Title of Proposal: Homelessness Prevention and Rapid Re-Housing Program (HPRP) Quarterly and Annual Performance Reporting.

OMB Approval Number: 2506–0186. Form Numbers: None.

Description of the Need for the Information and its Proposed Use: Quarterly and annual reports to monitor grantees and sub-grantees receiving Homelessness Prevention and Rapid Re-Housing Programs as well as to report aggregate data to HUD staff, other Federal agencies, the Congress, the Office of Management and Budget, and the public.

Frequency of Submission: Quarterly, Annually.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5281–N–81]

Public Housing Reform Act: Changes to Admission and Occupancy Requirements

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

The purpose of this information collection is to extend the admission and occupancy requirements put in place by the Quality Housing and Work Responsibility Act (QHWRA).

DATES: Comments Due Date: November 30, 2009.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval Number (2577–0230) and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806.

FOR FURTHER INFORMATION CONTACT: Lillian Deitzer, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410; e-mail Lillian Deitzer at Lillian.L.Deitzer@HUD.gov or telephone (202) 402–8048. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Deitzer.

SUPPLEMENTARY INFORMATION: This notice informs the public that the Department of Housing and Urban Development has submitted to OMB a request for approval of the Information collection described below. This notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information; (3) enhance the quality, utility, and clarity of the information to be collected; and (4) minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This notice also lists the following information:

Title of Proposal: Public Housing Reform Act: Changes to Admission and Occupancy Requirements.

OMB Approval Number: 2577–0230. Form Numbers: None.

Description of the Need for the Information and Its Proposed Use: The purpose of this information collection is to extend the admission and occupancy requirements put in place by the Quality Housing and Work Responsibility Act (QHWRA).

Frequency of Submission: On occasion, Other Per applicant.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Cross Creeks National Wildlife Refuge, Stewart County, TN

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability: Final comprehensive conservation plan and finding of no significant impact.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the availability of our final comprehensive conservation plan (CCP) and finding of no significant impact (FONSI) for the environmental assessment for Cross Creeks National Wildlife Refuge (NWR). In the final CCP, we describe how we
will manage this refuge for the next 15 years.

**OPTIONS:** A copy of the CCP may be obtained by writing to: Mr. Richard Hines, Refuge Manager, Cross Creeks NWR, 643 Wildlife Road, Dover, TN 37058. The CCP may also be accessed and downloaded from the Service’s Web site: [http://southeast.fws.gov/planning/](http://southeast.fws.gov/planning/).

**FOR FURTHER INFORMATION CONTACT:** Mr. Mike Dawson; telephone: 601/965–4903, Extension 20; fax: 601/965–4010.

**SUPPLEMENTARY INFORMATION:**

**Introduction**

With this notice, we finalize the CCP process for Cross Creeks NWR. We started this process through a notice in the Federal Register on January 3, 2007 (72 FR 143). For more about the process, see that notice.

Cross Creeks NWR was established on November 9, 1962, when a Memorandum of Agreement between the Service and the U.S. Army Corps of Engineers (Corps) was signed. The creation of Cross Creeks NWR was mitigation for waterfowl habitat lost due to the flooding of the former Kentucky Woodlands NWR. This flooding occurred as a result of the creation of Lake Barkley Reservoir, a project of the Corps, in 1954. Public Land Order 4560 formally transferred land rights of Cross Creek NWR to the Service.

The refuge's name originates from the intersection of North Cross Creek and South Cross Creek on the refuge. Cross Creeks NWR currently is 8,862 acres in size. The mixture of open water, wetlands, woodlands, croplands, and grasslands creates a mosaic of wildlife-rich habitats. The refuge provides valuable wintering habitat for migratory waterfowl and bald eagles. It also provides habitat and protection for threatened and endangered species, such as gray bats, Indiana bats, and least terns.

Cross Creeks NWR stretches 12 miles on either side of the Lake Barkley Reservoir and the Cumberland River between the cities of Dover and Cumberland, Tennessee. This river creates a north side and a south side of the refuge. The reservoir and refuge are on the middle transition portion of the Cumberland River between Cheatham Dam and Barkley Dam. The Corps operates Lake Barkley “primarily for flood control, hydropower, and navigation, as well as secondary purposes of recreation, water quality, water supply, and fish and wildlife habitat.” Multiple local roads cross the refuge, which receives approximately 45,000 visitors annually. Residents and non-residents generate $1.8 million in expenditures annually.

