Background: In September 2011, President Barack Obama announced the United States’ commitment to participate in the Extractive Industries Transparency Initiative. EITI is a signature initiative of the U.S. National Action Plan for the international Open Government Partnership and offers a voluntary framework for governments and companies to publicly disclose in parallel the revenues paid and received for extraction of oil, gas, and minerals owned by the state. The design of each framework is country-specific and is developed through a multi-year, consensus-based process by a multi-stakeholder group comprised of government, industry, and civil society representatives.

Dated: September 12, 2013.

Amy Holly,
Chief of Staff—Policy, Management and Budget.

SUPPLEMENTARY INFORMATION:

Background

The Act (16 U.S.C. 1531 et seq.) prohibits certain activities with respect to endangered and threatened species unless a Federal permit allows such activity. Along with our implementing regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17, the Act provides for certain permits, and requires that we invite public comment before issuing these permits for endangered species.

A permit granted by us under section 10(a)(1)(A) of the Act authorizes the permittee to conduct activities (including take or interstate commerce) with respect to U.S. endangered or threatened species for scientific purposes or enhancement of propagation or survival. Our regulations implementing section 10(a)(1)(A) of the Act for these permits are found at 50 CFR 17.22 for endangered wildlife.
