[Docket No. FWS-R9-NSR-2009-0023]
[RIN 1018-AW49]
2009–2010 Refuge-Specific Hunting and Sport Fishing Regulations—Additions

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service proposes to add two refuges to the list of areas open for hunting and/or sport fishing programs and increase the activities available at eight other refuges for the 2009–2010 season. One refuge will see a decrease in activities, and another refuge will see no net change in activities for the 2009–2010 season.

DATES: We will accept comments received or postmarked on or before January 28, 2010.

ADDRESSES: You may submit comments by one of the following methods:

• U.S. mail or hand delivery: Public Comments Processing, Attn: RIN 1018-AW49; Division of Policy and Directives Management; U.S. Fish and Wildlife Service; 4401 N. Fairfax Drive, Suite 222; Arlington, VA 22203.

We will not accept e-mail or faxes. We will post all comments on http://www.regulations.gov. This generally means that we will post any personal information you provide us (see the Public Comments section below for more information). For information on specific refuges’ public use programs and the conditions that apply to them or for copies of compatibility determinations for any refuge(s), contact individual programs at the addresses/phone numbers given in “Available Information for Specific Refuges” under Supplementary Information.

FOR FURTHER INFORMATION CONTACT: Leslie A. Marler, (703) 358-2397; Fax (703) 358-2248.

Amendments enacted by the Improvement Act, which built upon the Administration Act in a manner that provides an “organic act” for the Refuge System, are similar to those that exist for other public Federal lands. The Improvement Act serves to ensure that we effectively manage the Refuge System as a national network of lands, waters, and interests for the protection and conservation of our Nation’s wildlife resources. The Administration Act states first and foremost that we focus our Refuge System mission on conservation of fish, wildlife, and plant resources and their habitats. The Improvement Act requires the Secretary, before allowing a new use of a refuge, or before expanding, renewing, or extending an existing use of a refuge, to determine that the use is compatible with the purpose for which the refuge was established and the mission of the Refuge System. The Improvement Act established as the policy of the United States that wildlife-dependent recreation, when compatible, is a legitimate and appropriate public use of the Refuge System, through which the American public can develop an appreciation for fish and wildlife. The Improvement Act established six wildlife-dependent recreational uses as the priority general public uses of the Refuge System. These uses are: hunting, fishing, wildlife observation and photography, and environmental education and interpretation.

On many refuges where we decide to allow hunting and sport fishing, our general policy of adopting regulations identical to State hunting and sport fishing regulations is adequate in meeting these objectives. On other refuges, we must supplement State regulations with more-restrictive Federal regulations to ensure that we meet our management responsibilities, as outlined in the “Statutory Authority” section. We issue refuge-specific hunting and sport fishing regulations when we open wildlife refuges to migratory game bird hunting, upland game hunting, big game hunting, or sport fishing. These regulations list the wildlife species that you may hunt or fish, seasons, bag or creel (container for carrying fish) limits, methods of hunting or sport fishing, descriptions of areas open to hunting or sport fishing, and other provisions as appropriate. You may find previously issued refuge-specific regulations for hunting and sport fishing in 50 CFR part 32. In this rulemaking, we are also proposing to standardize and clarify the language of existing regulations.

Statutory Authority

for which we established the refuge and not inconsistent with other previously authorized operations.

The Administration Act and Recreation Act also authorize the Secretary to issue regulations to carry out the purposes of the Acts and regulate uses.

We develop specific management plans for each refuge prior to opening it to hunting or sport fishing. In many cases, we develop refuge-specific regulations to ensure the compatibility of the programs with the purpose(s) for which we established the refuge and the Refuge System mission. We ensure initial compliance with the Administration Act and the Recreation Act for hunting and sport fishing on newly acquired refuges through an interim determination of compatibility made at or near the time of acquisition. These regulations ensure that we make the determinations required by these acts prior to adding refuges to the lists of areas open to hunting and sport fishing in 50 CFR part 32. We ensure continued compliance by the development of comprehensive conservation plans, specific plans, and by annual review of hunting and sport fishing programs and regulations.

Amendments to Existing Regulations

This document proposes to codify in the Code of Federal Regulations all of the Service’s hunting and/or sport fishing regulations that are applicable at Refuge System units previously opened to hunting and/or sport fishing. We are doing this to better inform the general public of the regulations at each refuge, to increase understanding and compliance with these regulations, and to make enforcement of these regulations more efficient. In addition to now finding these regulations in 50 CFR part 32, visitors to our refuges will usually find them reiterated in literature distributed by each refuge or posted on signs.