Cross Creeks NWR is in the Tennessee-Kentucky portion of the Mississippi Flyway. Peak wintering populations of ducks reached more than 108,000 in the mid-1990s. Recently, duck populations have peaked at 35,000–50,000. Canada geese peak wintering populations reached over 73,000 twice in the early to mid-1990s. However, recent wintering populations are 4,000–5,000, with an average of 15,000 during the period 1997–2003. We announce our decision and the availability of the final CCP and FONSI for Cross Creeks NWR in accordance with the National Environmental Policy Act (NEPA) [40 CFR 1506.6(b)] requirements. We completed a thorough analysis of impacts on the human environment, which we included in the draft comprehensive conservation plan and environmental assessment (Draft CCP/EA). The CCP will guide us in managing and administering Cross Creeks NWR for the next 15 years.

**Selected Alternative**

After considering the comments we received and based on the professional judgment of the planning team, we selected Alternative D to implement the CCP. This alternative is judged to be the most effective management action for meeting the purposes of the refuge by optimizing habitat management and visitor services throughout the refuge. Over the life of the CCP, Alternative D will balance an enhanced wildlife management program, with increased opportunities for public use. Wildlife and habitat management, as well as public use activities, will increase under this alternative. Under this alternative, we will pursue the same five broad refuge goals as each of the other alternatives.

We will provide foraging habitats to meet the needs of 33,000 to 44,400 ducks (25 percent more than Alternative A) for 110 days and other habitats that are needed for loafing, roosting, molting, and other needs. We will also provide adequate foraging habitat to meet the needs of 15,400 migratory Canada geese for 90 days, but will evaluate the need for foraging habitat every 5 years and adjust accordingly. We will continue to provide sanctuary, as under Alternative A, backed up by increased enforcement to reduce illegal disturbance and trespass. In addition, we will seek opportunities for limited wildlife observation within the sanctuary. We will provide 20 to 50 properly located and maintained nesting boxes, brood rearing habitat, and feeding areas throughout the refuge.

We will determine the status of priority marsh bird species on the refuge. Alternative D also calls for determining the status of shorebirds on the refuge and implementing active shorebird management on at least one impoundment during fall migration. We will develop additional partnerships with other agencies, non-governmental organizations, and the public in efforts to inventory shorebirds, colonial nesting waterbirds, and landbirds, and to possibly assist in certain habitat management activities. Under Alternative D, development of a baseline colonial waterbird inventory through systematic surveys will occur. We will develop and implement baseline inventories for non-game mammals, reptiles, amphibians, and invertebrates.

We will manage game populations to minimize quality hunting opportunities while maintaining habitat for Federal trust species. We will continue to

May 1, 2009 (74 FR 20333). Five public comments were received.

**Selected Alternative**

After considering the comments we received and based on the professional judgment of the planning team, we selected Alternative D to implement the CCP. This alternative is judged to be the most effective management action for meeting the purposes of the refuge by optimizing habitat management and visitor services throughout the refuge. Over the life of the CCP, Alternative D will balance an enhanced wildlife management program, with increased opportunities for public use. Wildlife and habitat management, as well as public use activities, will increase under this alternative. Under this alternative, we will pursue the same five broad refuge goals as each of the other alternatives.

We will provide foraging habitats to meet the needs of 33,000 to 44,400 ducks (25 percent more than Alternative A) for 110 days and other habitats that are needed for loafing, roosting, molting, and other needs. We will also provide adequate foraging habitat to meet the needs of 15,400 migratory Canada geese for 90 days, but will evaluate the need for foraging habitat every 5 years and adjust accordingly. We will continue to provide sanctuary, as under Alternative A, backed up by increased enforcement to reduce illegal disturbance and trespass. In addition, we will seek opportunities for limited wildlife observation within the sanctuary. We will provide 20 to 50 properly located and maintained nesting boxes, brood rearing habitat, and feeding areas throughout the refuge.

We will determine the status of priority marsh bird species on the refuge. Alternative D also calls for determining the status of shorebirds on the refuge and implementing active shorebird management on at least one impoundment during fall migration. We will develop additional partnerships with other agencies, non-governmental organizations, and the public in efforts to inventory shorebirds, colonial nesting waterbirds, and landbirds, and to possibly assist in certain habitat management activities. Under Alternative D, development of a baseline colonial waterbird inventory through systematic surveys will occur. We will develop and implement baseline inventories for non-game mammals, reptiles, amphibians, and invertebrates.

