material, all submissions will be posted, without change, to the Federal eRulemaking Portal at http://www.regulations.gov, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice, which can be viewed by clicking on the “Privacy Notice” link in the footer of http://www.regulations.gov.

You may submit your comments and material by the methods specified in the ADDRESSES section. Please submit your comments and any supporting material by only one means to avoid the receipt and review of duplicate submissions.

Docket: The proposed solution document is available in docket ID FEMA–2011–0025. Additionally, the document can be found at http://www.fema.gov/plan/prevent/fhm/lv_lamp.shtm. For access to the docket to read background documents or comments received, go to the Federal eRulemaking Portal at http://www.regulations.gov and search for the docket ID. Submitted comments may also be inspected at FEMA, Office of Chief Counsel, Room 835, 500 C St. SW., Washington, DC, 20472.

II. Public Online Forum

FEMA will hold three public online forums to present the approach. The first public forum will be held on December 21, 2011 from 1:30 p.m. EST to 3 p.m. EST. The second online forum will be held on January 3, 2012, from 1:30 p.m. EST to 3 p.m. EST. The third online forum will be held on January 10, 2012 from 1:30 p.m. EST to 3 p.m. EST. All meetings will take place through an online webinar. If you are interested in participating in the online forum, please email FEMA-GS@dhs.gov to reserve a slot for the forum and receive further instructions for logging in and participating.

III. Background

FEMA maps flood hazards on Flood Insurance Rate Maps, a tool used to support the National Flood Insurance Program. These maps identify areas that are flood prone for a variety of reasons. One unique category of flood hazards is the areas behind levees. Levees can be recognized as providing protection on FEMA’s flood maps if they meet all requirements of 44 CFR 65.10, the regulations that define the design, maintenance and operation standards specifically for this purpose. Levees meeting all aspects of 44 CFR 65.10 are considered eligible to be accredited. Those that cannot meet all of these standards cannot be accredited.

The current approach for analyzing and mapping flood hazards associated with non-accredited levees is a singular approach where one technical procedure applies to all non-accredited levees. The feedback on this one-size-all approach is that it does not take the unique conditions of each levee into consideration. Many stakeholders also believe this approach does not adequately reflect the ability of these levees to provide some level of flood hazard reduction.

FEMA is listening to this stakeholder feedback that this current approach used to map flood hazards associated with non-accredited levees is too coarse to represent the variety of situations associated with levees. In response, FEMA has worked to revise the mapping procedures for non-accredited levees. This approach works within the confines of existing federal regulations, yet is more flexible, collaborative and feasible.

FEMA is replacing the former, singular approach with a suite of procedures that are technically sound, understandable to stakeholders, and cost effective. This suite of procedures will better meet the needs of the public and provide more precise results, while at the same time recognizing that uncertainty will remain. While these procedures allow for more detailed modeling and mapping of flood hazards for non-accredited levee systems, the risk of flooding in levee-impacted areas remains. Therefore, levee system owners and communities still need to remain engaged in flood risk management and communication activities.

IV. Request for Comments

FEMA welcomes your comments, questions, and concerns regarding the proposed approach’s technical clarity, potential local impact, and feasibility for community participation. FEMA also welcomes any suggestions for improvement to the proposed approach.

Sandra Knight,
Deputy Associate Administrator, Federal Insurance and Mitigation, Federal Emergency Management Agency.

Deepwater Horizon Oil Spill; Draft Phase I Early Restoration Plan and Environmental Assessment

AGENCY: Department of the Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: In accordance with the Oil Pollution Act of 1990 (OPA), the National Environmental Policy Act (NEPA), and the Framework Agreement for Early Restoration Addressing Injuries Resulting from the Deepwater Horizon Oil Spill, the Federal and State natural resource trustee agencies (Trustees) have prepared a Draft Early Restoration Plan and Environmental Assessment (DERP/EA) describing and proposing a suite of early restoration projects intended to commence the process of restoring natural resources and services injured or lost as a result of the Deepwater Horizon oil spill, which occurred on or about April 20, 2010, in the Gulf of Mexico. The purpose of this notice is to inform the public of the availability of the DERP/EA and to seek written comments on the proposed restoration alternative presented in the DERP/EA.