We have cross-referenced a number of existing regulations in 50 CFR parts 26, 27, and 32 to assist hunting and sport fishing visitors with understanding safety and other legal requirements on refuges. This redundancy is deliberate, with the intention of improving safety and compliance in our hunting and sport fishing programs.

A. = Refuge already open to activity but added new land which increased activity
B. = Refuge already open to activity but added new species to hunt
C. = Refuge already opened to activity but expanded the activity through increased type of hunt (e.g., youth waterfowl)/different weaponry now allowed
D. = Refuge already opened to activity, added new land but adjusted hunt days, so no net increase
E. = No increase in hunt days; rather a redistribution of hunt area/days to make for safer, quality hunt
F. = Decrease in hunter days due to limiting of weekend waterfowl hunters
G. = New activity on a refuge previously opened to other activities
H. = New refuge opened, new activity

In the State of Mississippi, we revised the public hunting plan and propose the following changes for the Theodore Roosevelt National Wildlife Refuge Complex (comprising of six refuges: Hillside, Holt Collier, Mathews Brake, Morgan Brake, Panther Swamp, and Yazoo NWRs):

- Revision of the hunt plan for Holt Collier NWR (which is currently covered by the Yazoo NWR hunt plan) reflecting different weaponry and changing 14 days of the hunt from archery to archery/muzzleloader for big game hunting:
  - For Panther Swamp NWR: addition of deer hunting using muzzleloaders and modern weapons and waterfowl hunting on 2,900 acres of the Carter Unit; on the recently acquired 761-acre tract, expansion of deer and feral hog hunting (with no corresponding increase in hunters); and a redistribution/reduction of waterfowl hunting areas/hunt days throughout the refuge, including the Carter Unit and recently acquired 761-acre tract;
  - Addition of turkey hunting on Hillside NWR;
  - Addition of youth waterfowl hunting allowed on Yazoo NWR;
  - Limited weekend waterfowl hunt participation at Mathews Brake NWR, decreasing the number of hunters; and
  - Increase in deer/feral hog hunting on 366 acres at Morgan Brake NWR.

On Waccamaw NWR in South Carolina we added six new refuge parcels and propose to increase all allowable hunting activities on 1,905 acres and feral hog hunting on 1,200
acres. On Nisqually NWR in Washington we have added 191 acres of tidal flats that we propose to open to migratory bird hunting. On Red River NWR in Louisiana we have added approximately 6,000 acres of land that we propose to open to all three hunting activities, and we propose to add feral hog and turkey hunting. On San Luis NWR in California we have added approximately 2,000 acres of land (East Bear Creek Unit) that we propose to open for migratory game bird hunting.

Fish Advisory
For health reasons, anglers should review and follow State-issued consumption advisories before enjoying recreational sport fishing opportunities on Service-managed waters. You can find information about current fish consumption advisories on the internet at: http://www.epa.gov/ost/fish/.

Plain Language Mandate
In this proposed rule we made some of the revisions to the individual refuge units to comply with a Presidential mandate to use plain language in regulations; as such, these particular revisions do not modify the substance of the previous regulations. These types of changes include using “you” to refer to the reader and “we” to refer to the Refuge System, using the word “allow” instead of “permit” when we do not require the use of a permit for an activity, and using active voice (i.e., “We restrict entry into the refuge” vs. “Entry into the refuge is restricted”).

Request for Comments
You may submit comments and materials on this proposed rule by any one of the methods listed in the ADDRESSES section. We will not accept comments sent by e-mail or fax or to an address not listed in the ADDRESSES section. We will not accept anonymous comments; your comment must include your first and last name, city, State, country, and postal (zip) code. Finally, we will not consider hand-delivered comments that we do not receive, or mailed comments that are not postmarked, by the date specified in the DATES section.

We will post your entire comment on http://www.regulations.gov. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment – including your personal identifying information – may be made publicly available at any time. While we cannot guarantee that we will be able to do so, we will post all hardcopy comments on http://www.regulations.gov.

Public Comment
Department of the Interior policy is, whenever practicable, to afford the public a meaningful opportunity to participate in the rulemaking process. The process of opening refuges is done in stages, with the fundamental work being performed on the ground at the refuge and in the community where the program is administered. In these stages, the public is given other opportunities to comment, for example, on the comprehensive conservation plans and the compatibility determinations. The second stage is this document, when we publish the proposed rule in the Federal Register for additional comment, commonly for a 30–day comment period.