We will manage game populations to minimize quality hunting opportunities while maintaining habitat for Federal trust species. We will continue to
protect all Federally listed species under the Endangered Species Act and will use partners and volunteers (when necessary) to determine the distribution and abundance of all listed species. When necessary, control of invasive animal species using approved techniques to help achieve refuge conservation goals and objectives will occur.

Alternative D will focus water management within the impoundments on migratory birds for the duration of the CCP. We will accomplish this by providing adequate and reliable flooded habitat throughout the refuge and assuring that water management capability can distribute water in a timely manner. We will make a concerted effort to accommodate sport fishing opportunities where and when circumstances allow.

Alternative D calls for expanding efforts to improve the moist-soil management program on at least 300 acres by expanding the invasive plant control program, water management techniques, and the use of management techniques that set back plant succession. We will also make a concerted effort to accommodate sport fishing opportunities where and when circumstances allow. Increasing the acreage and management of the refuge’s role as an outdoor classroom both for students and the general public for Stewart and surrounding counties.

We will continue to offer opportunities for wildlife observation and photography throughout the refuge, accessible along the refuge road system from March 16 to November 14, but with the addition of a wildlife observation deck next to the visitor center. Within 5 years, we will explore the feasibility of building a wildlife observation tower near Pool 1. Also within 5 years, we will increase the number of wayside signs and add wildlife signs along the Woodpecker Interpretive Trail, as well as develop an interpretive kiosk at Elk Reservoir.

We will maintain the staff of nine full-time employees, including the refuge manager, park ranger, office assistant, maintenance mechanic, assistant refuge manager, one forester to serve all Tennessee and Cumberland Rivers refuges, one biologist, one law enforcement officer, and one equipment operator. We will replace the now separate visitor center and headquarters with one common building. We will maintain the existing equipment fleet, replacing obsolete equipment as needed. We will add three portable toilets along the road system. Finally, we will install three pumps and add farm fire management equipment, such as corn planter, all-terrain vehicles, and pumper truck.

Authority: This notice is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105-57.

Dated: August 6, 2009.

Notice of Proposed Withdrawal

This notice is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105–57.

We will control invasive species through active methods of removal. These methods will work towards reducing the infestation and eliminating populations whenever feasible. We will also extend control efforts to include Eurasian water milfoil and develop partnerships with other agencies, non-governmental organizations, and the public in these control efforts.

Within 5 years, we will draft, approve, and begin to implement a new Visitor Services Plan, using the current format as a guide. We will provide quality fishing and compatible water-related recreation programs on 3,260 acres of the refuge by furnishing adequate launching facilities, bank fishing areas, and, based on availability of funding, at least one ADA-compliant pier to accommodate anglers of all abilities. We will develop and begin to implement a Cultural Resources Management Plan.

Throughout the life of the CCP, we will manage game populations to maximize quality hunting opportunities while maintaining habitat for Federal trust species. We will continue to provide environmental education services to the public, including visits to schools, environmental education workshops, and onsite and offsite environmental education programs. However, we will also expand the refuge’s role as an outdoor classroom both for students and the general public for Stewart and surrounding counties.

We will continue to offer opportunities for wildlife observation and photography throughout the refuge, accessible along the refuge road system from March 16 to November 14, but with the addition of a wildlife observation deck next to the visitor center. Within 5 years, we will explore the feasibility of building a wildlife observation tower near Pool 1. Also within 5 years, we will increase the number of wayside signs and add wildlife signs along the Woodpecker Interpretive Trail, as well as develop an interpretive kiosk at Elk Reservoir.

We will maintain the staff of nine full-time employees, including the refuge manager, park ranger, office assistant, maintenance mechanic, assistant refuge manager, one forester to serve all Tennessee and Cumberland Rivers refuges, one biologist, one law enforcement officer, and one equipment operator. We will replace the now separate visitor center and headquarters with one common building. We will maintain the existing equipment fleet, replacing obsolete equipment as needed. We will add three portable toilets along the road system. Finally, we will install three pumps and add farm fire management equipment, such as corn planter, all-terrain vehicles, and pumper truck.
