. The 2008 Analysis was based on the 2006 National Hunting and Fishing Survey and the U.S. Department of Commerce’s County Business Patterns, from which it was estimated that migratory bird hunters would spend approximately $1.2 billion at small businesses in 2008.

Copies of the Analysis are available upon request from the addresses indicated under FOR FURTHER INFORMATION CONTACT or from our Web site at http://www.fws.gov/migratorybirds/
Small Business Regulatory Enforcement Fairness Act
This rule is a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. For the reasons outlined above, this rule has an annual effect on the economy of $100 million or more. However, because this rule establishes hunting seasons, we do not plan to defer the effective date under the exemption contained in 5 U.S.C. 808 (1).

Paperwork Reduction Act
We examined these regulations under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). The various recordkeeping and reporting requirements imposed under regulations established in 50 CFR part 20, Subpart K, are utilized in the formulation of migratory game bird hunting regulations. Specifically, OMB has approved the information collection requirements of our Migratory Bird Surveys and assigned control number 1018–0023 (expires 2/28/2011). This information is used to provide a sampling frame for voluntary national surveys to improve our harvest estimates for all migratory game birds in order to better manage these populations. OMB has also approved the information collection requirements of the Alaska Subsistence Household Survey, an associated voluntary annual household survey used to determine levels of subsistence take in Alaska, and assigned control number 1018–0124 (expires 1/31/2016).

A Federal agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Unfunded Mandates Reform Act
We have determined and certify, in compliance with the requirements of the Unfunded Mandates Reform Act, 2 U.S.C. 1502 et seq., that this rulemaking will not impose a cost of $100 million or more in any given year on local or State government or private entities. Therefore, this rule is not a “significant regulatory action” under the Unfunded Mandates Reform Act.

Civil Justice Reform—Executive Order 12988
The Department, in promulgating this proposed rule, has determined that this proposed rule will not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of Executive Order 12988.

Takings Implication Assessment
In accordance with Executive Order 12630, this proposed rule, authorized by the Migratory Bird Treaty Act, does not have significant takings implications and does not affect any constitutionally protected property rights. This rule will not result in the physical occupancy of property, the physical invasion of property, or the regulatory taking of any property. In fact, these rules allow hunters to exercise otherwise unavailable privileges and, therefore, reduce restrictions on the use of private and public property.

Energy Effects—Executive Order 13211
On May 18, 2001, the President issued Executive Order 13211 on regulations that significantly affect energy supply, distribution, and use. Executive Order 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. While this proposed rule is a significant regulatory action under Executive Order 12866, it is not expected to adversely affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action and no Statement of Energy Effects is required.

Federalism Effects
Due to the migratory nature of certain species of birds, the Federal Government has been given responsibility over these species by the Migratory Bird Treaty Act. We annually prescribe frameworks from which the States make selections regarding the hunting of migratory birds, and we employ guidelines to establish special regulations on Federal Indian reservations and ceded lands. This process preserves the ability of the States and tribes to determine which seasons meet their individual needs. Any State or Indian tribe may be more restrictive than the Federal frameworks at any time. The frameworks are developed in a cooperative process with the States and the Flyway Councils. This process allows States to participate in the development of frameworks from which they will make selections, thereby having an influence on their own regulations. These rules do not have a substantial direct effect on fiscal capacity, change the rules or responsibilities of Federal or State governments, or intrude on State policy or administration. Therefore, in accordance with Executive Order 13132, these regulations do not have significant federalism effects and do not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Government-to-Government Relationship With Tribes
Due to the migratory nature of certain species of birds, the Federal Government has been given responsibility over these species by the Migratory Bird Treaty Act. Thus, in accordance with the President’s memorandum of April 29, 1994, “Government-to-Government Relations With Native American Tribal Governments” (59 FR 22951), Executive Order 13175, and 512 DM 2, we have evaluated possible effects on federally recognized Indian tribes and have determined that there are no effects on Indian trust resources. However, by virtue of the tribal proposals contained in this proposed rule, we have consulted with all the tribes affected by this rule.

List of Subjects in 50 CFR Part 20
Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

Based on the results of migratory game bird studies, and having due consideration for any data or views submitted by interested parties, this proposed rulemaking may result in the adoption of special hunting regulations for migratory birds beginning as early as September 1, 2008, on certain Federal Indian reservations, off-reservation trust lands, and ceded lands. Taking into account both reserved hunting rights and the degree to which tribes have full wildlife management authority, the regulations only for tribal members or for both tribal and nontribal hunters may differ from those established by States in which the reservations, off-reservation trust lands, and ceded lands are located. The regulations will specify open seasons, shooting hours, and bag and possession limits for rails, coot, gallinules, woodcock, common snipe, band-tailed pigeons, mourning doves, white-winged doves, ducks, mergansers, and geese.

The rules that eventually will be promulgated for the 2008–09 hunting season are authorized under the Migratory Bird Treaty Act (MBTA) of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), as amended. The MBTA authorizes and directs the Secretary of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and lines of flight of migratory game birds, to determine when, to what extent, and by what means such birds or any part, nest, or egg thereof may be taken, hunted, captured, killed, possessed,
sold, purchased, shipped, carried, exported, or transported.

Dated: August 8, 2008.

David M. Verhey,
Acting Assistant Secretary for Fish and Wildlife and Parks.