There is nothing contained in this annual regulation outside the scope of the annual review process where we determine whether individual refuges need modifications, deletions, or additions made to them. We make every attempt to collect all of the proposals from the refuges nationwide and process them expeditiously to maximize the time available for public review. We believe that a 30–day comment period, through the broader publication following the earlier public involvement, gives the public sufficient time to comment and allows us to establish hunting and fishing programs in time for the upcoming seasons. Many of these rules also relieve restrictions and allow the public to participate in recreational activities on a number of refuges. In addition, in order to continue to provide for previously authorized hunting opportunities while at the same time providing for adequate resource protection, we must be timely in providing modifications to certain hunting programs on some refuges.

We considered providing a 60–day, rather than a 30–day, comment period. However, we determined that an additional 30–day delay in processing these refuge-specific hunting and sport fishing regulations would hinder the effective planning and administration of our hunting and sport fishing programs. Such a delay would jeopardize enacting amendments to hunting and sport fishing programs in time for implementation this year and/or early next year, or shorten the duration of these programs.

Even after issuance of a final rule, we accept comments, suggestions, and concerns for consideration for any appropriate subsequent rulemaking.

When finalized, we will incorporate these regulations into 50 CFR part 32. Part 32 contains general provisions and refuge-specific regulations for hunting and sport fishing on refuges.

Clarity of This Rule
We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:
(a) Be logically organized;
(b) Use the active voice to address readers directly;
(c) Use clear language rather than jargon;
(d) Be divided into short sections and sentences; and
(e) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in the ADDRESSES section. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Regulatory Planning and Review
The Office of Management and Budget (OMB) has determined that this rule is not significant under Executive Order 12866 (E.O. 12866). OMB bases its determination on the following four criteria:

(a) Whether the rule will have an annual effect of $100 million or more on the economy or adversely affect an economic sector, productivity, jobs, the environment, or other units of the government.

(b) Whether the rule will create inconsistencies with other Federal agencies’ actions.

(c) Whether the rule will materially affect entitlements, grants, use fees, loan programs, or the rights and obligations of their recipients.

(d) Whether the rule raises novel legal or policy issues.

Regulatory Flexibility Act
Under the Regulatory Flexibility Act (as amended by the Small Business Regulatory Enforcement Fairness Act [SBREFA] of 1996) (5 U.S.C. 601, et seq.), whenever a Federal agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e.,
small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies that the rule would not have a significant economic impact on a substantial number of small entities. Thus, for a regulatory flexibility analysis to be required, impacts must exceed a threshold for “significant impact” and a threshold for a “substantial number of small entities.” See 5 U.S.C. 605(b).

SBREFA amended the Regulatory Flexibility Act to require Federal agencies to provide a statement of the factual basis for certifying that a rule would not have a significant economic impact on a substantial number of small entities.

This proposed rule adds two national wildlife refuges to the list of refuges open to hunting, increases hunting activities on eight national wildlife refuges, decreases activities at one national wildlife refuge and has a net change of zero at one national wildlife refuge. As a result, visitor use for wildlife-dependent recreation on these national wildlife refuges will change. If the refuges establishing new hunting programs were a pure addition to the current supply of such activities, it would mean an estimated increase of 3,675 user days of hunting (Table 2).

Because the participation trend is flat in hunting activities since 1991, this increase in supply will most likely be offset by other sites losing participants. Therefore, this is likely to be a substitute site for the activity and not necessarily an increase in participation rates for the activity.

To the extent visitors spend time and money in the area of the refuge that they would not have spent there anyway, they contribute new income to the regional economy and benefit local businesses. Due to the unavailability of site-specific expenditure data, we use the national estimates from the 2006 National Survey of Fishing, Hunting, and Wildlife Associated Recreation to identify expenditures for food and lodging, transportation, and other incidental expenses. Using the average expenditures for these categories with the maximum expected additional participation of the Refuge System yields approximately $393,000 in hunting-related expenditures (Table 2). By having ripple effects throughout the economy, these direct expenditures are only part of the economic impact of waterfowl hunting. Using a national impact multiplier for hunting activities (2.67) derived from the report “Economic Importance of Hunting in America” yields a total economic impact of approximately $1.1 million (2008 dollars) (Southwick Associates, Inc., 2007). Using a local impact multiplier would yield more accurate and smaller results. However, we employed the national impact multiplier due to the difficulty in developing local multipliers for each specific region.