DATES: Comments Due Date: We will consider public comments received on or before February 14, 2012.

Public Meetings: A series of public meetings are scheduled to facilitate public review and comment on the DERP/EA. Both written and verbal public comments will be taken at the meetings. The meeting dates, times, and locations are listed below. Meeting facilities and their addresses will be published in local newspapers and will be posted on the web at www.gulfspillrestoration.noaa.gov.

dispersants were applied to the waters approximately 771,000 gallons of three months. In addition, Mexico over a period of approximately 4.9 million barrels (210 million gallons) of oil were released from the well into the Gulf of the seabed. An estimated 2701 oil spill under the MC252), experienced a significant explosion, fire and subsequent sinking a well for BP Exploration and Horizon, although the Gulf of Mexico, resulting in a prospect (Mississippi Canyon 252— Horizon, Mississippi, and Texas. Federal and State trustees (listed below) are conducting the natural resource damage assessment for the Deepwater Horizon oil spill under the Oil Pollution Act 1990 (OPA: 33 U.S.C. 2701 et seq.). Pursuant to OPA, federal and state agencies and Indian tribes may act as trustees on behalf of the public to assess natural resource injuries and losses and to determine the damages required to compensate the public for those injuries and losses. OPA further instructs the designated trustees to develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the injured natural resources under their trusteeship. The trustees have developed this DERP/EA under the Framework Agreement.

The trustees are:

- U.S. Department of the Interior (DOI), as represented by the National Park Service, U.S. Fish and Wildlife Service, and Bureau of Land Management;
- National Oceanic and Atmospheric Administration (NOAA), on behalf of the U.S Department of Commerce;
- State of Louisiana Coastal Protection and Restoration Authority, Oil Spill Coordinator’s Office, Department of Environmental Quality, Department of Wildlife and Fisheries and Department of Natural Resources;
- State of Mississippi Department of Environmental Quality;
- State of Alabama Department of Conservation and Natural Resources and Geological Survey of Alabama;
- State of Florida Department of Environmental Protection and Fish and Wildlife Conservation Commission; and
- Texas Parks and Wildlife Department, Texas General Land Office and Texas Commission on Environmental Quality.

The U.S. Department of Defense (DOD) is a Trustee, but does not have affected lands in this Draft Phase I Early Restoration Project.

### Background

On April 20, 2011, BP agreed to provide up to $1 billion toward early restoration projects in the Gulf of Mexico to address injuries to natural resources caused by the Deepwater Horizon oil spill. This early restoration agreement, entitled “Framework for Early Restoration Addressing Injuries Resulting from the Deepwater Horizon Oil Spill” (Framework Agreement), represents a preliminary step toward the restoration of injured natural resources. The Framework Agreement is intended to expedite the start of restoration in the Gulf in advance of the completion of the injury assessment process. The Framework Agreement provides a mechanism through which the Trustees and BP can work together “to commence implementation of early restoration projects that will provide meaningful benefits to accelerate restoration in the Gulf as quickly as practicable” prior to the completion of the natural resource damage assessment process or full resolution of the Trustees’ natural resource damages claim.

The Trustees have actively solicited public input on restoration project ideas...
through a variety of mechanisms, including public meetings, electronic communication, and creation of a Trustee-wide public Web site and database to share information and receive public project submissions. The Trustees are considering a broad array of potential early restoration projects. Their key objective in pursuing early restoration is to secure tangible recovery of natural resources and natural resource services for the public's benefit while the longer-term process of fully assessing injury and damages is still underway. As the first step in this accelerated process, the Trustees are first proposing eight projects as set forth in this Phase I Draft Early Restoration Plan/Environmental Assessment (DERP/EA) in accordance with OPA and NEPA. These projects proposed in this plan are not intended to, and do not fully, address all injuries caused by the spill or provide the extent of restoration needed to satisfy claims against BP.