Since we know that most of the fishing and hunting occurs within 100 miles of a participant’s residence, then it is unlikely that most of this spending would be “new” money coming into a local economy; therefore, this spending would be offset with a decrease in some other sector of the local economy. The net gain to the local economies would be no more than $1.1 million, and most likely considerably less. Since 80 percent of the participants travel less than 100 miles to engage in hunting and fishing activities, their spending patterns would not add new money into the local economy and, therefore, the real impact would be on the order of $210,000 annually.

Small businesses within the retail trade industry (such as hotels, gas stations, taxidermy shops, bait and tackle shops, etc.) may be impacted from some increased or decreased refuge visitation. A large percentage of these retail trade establishments in the local communities around national wildlife refuges qualify as small businesses (Table 3). We expect that the incremental recreational changes will be scattered, and so we do not expect that the rule will have a significant economic effect on a substantial number of small entities in any region or nationally. As noted previously, we expect approximately $210,000 to be spent in total in the refuges’ local economies. The maximum increase ($1.1 million if all spending were new money) at most would be less than 1 percent for local retail trade spending.

With the small change in overall spending anticipated from this proposed rule, it is unlikely that a substantial number of small entities will have more than a small impact from the spending change near the affected refuges. Therefore, we certify that this proposed rule will not have a significant economic effect on a substantial number of small entities as defined under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). An initial/final Regulatory Flexibility Analysis is not required. Accordingly, a Small Entity Compliance Guide is not required.

**Small Business Regulatory Enforcement Fairness Act**

The proposed rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. We anticipate no significant employment or small business effects. This rule:

a. Would not have an annual effect on the economy of $100 million or more. The minimal impact would be scattered across the country and would most likely not be significant in any local area.

b. Would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. This proposed rule would have only a slight effect on the costs of hunting opportunities for Americans. If the substitute sites are farther from the participants’ residences, then an increase in travel costs would occur. The Service does not have
The regulation would clarify established sections 3(a) and 3(b)(2) of the Order. That it meets the requirements of the Mandates Reform Act sections above, would not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States–based enterprises to compete with foreign–based enterprises. This proposed rule represents only a small proportion of recreational spending at national wildlife refuges. Therefore, this rule would have no measurable economic effect on the wildlife–dependent industry, which has annual sales of equipment and travel expenditures of $72 billion nationwide.

Unfunded Mandates Reform Act
Since this proposed rule would apply to public use of federally owned and managed refuges, it would not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than $100 million per year. The rule would not have a significant or unique effect on State, local, or Tribal governments or the private sector. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 et seq.) is not required.

Takings (E.O. 12630)
In accordance with E.O. 12630, this proposed rule would not have significant takings implications. This regulation would affect only visitors at national wildlife refuges and describe what they can do while they are on a refuge.

Federalism (E.O. 13132)
As discussed in the Regulatory Planning and Review and Unfunded Mandates Reform Act sections above, this proposed rule would not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment under E.O. 13132. In preparing this proposed rule, we worked with State governments.

Civil Justice Reform (E.O. 12988)
In accordance with E.O. 12988, the Office of the Solicitor has determined that the proposed rule would not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of the Order. The regulation would clarify established regulations and result in better understanding of the regulations by refuge visitors.

Energy Supply, Distribution or Use (E.O. 13211)
On May 18, 2001, the President issued E.O. 13211 on regulations that significantly affect energy supply, distribution, and use. E.O. 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. Because this proposed rule would increase activities at eight refuges and open two new refuges, it is not a significant regulatory action under E.O. 12866 and is not expected to significantly affect energy supplies, distribution, and use. Therefore, this action is not a significant energy action and no Statement of Energy Effects is required.

Consultation and Coordination with Indian Tribal Governments (E.O. 13175)
In accordance with E.O. 13175, we have evaluated possible effects on federally recognized Indian tribes and have determined that there are no effects. We coordinate recreational use on national wildlife refuges with Tribal governments having adjoining or overlapping jurisdiction before we propose the regulations.

Paperwork Reduction Act
This regulation does not contain any information collection requirements other than those already approved by the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) (OMB Control Number is 1018-0102 and 1018-0140). See 50 CFR 25.23 for information concerning that approval. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Endangered Species Act Section 7 Consultation
We comply with Section 7 of the ESA when developing Comprehensive Conservation Plans (CCPs) and step–down management plans (which would include hunting and/or fishing plans) for public use of refuges, and prior to implementing any new or revised public recreation program on a refuge as identified in 50 CFR 26.32. Section 7 consultation has been completed on each of the affected refuges.

National Environmental Policy Act
We analyzed this proposed rule in accordance with the criteria of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(C)) and 516 Departmental Manual (DM) 6, Appendix 1. A categorical exclusion from NEPA documentation applies to publication of proposed amendments to refuge-specific hunting and fishing regulations since it is technical and procedural in nature, and the environmental effects are too broad, speculative, or conjectural to lend themselves to meaningful analysis (516 DM 2, Appendix 1.10). Concerning the actions that are the subject of this proposed rulemaking, NEPA has been complied with at the project level where each proposal was developed. This is consistent with the Department of the Interior instructions for compliance with NEPA where actions are covered sufficiently by an earlier environmental document (516 DM 3.2A). An Environmental Assessment, along with a Finding of No Significant Impact, was completed for each refuge in this proposed rulemaking except for Nisqually NWR. For Nisqually, we completed a Categorical Exclusion, along with an Environmental Action Statement. The proposed action in Nisqually is to open 191 acres already open to hunting to allow boat access for hunting; the impact from this proposed action was previously analyzed in Nisqually NWR’s Final CCP and EIS from 2004.

Prior to the addition of a refuge to the list of areas open to hunting and fishing in 50 CFR part 32, we develop hunting and fishing plans for the affected refuges. We incorporate these proposed refuge hunting and fishing activities in the refuge CCPs and/or other step-down management plans, pursuant to our refuge planning guidance in 602 Fish and Wildlife Service Manual (FW) 1, 3, and 4. We prepare these CCPs and step-down plans in compliance with section 102(2)(C) of NEPA, and the Council on Environmental Quality’s regulations for implementing NEPA in 40 CFR parts 1500–1508. We invite the affected public to participate in the review, development, and implementation of these plans. Copies of all plans and NEPA compliance are available from the refuges at the addresses provided below.

Available Information for Specific Refuges

Yazoo National Wildlife Refuge

A. Migratory Game Bird Hunting. We allow hunting of duck, goose, merganser, coot, and dove on the refuge in accordance with State regulations subject to the following conditions:

1. Youth hunters age 15 and under must possess and carry a hunter safety course card or certificate. Each youth hunter must remain within sight and normal voice contact of an adult age 21 or older. Hunters age 16 and older must possess and carry a valid signed refuge Public Use Permit certifying that he or she understands and will comply with all regulations. One adult may supervise no more than one youth hunter.

2. Before hunting or fishing, all participants must display their User Information Card in plain view on the dashboard of their vehicle so that the Permit Number is readable.

3. Failure to display the User Information Card will result in the loss of the participant’s annual refuge Public Use Permit.

4. We prohibit hunting or entry into areas designated as “CLOSED” (see refuge brochure map).

5. We prohibit possession of alcoholic beverages (see §32.2(j)).

6. We prohibit use of plastic flagging tape.

7. You must park vehicles in such a manner as not to obstruct roads, gates, turn rows, or firelanes (see §27.31(h) of this chapter).

8. We are open for hunting during the State season except during the muzzleloader deer hunt.

9. Valid permit holders may take the following furbearsers in season incidental to other refuge hunts with legal weapons used for that hunt: raccoon, opossum, coyote, beaver, bobcat, and nutria.

10. You may possess only approved nontoxic shot (see §32.2(k)) while in the field.

11. You may take migratory birds with shotguns shooting only approved nontoxic shot.

12. Hunters must remove all decoys, blind material (see §27.93 of this chapter), and harvested waterfowl from the area no later than 1 p.m. each day.

13. We allow goose, duck, merganser, and coot hunting from 1 hour before legal sunrise until 12 p.m. (noon). We allow entry into the refuge at 4 a.m.

14. There is no early teal season.

15. We allow hunting of snow geese during the Light Goose Conservation Order seasons by Special Use Permit.

B. Upland Game Hunting. We allow hunting of squirrel, rabbit, quail, and raccoon on designated areas of the refuge in accordance with State regulations subject to the following conditions:

1. We allow hunting during the open State season except during limited draw hunts.