In keeping with the Framework Agreement, the DERP/EA includes an estimate of the gains anticipated to result from each project, referred to as “Natural Resource Damage Offsets (NRD Offsets).” These NRD Offsets were identified consistent with the terms of the Framework Agreement. If these projects are approved, at the end of the NRD process, the Trustees would credit these NRD Offsets generated by these early restoration projects towards the total restoration credits required based on the completed injury assessment. Further comprehensive restoration will still be required to fully compensate the public for natural resource losses from the oil spill.

Overview of the Phase 1 DERP/EA Draft Early Restoration Plan Alternatives, Including Proposed Alternative

The DERP/EA describes two early restoration alternatives: No Action—Natural Recovery (referred to for consideration by OPA) and Proposed Action—Proposed Early Restoration Projects. Under the No Action alternative, the trustees would not implement early restoration projects as described in this DERP/EA. Rather, the trustees would rely, for the time being, solely on natural recovery processes to restore natural resources to their pre-spill conditions and would undertake no early actions to accelerate recovery or to help address interim resource losses.

Under the Proposed Action, the Trustees are considering eight projects that meet the selection criteria as described in the DERP/EA.

Proposed Action—Proposed Early Restoration Projects

The proposed projects are intended to provide services that will benefit injured marshes, coastal dune habitats, nearshore sediments, oysters, and human uses (on water recreation). Each of these projects provides benefits to natural resources and their services injured by the Deepwater Horizon oil spill. The proposed projects are: (1) Lake Hermitage Marsh Creation, Louisiana; (2) Louisiana Oyster Cultch Project; (3) Mississippi Oyster Cultch Restoration; (4) Mississippi Artificial Reef Habitat; (5) Marsh Island (Portersville Bay, Alabama) Marsh Creation; (6) Alabama Dune Restoration Cooperative Project; (7) Florida Boat Ramp Enhancement Cooperative Project; (8) Florida Dune Restoration.

Next Step

After the public comment period ends, we will analyze and address the comments. After close of the public comment period, the Trustees will consider all input received before a Phase I Early Restoration Plan is finalized. As described above, a series of public meetings are scheduled to facilitate the public review and comment process. Upon completion of the Phase I Early Restoration Plan, negotiations with BP will be completed and approved projects will proceed to implementation, pending compliance with all applicable state and federal laws.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information, may be publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Administrative Record

The documents comprising the Administrative Record can be viewed electronically at the following location: http://www.doii.gov/deepwaterhorizon.

Author

The primary author of this notice is Nanciann Regalado.

Authority

The authority of this action is the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), the implementing Natural Resource Damage Assessment regulations found at 15 CFR Part 990, and the Framework Agreement for Addressing Injuries Resulting from the Deepwater Horizon Oil Spill.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Renewal of Agency Information Collection for the Bureau of Indian Education Adult Education Program; Request for Comments

AGENCIES: Bureau of Indian Affairs, Interior.

ACTION: Notice of submission to OMB.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Bureau of Indian Education (BIE) is submitting to the Office of Management and Budget (OMB) a request for renewal for the collection of information for the Adult Education Program. The information collection is currently authorized by OMB Control Number 1076–0120, which expires December 31, 2011.

DATES: Interested persons are invited to submit comments on or before January 17, 2012.

ADDRESSES: You may submit comments on the information collection to the Desk Officer for the Department of the Interior at the Office of Management and Budget, by facsimile to (202) 395–5806 or you may send an email to: OIRA_DOCKET@omb.eop.gov. Please send a copy of your comments to Brandi Sweet, Bureau of Indian Education, 1849 C Street NW., MS–4141, Washington, DC 20240, fax (202) 208–3312; email: Brandi.Sweet@bie.edu.

FOR FURTHER INFORMATION CONTACT: Brandi Sweet, Bureau of Indian Education, at (202) 208–5504. You may review the ICR online at http://www.reginfo.gov. Follow the instructions to review Department of the Interior collections under review by OMB.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Bureau of Indian Education (BIE) is seeking renewal of the approval for the information collection conducted under 25 CFR part 46 to manage program resources and for fiscal accountability and appropriate direct services documentation. Approval for this collection expires on December 31, 2011. This information includes an
